Paulo Davim, 2020-03-13 This book deals with methodological issues in the field of management and industrial engineering. It aims to answer the following questions that researchers face every time they look to develop their research: How can we design a research project? What kind of paradigm should we follow? What kind

of sampling techniques can we have? This book provides discussion and the exchange of information on principles, strategies, models, techniques, applications and methodological options possible to develop in research in management and industrial engineering. It communicates the latest developments and thinking on the research methodologies subject in the different areas, worldwide. It seeks cultural and geographic diversity in studies highlighting research methodologies that can be used in these different study areas. This book has a special interest in research on important issues that transcend the boundaries of single academic subjects. It presents contributions that challenge the paradigms and assumptions of individual disciplines or functions, with chapters grounded in conceptual and / or empirical literature. The main aim of this book is to provide a channel of communication to disseminate knowledge between academics and researchers, with a special focus on the management and industrial engineering fields. *Reflexões multiprofissionais e interdisciplinares do processo saúde-doença* José Gerley Díaz Castro, 2022-10-05  
Conceituar saúde exige a ideia de processo, pois se sabe que ela é determinada, para bem ou para mal, por fatores determinantes e condicionantes, entre eles: econômicos, sociais, culturais, ambientais, de ordem comportamental e ainda biológicos. Sendo um fenômeno multidimensional, necessita um olhar complexo para sua compreensão. Certamente o Paradigma Complexo (PC) pode ser um referencial importante para compreensão do conceito ampliado de saúde e dos princípios do Sistema Único de Saúde. O PC exige um pensar de forma interdisciplinar para refletir os processos envolvidos. O olhar de diversos profissionais, tratando de diversos temas, busca propiciar o encontro de conexões entre as diversas áreas com vistas a superar a ideia, ainda muito arraigada, de tratar a saúde a partir de um paradigma simplificador.
