Differential Equations and Boundary Value Problems Charles Henry Edwards,David E. Penney,2000 For introductory courses in Differential Equations. This text provides the conceptual development and geometric visualization of a modern differential equations course while maintaining the solid foundation of algebraic techniques that are still essential to science and engineering students. It reflects the new excitement in differential equations as the availability of technical computing environments like Maple, Mathematica, and MATLAB reshape the role and applications of the discipline. New technology has motivated a shift in emphasis from traditional, manual methods to both qualitative and computer-based methods that render accessible a wider range of realistic applications. With this in mind, the text augments core skills with conceptual perspectives that students will need for the effective use of differential equations in their subsequent work and study.

Ecuaciones diferenciales: una introducción moderna Henry Ricardo,2008 La enseñanza de las ecuaciones diferenciales

ordinarias ha experimentado una gran evolución, tanto en términos pedagógicos como de contenido. Lo que una vez se pudo considerar como una colección de métodos especiales ha evolucionado gradualmente con la finalidad de proporcionar al alumno experiencias más valiosas, que un destacado matemático y autor ha denominado conceptualización, exploración y resolución de problemas de dificultad superior. Este es el espíritu que ha marcado la elaboración de este libro. Este manual presenta una introducción matemáticamente rigurosa y, no obstante, muy accesible a las ecuaciones diferenciales, ya que los conceptos se desarrollan desde una perspectiva de los sistemas dinámicos y se recurre a las herramientas tecnológicas (calculadoras gráficas, programas informáticos, etc.) para abordar los temas desde un punto de vista gráfico, numérico y analítico. El texto se ha pensado para que se adapte a una amplia variedad de estudiantes y sea la continuación natural de cualquier curso moderno de cálculo.
