Thailand and the Southeast Asian Networks of The Vietnamese Revolution, 1885-1954 Christopher E. Goscha, 2013-09-05
Christopher Goscha resituates the Vietnamese revolution and war against the French into its Asian context. Breaking with nationalist and colonial historiographies which have largely locked Vietnam into 'Indochinese' or 'Nation-state' straightjackets, Goscha takes Thailand as his point of departure for exploring how the Vietnamese revolution was intimately linked to Asia between the birth of the 'Save the King Movement' in 1885 and the Battle of Dien Bien Phu in 1954. But his study is more than just a political history. Goscha brings geography to bear on his subject with a passion. While he considers the little-known political movements of such well-known faces as Phan Boi Chau and Ho Chi Minh across Southeast Asia, the author takes us into the complex Asian networks stretching from northeastern Thailand and the port of Bangkok to southern China and Hong Kong - and beyond. There, we see how Ho and Chau drew upon an invisible army of Vietnamese and Chinese traders, criminals, prostitutes, sailors and above all the thousands of emigres living in Vietnamese communities in Thailand.

Finding Their Voice Charles Keyes, 2014-01-05
The rural, Lao-speaking people of northeastern Thailand constitute over a third of the entire population of Thailand. Over the last century, this ethnically separate community has evolved from a traditional peasantry into "cosmopolitan" villagers who are actively shaping Thai politics. Eminent anthropologist Charles Keyes traces this evolution in detail, beginning with the failure of a Buddhist millenarian uprising in 1901-2 and concluding with the successful election of the Thai Rak Thai/Pheu Thai Party in the 2000s. In the intervening century, rural northeasterners have become more educated and prosperous, and they have gained a sophisticated understanding of the world and of their position in it as Thai citizens. Although northeasterners have often been thwarted in their efforts to press government agencies to redress their grievances, they have rejected radical revolutionary efforts to transform the Thai political system. Instead, they have looked to parliamentary democracy as the system in which they can make their voices heard. As the country engages with the processes of democracy, the Pheu Thai Party and the Red Shirt movement appear to have established the people of northeastern Thailand as an authentic voice in the nation's political landscape. Highlights • Traces the evolution of a marginalized peasantry into a significant political force in Thai society • Examines the disjunction between the urban middle-class negative perspectives on the northeastern Thai rural population and real characteristics of that population • Highlights the different views of political authority and legitimacy in Thailand that have contributed to the

twenty-first century crisis in the Thai political order What Others Are Saying “Finding Their Voice by anthropologist Charles Keyes is a culmination of decades of careful ethnography consistently combined with an astute political analysis and sense of history. Reminiscent of Eugen Weber’s classic, “Peasants into Frenchmen,” Keyes’s book shows that the people of Isan have become the makers and undoers of governments and are more firmly wedded to the modern notion of parliamentary democracy than are the refined urban elites. This book has as much to say about the polarized politics of Thailand as it does about the rich culture and history of Isan.” —Philip Hirsch, University of Sydney

Thailand's Hidden Workforce Ruth Pearson, Kyoko Kusakabe, 2012-06-14 Millions of Burmese women migrate into Thailand each year to form the basis of the Thai agricultural and manufacturing workforce. Un-documented and unregulated, this army of migrant workers constitutes the ultimate 'disposable' labour force, enduring gruelling working conditions and much aggression from the Thai police and immigration authorities. This insightful book ventures into a part of the global economy rarely witnessed by Western observers. Based on unique empirical research, it provides the reader with a gendered account of the role of women migrant workers in Thailand's factories and interrogates the ways in which they manage their families and their futures.

War, Hunger, and Displacement: E. Wayne Nafziger, Frances Stewart, Raimo Väyrynen, 2000-10-19 Since the end of the cold war, the number of civil wars in developing countries has escalated to the point where they are the most significant source of human suffering in the world today. Although there are many political analyses of these emergencies, this two-volume work is the first comprehensive study of the economic, social, and political roots of humanitarian emergencies, identifying early measures to prevent such disasters. Nafziger, Stewart, and Väyrynen draw on a wide range of specialists on the political economy of war and on major conflicts to show the causes of conflict. The first volume provides a general overview of the nature and causes of the emergencies, including economic, political, and environmental factors. The second volume provides detailed case studies of thirteen conflicts (including Rwanda, Burundi, the Congo, Afghanistan, and the Caucasus) that originated in the weakness of the state or where economic factors predominate. The volumes emphasize the significance of protracted economic stagnation and decline, high and increasing inequality, government exclusion of distinct social groups, state failure and predatory rule. They debunk beliefs recurrent in the literature that emergencies are the result of deteriorating environmental conditions, structural adjustment, and deep-seated ethnic animosity. By analysing the causes and prevention of war and humanitarian emergencies in developing countries, this work outlines a less costly alternative to the present strategy of the world community of spending millions of dollars annually to provide mediation, relief, and rehabilitation after the conflict occurs.
