The Dao of Capital Mark Spitznagel, 2013-08-16 As today's preeminent doomsday investor Mark Spitznagel describes his Daoist and roundabout investment approach, one gains by losing and loses by gaining. This is Austrian Investing, an archetypal, counterintuitive, and proven approach, gleaned from the 150-year-old Austrian School of economics, that is both timeless and exceedingly timely. In *The Dao of Capital*, hedge fund manager and tail-hedging pioneer Mark Spitznagel—with one of the top returns on capital of the financial crisis, as well as over a career—takes us on a gripping, circuitous journey from the Chicago trading pits, over the coniferous boreal forests and canonical strategists from Warring States China to Napoleonic Europe to burgeoning industrial America, to the great economic thinkers of late 19th century Austria. We arrive at his central investment methodology of Austrian Investing, where victory comes not from waging the immediate decisive battle, but rather from the roundabout approach of seeking the intermediate positional advantage (what he calls shi), of aiming at the indirect means rather than directly at the ends. The monumental challenge is in seeing time differently, in a whole new intertemporal dimension, one that is so contrary to our wiring. Spitznagel is the first to condense the theories of Ludwig von Mises and his Austrian School of economics into a cohesive and—as Spitznagel has shown—highly effective investment methodology. From identifying the monetary distortions and non-randomness of stock market routs (Spitznagel's bread and butter) to scorned highly-productive assets, in Ron Paul's words from the foreword, Spitznagel brings Austrian economics from the ivory tower to the investment portfolio. *The Dao of Capital* provides a rare and accessible look through the lens of one of today's great investors to discover a profound harmony with the market process—a harmony that is so essential today.

Safe Haven Mark Spitznagel, 2021-08-10 What is a safe haven? What role should they play in an investment portfolio? Do we use them only to seek shelter until the passing of financial storms? Or are they something more? Contrary to everything we know from modern financial theory, can higher returns actually come as a result of lowering risk? In *Safe Haven*, hedge

fund manager Mark Spitznagel—one of the top practitioners of safe haven investing and portfolio risk mitigation in the world—answers these questions and more. Investors who heed the message in this book will never look at risk mitigation the same way again.

The Metaphysics of Kindness Asher Walden, 2015-03-06 Religious world-views reserve a central and prominent place for human moral action, yet they must also contend with the reality of human moral failings. Is it possible to anchor moral knowledge and practice in the framework of a moral universe? If so, how do you explain why things go wrong? Must the religions appeal to faith alone, or can they develop a rational framework for their moral visions? *The Metaphysics of Kindness: Comparative Studies in Religious Meta-ethics* explores the attempted solutions of four pivotal philosophers from very different traditions: the Neo-Confucian Zhu Xi, the German Idealist Arthur Schopenhauer, the Mahayana Buddhist Santideva, and the progenitor of the Kyoto School, Nishida Kitaro. Each position is investigated sympathetically and independently, yet there is an underlying commonality weaving the different studies together: compassion. Each philosopher treats compassion not only as one virtue among others, but as a kind of meta-virtue, the one that is in some respect the logical and/or psychological basis for all the other virtues. It is also a trait that is both at the heart of human nature, and also somehow at the heart of nature itself.

Handbook of Petroleum Refining Processes, Fourth Edition Robert A. Meyers, 2016-03-18 This fully revised resource presents the latest technologies and processes for petroleum refining from the world's leading producers. *Handbook of Petroleum Refining Processes* has become a key reference in the chemical and petroleum engineering markets. The book is unique in that it presents licensable technologies for the refining of petroleum and production of environmentally acceptable fuels and petrochemical intermediates. The new edition covers the gamut of global refining technologies in light of recent changes to the sources of these fuels, as well as the most up-to-date global environmental regulations. Contributions come

from such major licensors of petroleum refining technology as UOP, Inc., Shell, ExxonMobil Research and Engineering Company (EMRE), Chevron Lummus Global, Phillips 66, Belco, BP, and others. The new edition shifts its emphasis to accommodate the increased production of shale gas and shale oil which is changing the overall mix of hydrocarbon feeds. Declining conventional crude production and the need for regional energy independence continues to drive demand to use lower-cost, alternate feedstocks such as coal, shale oil, and heavy crude. To use alternate feedstocks in existing refineries, many processes need to be modified. The increase in diesel demand and stricter fuel specifications is driving refiners to look for ways to produce higher yields from existing assets. The book reflects these factors, plus the increase in residue conversion; hydrocracking evolving as a primary conversion process; and hydrotreating increasing as a way to treat virgin and cracked middle distillate streams. Offers detailed description of process chemistry and thermodynamics and product by-product specifications of plants Contributors are drawn from the largest petroleum producers in the world, including Chevron, Shell, ExxonMobil, and UOP Covers the very latest technologies in the field of petroleum refining processes and the shift toward shale gas and oil A complete listing and explanation of licensable global technologies for the refining of petroleum and the production of environmentally acceptable fuels and petrochemical intermediates Provides product-by-product specifications and process economics – capital investment annualized capital costs and the price range for each product

The Story of Progress Gösta Arvastson, Mats Lindqvist, 1996 In our postmodern reality, the global divisions between production and consumption have distorted our relationship to the world. The world is no longer made, it is thought, symbols become realities and fictions truths. This volume is designed to provide a theoretical and empirical perspective on the story of progress, the grand narrative of modernity, which seeks to penetrate deeply into private culture. The idea is to portray the cultural displacement of faith and facts, of nostalgia, violence, objects, and machines. Progress, the imaginary, is bound to

forms and appearances. It has a language, a space of fantasy, transforming the materialist reality into seductive power. The essays included here mirror an ongoing discussion, concerning the broad fields of investigation into the postmodern world.
