Conflicto y convivencia en el discurso pedagógico oficial durante el tardofranquismo y la transición democrática española (1965-1982) MILITO BARONE Cecilia Cristina , 2021-05-17 En el seno del Departamento de Historia de la Educación y Educación Comparada de la UNED se lleva a cabo desde 1992 una amplia investigación sobre los manuales escolares de los siglos XIX y XX —Proyecto MANES—, proyecto de carácter interdisciplinar e interuniversitario en el que colaboran diversas universidades e instituciones españolas, europeas y latinoamericanas. En la actualidad este grupo de investigación está integrado en el Centro de Investigación MANES. Fruto del trabajo de todos estos años son los diversos títulos que han visto la luz en esta colección. La obra *Conflicto y convivencia en el discurso pedagógico oficial durante el tardofranquismo y la transición democrática española (1965-1982)* intenta dilucidar bajo qué parámetros se trataron las problemáticas de conflicto y convivencia —tanto a nivel escolar como social— en el discurso pedagógico oficial del tardofranquismo y la transición a la democracia en España. La investigación utiliza como fuentes primarias los enunciados curriculares (el currículum prescrito), los manuales escolares y las revistas pedagógicas de la época, debiendo destacarse de manera muy especial la aportación metodológica que supone la aplicación del Análisis Crítico del Discurso (ACD) al estudio de los manuales escolares. La autora pone en evidencia que en toda época de cambio hay continuidades y discontinuidades, de manera que, a pesar de los cambios operados en el discurso pedagógico oficial de la Transición, persisten en este periodo importantes aspectos de una visión armónico-funcionalista propia de los años del franquismo.

Relating to Rock Art in the Contemporary World Liam M. Brady, Paul S.C. Taçon, 2016-12-01 Rock art has long been considered an archaeological artifact reflecting activities from the past, yet it is also a phenomenon with present-day meaning and relevance to both indigenous and non-indigenous communities. *Relating to Rock Art in the Contemporary World* challenges traditional ways of thinking about this highly recognizable form of visual heritage and provides insight into its contemporary significance. One of the most visually striking forms of material culture embedded in landscapes, rock art is ascribed different meanings by diverse groups of people including indigenous peoples, governments, tourism offices, and the

general public, all of whom relate to images and sites in unique ways. In this volume, leading scholars from around the globe shift the discourse from a primarily archaeological basis to one that examines the myriad ways that symbolism, meaning, and significance in rock art are being renegotiated in various geographical and cultural settings, from Australia to the British Isles. They also consider how people manage the complex meanings, emotions, and cultural and political practices tied to rock art sites and how these factors impact processes relating to identity construction and reaffirmation today. Richly illustrated and geographically diverse, *Relating to Rock Art in the Contemporary World* connects archaeology, anthropology, and heritage studies. The book will appeal to students and scholars of archaeology, anthropology, heritage, heritage management, identity studies, art history, indigenous studies, and visual theory, as well as professionals and amateurs who have vested or avocational interests in rock art. Contributors: Agustín Acevedo, Manuel Bea, Jutinach Bowonsachoti, Gemma Boyle, John J. Bradley, Noelene Cole, Inés Domingo, Kurt E. Dongoske, Davida Eisenberg-Degen, Dánae Fiore, Ursula K. Disaster Risk Reduction for Resilience Saeid Eslamian,Faezeh Eslamian,2023-03-29 This book is part of a six-volume series on Disaster Risk Reduction and Resilience. The series aims to fill in gaps in theory and practice in the Sendai Framework, and provides additional resources, methodologies, and communication strategies to enhance the plan for action and targets proposed by the Sendai Framework. The series will appeal to a broad range of researchers, academics, students, policy makers, and practitioners in engineering, environmental science and geography, geoscience, emergency management, finance, community adaptation, atmospheric science, and information technology. This volume offers indigenous approaches to disaster risk reduction, community sustainability and climate change resilience, as well as agro-ecological innovations for improving resilience to climate change. The focus is on adaptation strategies for sustainable terrestrial and marine ecosystems to reduce the impacts of anthropogenic factors that exacerbate disaster risk, including hydro-meteorological services for climate resilience, food security measures in agriculture and livestock, flood mitigation plans, and increased climate change education and awareness. The book concludes with three case studies in Africa detailing the impacts of strengthened climate change resilience measures, adaptive social protections, and improved water availability through hydro-electric technologies.
