The Greying of India Rajagopal D Chakraborti, 2004-06-30 This book argues cogently that India's policymakers need to urgently take up the cause of the elderly in order to create an environment that insures them against various risks and allows them to maintain as much economic independence and self-sufficiency as possible without disturbing the intergenerational balance. The first of its kind to be based on data from the National Sample Survey Organisation and providing a global perspective, this book constitutes the most comprehensive analysis of the causes and consequences of ageing in India. The major objectives of the book are to: - Document the rapid growth of older populations in India. - Address the key issues and topics related to ageing. - Assess the implications of demographic changes for programmes and policies for the aged. - Present an Elderly Status Index based on available data. Timely, stimulating and challenging, this book is packed with relevant and hitherto unanalysed data on ageing in India. In particular, it provides an exhaustive discussion on various conceptual and measurement issues relating to population ageing.

Gender-Biased Sex Selection in South Korea, India and Vietnam Laura Rahm, 2019-07-18 This book provides an in-depth analysis of the influence of public policy on sex selection. Three Asian countries were chosen for the comparative policy analysis, namely South Korea, India and Vietnam that share in common a historical legacy of son preference, high levels of sex imbalances and active policy response to curbing the growing demographic masculinization of their nations. The research based on the data collected from field work in the three countries shows that despite the adoption of very similar anti-sex selection policies the outcomes have been markedly different for each of the three countries. These unexpected diverse outcomes are explained partly by their different historical and cultural contexts, and partly to the different social, political and economic institutions and dynamics. This monograph offers careful and detailed explanations of both within and across country diversities in policy outcomes, pointing to the importance and the limits of cross-national policy learning and adoption, and raising questions about the efficacy of international organizations' current approaches to global policy and knowledge transfer.

Human Geography Erin H. Fouberg, Alexander B. Murphy, 2020-01-22 Fouberg/Murphy: Human Geography: People, Place, and Culture, 12th Edition, teaches students to appreciate the diversity of people, places, and cultures, and understand the role people play in shaping our world. The goals of this edition are to provide geographic context to global, regional, national, and local issues and to teach students to think geographically and critically about these issues. Human Geography features beautifully designed maps, dozens of vibrant photographs taken by the author team, and author and guest field notes that help students see how geographers read cultural landscapes and use fieldwork to understand places. Fouberg's Human Geography, 12th Edition, now integrates Threshold Concepts to help students develop their ability to think geographically. Once they learn and apply one of these concepts in the context of a given place, students integrate it into their thinking and can draw from it as they learn new material and explore other places.

Scarce Women and Surplus Men in China and India Sharada Srinivasan, Shuzhuo Li, 2017-10-31 This volume documents how families, communities and some groups (single men, young 'scarce' women, parents) adapt and adjust to recent demographic shifts in China and India. It discusses how demographic change interacts with other processes of change, including changes with respect to economic development and globalization, gender, class, caste, families, migration and work. The chapters offer micro-level analyses contextualized in larger processes of change and push further existing understandings of the consequences of the demographic imbalance between men and women in China and/or India, particularly from a gender perspective. As such this book will be of interest to scholars and students in population studies,

sociology, international development, gender studies, and Asian studies.
