Artificial Intelligence in Control and Decision-making Systems Yuriy P. Kondratenko, Vladik Kreinovich, Witold Pedrycz, Arkadii Chikrii, Anna M. Gil-Lafuente, 2023-04-17 This book presents an authoritative collection of contributions reporting on computational intelligence, fuzzy systems as well as artificial intelligence techniques for modeling, optimization, control and decision-making together with applications and case studies in engineering, management and economic sciences. Dedicated to the Academician of the Polish Academy of Sciences, Professor Janusz Kacprzyk in recognition of his pioneering work, the book reports on theories, methods and new challenges in artificial intelligence, thus offering not only a timely reference guide but also a source of new ideas and inspirations for graduate students and researchers alike. The book consists of the 18 chapters, presented by distinguished and experienced authors from 16 different countries (Australia, Brazil, Canada, Chile, Germany, Hungary, Israel, Italy, China, R.N. Macedonia, Saudi Arabia, Spain, Turkey, United States, Ukraine, and Vietnam). All chapters are grouped into three parts: Computational Intelligence and Fuzzy Systems, Artificial Intelligence Techniques in Modelling and Optimization, and Computational Intelligence in Control and Decision Support Processes. The book reflects recent developments and new directions in artificial intelligence, including computation method of the interval hull to solutions of interval and fuzzy interval linear systems, fuzzy-Petri-networks in supervisory control of Markov processes in robotic systems, fuzzy approaches for linguistic data summaries, first-approximation analysis for choosing fuzzy or neural systems and type-1 or type-2 fuzzy sets, matrix resolving functions in game dynamic problems, evolving stacking neuro-fuzzy probabilistic networks and their combined learning in online pattern recognition tasks, structural optimization of fuzzy control and decision-making systems, neural and granular fuzzy adaptive modeling, state and action abstraction for search and reinforcement learning algorithms. Among the most successful and perspective implementations in practical areas of human activity are tentative algorithms for neurological disorders, human-centric question-answering system, OWA operators in pensions, evaluation of the perception of public safety through fuzzy and multi-criteria approach, a multicriteria hierarchical approach to investment location choice, intelligent traffic signal control

and generative adversarial networks in cybersecurity.

State Aid Law and Business Taxation Isabelle Richelle, Wolfgang Schön, Edoardo Traversa, 2016-10-18 This book is a compilation of contributions exploring the impact of the European Treaty provisions regarding state aid on Member States' legislation and administrative practice in the area of business taxation. Starting from a detailed analysis of the European Courts' jurisprudence on Art.107 TFEU the authors lay out fundamental issues – e.g. on legal concepts like “advantage”, “selectivity” and “discrimination” – and explore current problems – in particular policy and practice regarding “harmful” tax competition within the European Union. This includes the Member States' Code of Conduct on business taxation, the limits to anti-avoidance legislation and the options for legislation on patent boxes. The European Commission's recent findings on preferential “rulings” are discussed as well as the general relationship between international tax law, transfer pricing standards and the European prohibition on selective fiscal aids.

Creative Approaches to Technology-Enhanced Learning for the Workplace and Higher Education David Guralnick, Michael E. Auer, Antonella Poce, 2023-09-23 New technologies provide us with new opportunities to create new learning experiences, leveraging research from a variety of disciplines along with imagination and creativity. The Learning Ideas Conference was created to bring researchers, practitioners, and others together to discuss, innovate, and create. The Learning Ideas Conference 2023 was the 16th annual conference and was held as a hybrid event. The conference took place from June 14-16, 2023., both in New York and online, and included a special track: The ALICE (Adaptive Learning via Interactive, Collaborative and Emotional Approaches) Special Track. Topics covered in this book include among others: online learning methodologies, diversity and inclusion in learning, case studies in university and corporate settings, new technologies in learning (such as virtual reality, augmented reality, holograms, and artificial intelligence), adaptive learning, and project-based learning. The papers included in this book are of interest to researchers in pedagogy and learning theory, university faculty members and administrators, learning and development specialists, user experience designers, and others.

Britannica Book of the Year 2011 Encyclopaedia Britannica, Inc.,2011-03-01 The Britannica Book for the Year 2011 provides a valuable viewpoint on the people and events that shaped the year. In addition to keeping the Encyclopaedia Britannica updated, it serves as a great reference source for the latest news on the ever-changing populations, governments, and economies throughout the world.

Rice Literature Update ,1989

Transforming African Food Systems Claire Helen Quinn,Andrew John Dougill,Julian Douglas May,2025-10-24
Overcoming Africa's development challenges cannot be uncoupled from the need to transform the continent's food systems. One in four people in sub-Saharan Africa faces food insecurity, and Africa will need to produce 80% more food by 2050. The challenge is complicated by the interrelationship between agriculture and environmental sustainability. In addition, agriculture also remains one of the most effective pathways out of poverty on the continent. As agriculture both contributes to, and is affected by, climate change, there is a pressing need for innovation in climate-smart agriculture that considers the environment as integral to the food system. However, access to nutritious, safe food and improved livelihoods does not solely depend on boosting agricultural productivity. Food systems encompass the activities and actors involved in all aspects of the food supply chain, from production through to consumption and disposal of food. A food systems research approach recognises the importance of interactions and relationships between activities/actors and thus the importance of interdisciplinary approaches for achieving transformative change. The concerted and coordinated actions of the food industry (agriculture, production and processing, retail, food service sector, and waste disposal) and consumers are crucial to promote sustainable consumption and production, with a focus on reducing all forms of food losses throughout the entire supply chain. Food systems transformation needs to focus not just on increasing production, but on access to food and markets, nutrition diversity and security, climate resilience, and adaptation of both agro-ecological systems and the food system more broadly. This Research Topic focuses specifically on transformation of African food systems. While comprising many similar activities/actors to other food systems, African food systems also have activities, actors, and conditions that are specific to the African context. These contextual factors include: a shared history of colonisation that creates specific historical, demographic, political, and socio-cultural drivers of change; value chains that are often short and reliant on informal exchange and small-scale operations; distinct territorial imbalances that create significant inequalities; and normative and cognitive institutions that create diverse cultural beliefs and values while influencing the roles of women and youth in food systems. We welcome submission of original research articles, case studies, systematic reviews or meta-analysis that offer new insights and perspectives on African food systems transformation. This topic will bring together interdisciplinary research and practice and provide a platform for knowledge exchange, collaboration, and collective action

for transforming African food systems so that they are equitable, resilient, and sustainable.

Annual Review of Political Science ,2002 The mission of Annual review of political science is to provide systematic, periodic examinations of the field through critical authoritative reviews. The comprehensive critical review not only summarizes a topic but also roots out errors of fact or concept and provokes discussion that will lead to new research activity. Each review contains title, author(s), key words, abstracts, review and bibliography.
