**A People's Church** Agostino Paravicini Bagliani, Neslihan Şenocak, 2023-06-15 A People's Church brings together a distinguished international group of historians to provide a sweeping introduction to Christian religious life and institutions in medieval Italy. Each essay treats a single theme as broadly as possible, highlighting both the unique aspects of medieval Christianity on the Italian peninsula and the beliefs and practices it shared with other Christian societies. Because of its long tradition of communal self-governance, Christianity in medieval Italy, perhaps more than anywhere else, was truly a people's church. At the same time, its exceptional urban wealth and literacy rates, along with its rich and varied intellectual and artistic culture, led to diverse forms of religious devotion and institutions. Contributors: Maria Pia Alberzoni on heresy; Frances Andrews on urban religion; Cécile Caby on monasticism; Giovanna Casagrande on mendicants; George Dameron on Florence; Antonella Degl'Innocenti on saints; Marina Gazzini on lay confraternities; Maureen C. Miller on bishops; Agostino Paravicini Bagliani and Pietro Silanos on the papacy and Italian politics; Antonio Rigon on clerical confraternities; Neslihan Şenocak on the pievi and care of souls; Giovanni Vitolo on Naples.

Themes in Old World Zooarchaeology Umberto Albarella,Cleia Detry,Sónia Gabriel,Catarina Ginja,Ana Elisabete Pires,2021-04-28 This new collection of papers from leading experts provides an overview of cutting-edge research in Old World zooarchaeology. The research presented here spans various areas across Europe, Western Asia and North Africa – from the Mediterranean to the Atlantic. Several chapters focus on Iberia, but the eastern Mediterranean and Britain are also featured. Thematically, the book covers many of the research areas where zooarchaeology can provide a significant contribution. These include animal domestication, bone modifications, fishing, fowling, economic and social status, as well as adaptation and improvement. The investigation of these topics is carried out using a diversity of approaches, thus making the book also a useful compendium of traditional as well as more recently developed methodological applications. All contributions aim to present zooarchaeology as a discipline that studies animals to understand people, and their richly diversified past histories. This will be a valuable source of information not just for specialists, but also for general archaeologists and, potentially, also historians, palaeontologists and geographers, who have an interest for the research themes discussed in the book. The book is dedicated to Simon Davis, who has been a genuine pioneer in the development of modern zooarchaeology. It presents hugely stimulating case studies from the core areas where Davis has worked in the course of his career.

1416: Savoie Bonnes Nouvelles. Gustavo Mola di Nomaglio,2022-06-25 I Savoia, principi e vicari perpetui del Sacro Romano Impero sin dal remoto medioevo (quando erano potenti non solo nei propri Stati ma anche in altri ampi contesti europei), non si curarono mai dei titoli con i quali regnavano sui propri principali domini, essenzialmente interessati e attenti alla concretezza dei loro poteri e della loro effettiva indipendenza. Per questo l'assunzione del titolo ducale sulla Savoia per concessione imperiale, nel 1416 fu da molti studiosi considerata come una sorta di "promozione". In realtà i Savoia erano già duchi Chiabrese e sulla Valle d'Aosta, domini eretti in ducato sin dal 1238 e il titolo di duchi di Savoia, pur meritando di essere celebrato al traguardo sei volte secolare, non rappresenta una "crescita" dinastica nelle gerarchie dei poteri europei, se non su un piano essenzialmente "simbolico". Esso ebbe, in ogni caso, indubbia rilevanza geopolitica, divenendo l'occasione per riunire sotto la sola denominazione "Savoia" numerosi territori e onorifica in tempi in cui certi aspetti formali tendevano ad assumere una rilevanza pari o superiore a quella sostanziale. Perciò esso fu ricordato a Torino nel 2016 in un grande convegno internazionale. In questi volumi sono raccolti gli studi multidisciplinari presentati in questa occasione e alcuni altri che si sono successivamente aggiunti.

The Eye of the Lynx David Freedberg,2003-08-01 Some years ago, David Freedberg opened a dusty cupboard at Windsor Castle and discovered hundreds of vividly colored, masterfully precise drawings of all sorts of plants and animals from the Old and New Worlds. Coming upon thousands more drawings like them across Europe, Freedberg finally traced them all back to a little-known scientific organization from seventeenth-century Italy called the Academy of Linceans (or Lynxes). Founded by Prince Federico Cesi in 1603, the Linceans took as their task nothing less than the documentation and classification of all of nature in pictorial form. In this first book-length study of the Linceans to appear in English, Freedberg focuses especially on their unprecedented use of drawings based on microscopic observation and other new techniques of visualization. Where previous thinkers had classified objects based mainly on similarities of external appearance, the Linceans instead turned increasingly to sectioning, dissection, and observation of internal structures. They applied their new research techniques to an incredible variety of subjects, from the objects in the heavens studied by their most famous (and infamous) member Galileo Galilei—whom they supported at the most critical moments of his career—to the flora and fauna of Mexico, bees, fossils, and the reproduction of plants and fungi. But by demonstrating the inadequacy of surface structures for ordering the world, the Linceans unwittingly planted the seeds for the demise of their own favorite method—visual description—as a mode of scientific classification. Profusely illustrated and engagingly written, *Eye of the Lynx* uncovers a crucial episode in the development of visual representation and natural history. And perhaps as important, it offers readers a dazzling array of early modern drawings, from magnificently depicted birds and flowers to frogs in amber, monstrously misshapen citrus fruits, and more.
