**Tasmania** William Edwin Davis,2007 Davis, Jr. (emeritus. Boston U.) has written what has been called the first general natural history written on Tasmania in nearly 100 years. The island, located off the southern tip of Australia, offers a mild climate, lush vegetation, and unusual wildlife, such as its signature Tasmanian Devil. An ornithologist, Davis traveled to the island seven times in preparation for writing this book. The book is illustrated and includes an appendix with a listing of Tasmania's flora and fauna.

**Where Song Began** Tim Low,2016-09-27 An authoritative and entertaining exploration of Australia's distinctive birds and their unheralded role in global evolution Renowned for its gallery of unusual mammals, Australia is also a land of extraordinary birds. But unlike the mammals, the birds of Australia flew beyond the continent's boundaries and around the globe many millions of years ago. This eye-opening book tells the dynamic but little-known story of how Australia provided the world with songbirds and parrots, among other bird groups, why Australian birds wield surprising ecological power, how Australia became a major evolutionary center, and why scientific biases have hindered recognition of these discoveries. From violent, swooping magpies to tool-making cockatoos, Australia's birds are strikingly different from birds of other lands—often more intelligent and aggressive, often larger and longer-lived. Tim Low, a renowned biologist with a rare storytelling gift, here presents the amazing evolutionary history of Australia's birds. The story of the birds, it turns out, is inseparable from the story of the continent itself and also the people who inhabit it.

The database provides a collection of references from over 4,500 international serial publications, plus books, meetings, reviews and other no- serial literature from over 100 countries. It is the oldest continuing database of animal biology, indexing literature published from 1864 to the present. Zoological Record has long been recognized as the unofficial register for taxonomy and systematics, but other topics in animal biology are also covered.

**The Times Atlas of World History** Geoffrey Barraclough,1997 Originally published in 1982, this atlas of world history - like its parent volume, 'The Times' Atlas of World History - combines original maps with text, and offers a comprehensive view of the story of humanity. From the emergence of the first hominids five million years ago to the collapse of the Soviet Union, the full sweep of human history is covered. This atlas makes a companion for anyone who seeks to understand the past, and is useful as a reference for all who study and enjoy history.

**Accidental Death?** Robin Bowles,2018-05-14 This collection of stories centres on the idea of 'accidental death', and the upheaval caused in the lives of those who lose a loved one in this way. Several of the cases examined here turned out, on investigation, not to be accidents at all. Some were crimes. Some remain unexplained; others were shown to be just what they appeared to be. What connects them is what happens to those involved: suddenly, grieving people are thrown into the spotlight. There is no privacy and nowhere to hide. Like it or not, and often through no fault of their own, these people become part of an investigation, subject to the scrutiny of police, media, the courts, and the court of public opinion. Featuring a range of meticulously researched cases — from the tragic story of Akon Guode, jailed in 2017 for driving her children into a lake, to the accidental death of cricketer Phillip Hughes — ‘Australia’s true crime queen’ delves deep into the criminal justice system. With Bowles’s trademark compassion and forensic attention to detail, *Accidental Death?* explores the reality of ordinary people who find themselves in extraordinary situations when an unforeseen event upends their lives.
