Sport Competition Anxiety Test Rainer Martens,1976

Competitive Anxiety in Sport Rainer Martens, Robin S. Vealey, Damon Burton, 1990 A comprehensive review of competitive anxiety research that has used the Sport Competition Anxiety Test, or SCAT (a trait scale), and the Competitive State Anxiety Inventory-2 (CSAI-2), as well as a description of the theoretical basis and development procedures for each scale. The actual scales for both SCAT and the CSAI-2 are contained in the text. Acidic paper. Annotation copyrighted by Book News, Inc., Portland, OR

Handbook of Social and Evaluation Anxiety H. Leitenberg, 2013-11-11 For a long time I have wanted to put together a book about social and evaluation anxiety. Social-evaluation anxiety seemed to be a stressful part of so many people's everyday experience. It also seemed to be apart of so many of the clinical problems that I worked with. Common terms that fit under this rubric include fears of rejection, humiliation, criticism, embarrassment, ridicule, failure, and abandonment. Examples of social and evaluation anxiety include shyness; social inhibition; social timidity; public speaking anxiety; feelings of self-consciousness and awkwardness in social situations; test anxiety; performance anxiety in sports, theater, dance, or music; shame; guilt; separation anxiety; social withdrawal; procrastination; and fear of job interviews or job evaluations, of asking someone out, of not making a good impression, or of appearing stupid, foolish, or physically unattractive. In its extreme form, social anxiety is a behavior disorder in its own right social phobia. This involves not only feelings of anxiety but also avoidance and withdrawal from social situations in which scrutiny and negative evaluation are anticipated. Social-evaluation anxiety also plays a role in other clinical disorders. For example, people with agoraphobia are afraid of having a panic attack in public in

part because they fear making a spectacle of themselves. Moreover, even their dominant terrors of going crazy or having a heart attack seem to reflect a central concern with social abandonment and isolation.

A Critical Introduction to Sport Psychology Aidan Moran, John Toner, 2025-09-24 This new fourth edition remains the only textbook in the field which provides a detailed overview of key theories, concepts and findings within the discipline of sport psychology, as well as a critical perspective that examines and challenges these core foundations. Fully revised and updated, the new edition covers topics affecting both participation and performance in sport, including motivation, anxiety, emotional coping, concentration, mental imagery, expertise, and team cohesion. In addition, the book includes a range of helpful features that bring the science to life, including critical thinking exercises, suggestions for student projects, boxes highlighting key advances in theory or practice, and end-of-chapter summaries. The final chapter examines some new horizons in sport psychology, including embodied cognition, and a comprehensive glossary is also included. Sport is played with the body but often won in the mind; that is the theory. **A Critical Introduction to Sport Psychology** is the definitive textbook for anyone wishing to engage critically with this fascinating idea.
