Summary: How to Succeed in Business Without Working So Damn Hard BusinessNews Publishing, 2013-02-15 The must-read summary of Robert Kriegel's book: *How to Succeed in Business Without Working So Damn Hard: Rethinking the Rules, Reinventing the Game*. This complete summary of the ideas from Robert Kriegel's book *How to Succeed in Business Without Working So Damn Hard* shows that it's possible to be more productive, create more profit and be happier by working less hours, but in a more direct way. This summary takes this principle and splits it into two guidelines: don't conform, but rethink the way you work, and don't compete against others. It also breaks down these principles into measures that every businessperson can apply. Exploit your strengths, for example, rather than trying to solve your weaknesses; make a serious effort to halve your number of meetings; look at business ideas outside of your industry, and think how they could be applied. In short, look carefully at your market's assumptions, and your personal ones, and challenge whether they are effective, could be done more quickly or need to be done at all. Added-value of this summary: • Save time • Understand the key concepts • Increase your business knowledge To learn more, read *How to Succeed in Business Without Working So Damn Hard* and discover how to work better, not harder.

Eurasia at the Dawn of History Manuel Fernández-Götz, Dirk Krausse, 2017-01-16 Our current world is characterized by life in cities, the existence of social inequalities, and increasing individualization. When and how did these phenomena arise? What was the social and economic background for the development of hierarchies and the first cities? The authors of this volume analyze the processes of centralization, cultural interaction, and social differentiation that led to the development of the first urban centres and early state formations of ancient Eurasia, from the Atlantic coasts to China. The chronological framework spans a period from the Neolithic to the Late Iron Age, with a special focus on the early first millennium BC. By adopting an interdisciplinary approach structured around the concepts of identity and materiality, this book addresses the appearance of a range of key phenomena that continue to shape our world.

Memory Work of English History in Periods, with Numerous Notes and Maps Thomas HAUGHTON (of the Blue Coat Hospital, Liverpool.), 1875

Caryl Phillips, David Dabydeen and Fred D'Aguiar Abigail Ward, 2013-07-19 Slavery is a recurring subject in works by the contemporary black writers in Britain Caryl Phillips, David Dabydeen and Fred D'Aguiar, yet their return to this past arises from an urgent need to understand the racial anxieties of twentieth- and twenty-first-century Britain. This book examines the ways in which their literary explorations of slavery may shed light on current issues in Britain today, or what might be thought of as the continuing legacies of the UK's largely forgotten slave past. In this highly original study of contemporary postcolonial literature, Abigail Ward explores a range of novels, poetry and non-fictional works by these authors in order to investigate their creative responses to the slave past. This is the first study to focus exclusively on British literary representations of slavery, and thoughtfully engages with such notions as the ethics of exploring slavery, the memory and trauma of this past, and the problems of taking a purely historical approach to Britain's involvement in slavery or Indian indenture. Although all three authors are concerned with the problem of how to commence representing slavery, their approaches to this problem vary immensely, and this book investigates these differences.

Neuropsychological Assessment Muriel Deutsch Lezak, 1995-03-02 The 12 chapters in the second section contain nearly all of the tests and assessment techniques covered in the previous editions plus many additional ones, including newly developed neuropsychological tests, tests from other branches of psychology, research techniques that have only recently been introduced into clinical neuropsychology, tests originating in Europe and elsewhere, and a few measures - as yet untried by neuropsychology - that appear to be potentially useful for neuropsychological purposes. Thus, the third edition of Neuropsychological Assessment maintains its multipurpose functions as an authoritative textbook, reference work, and practitioner's manual.
