The Eyes Have It Evan Marshall, 2003 There is no better way to read behavior and the human personality than by observing the human eye. For centuries, people have studied eye language to discover hidden motivations and personality traits (lie-detector tests now use movement of the eyes as a detection of guilt). The movement and characteristics of the eye play a crucial role in successes in love, career, and every aspect of life. Now, readers can master this important part of nonverbal communication with *The Eyes Have It*. Individual chapters explore loving and lying eyes, the etiquette of staring, the evil eye, pupillometry, iridology, trends in eye adornment, and the vital blink. Also included are surprising analyses of some of the world's most famous eyes. In this enlightening guide to understanding one of the world's most subtle and effective forms of language, *The Eyes Have It* reveals fascinating tips such as: -- A drooping eyelid signifies a person with sex appeal, preoccupied with the chase, but who is apt to be cold-hearted - Long thin eyebrows denote the superior intellect of an artist or scholar -- A large iris indicates an affectionate and family-oriented person -- The green-eyed person possesses creativity and originality, and is believed to be the happiest of the color-groups

We don't need any encounters with the police, so let us just eat and call it a night. A little later that same night, deep into outer space, the wise Lesserr was convincing a host of 199 extraterrestrials that humanity on planet Earth had considerable value. The Lesserr said with a stoic stare, This cannot be denied. It is true to the uttermost that the bodies of man and womankind are very suitable vessels and make for perfect hiding spaces. The 199 asked in fragmented voices, How true. How can this be denied? The wise Lesserr whispered, Even
