Latin America's Global Border System Beatriz Zepeda, Fernando Carrión Mena, Francisco Enríquez

Bermeo, 2022-05-05 Latin America's Global Border System is the opening volume in the first collection of academic works devoted exclusively to borders and illegal markets in Latin America. This volume features expert discussions on border issues of Argentina, Brazil, Bolivia, Ecuador, Guatemala, Italy, Mexico and Peru, as well as studies on illegal markets, cities, and gender as a first step to understanding the intricacies of the global border system of illegal markets and Latin America's role in it. The book constitutes a valuable source of information on the geographic, economic, demographic, and social characteristics of the most important Latin American border regions, and their relation to global illegal markets, while also offering valuable insights into the ways illegal markets are organized in each country and how they connect across borders to create the global border system. This book will not only be a valuable resource for academics and students of international relations, security studies, border studies and contemporary Latin America, but will also prove relevant to national and international policy-makers devoted to foreign, security and development policies.

Sustainable Macroeconomics, Climate Risks and Energy Transitions Unurjargal Nyambuu, Willi

Semmler, 2023-05-30 Given the industrialized world's historical dependence on fossil fuel-based energy resources and the now-realized perils of moving beyond the earth's carbon budget, this book explores the myriad challenges of climate change and in reaching a low-carbon economy. Reconciling the medium-term competing, yet frequently complementary, needs for transition policies, the book provides guidelines for complex and often conflicting climate policy tasks. The book presents empirical trends in the use of carbon-emitting resources and evaluates market-driven short-termism and its adverse impact on resource use and the environment; it emphasizes a medium-term macroeconomic perspective for the transition. The authors attempt a paradigm shift towards a framework of sustainable macroeconomics. They survey relevant historical models, conduct empirical and numerical analyses of the climate change-relevant dynamic models, provide empirical illustrations, and evaluate diverse policy options and implementations together with their historical evolution. New analytical issues are also considered, e.g., strategic behavior in the energy and resource sectors, energy competition and the dynamics of market shares in new energy technology, and supporting policies for dealing with the tipping points encountered in climate change. The authors suggest a multitude of market-based strategies and public fiscal, monetary, and financial

policies, and longer-run planning for resource extraction -all suitable for driving sustainable growth and a transformation of the energy sector. The book also examines the multiple delaying forces slowing the transition to a low-carbon economy; these typically arise from short-termism, lock-ins, irreversibility, leakages, non-cooperative games, and other political strategies. Thus, they explain the snail's pace evolution of current national and global climate policies. The book will appeal to scholars and students of economics and environmental science. It is also relevant for policymakers and practitioners in multilateral institutions, research institutions as well as governments and ministries of countries interested in alternative energy sources, climate economists, and those who study the implementation of sustainable and low carbon-based policies.

Introduction to Global Politics Richard W. Mansbach, Ellen B Pirro, 2017-11-10 The fully updated third edition of Introduction to Global Politics continues to provide a vital resource for students looking to explain global politics using an historical approach, firmly linking history with the events of today. By integrating theory and political practice at individual, state, and global levels, students are introduced to key developments in global politics, helping them make sense of major trends that are shaping our world. Retaining the successful format of previous editions, this is a highly illustrated textbook with informative and interactive boxed material throughout. Chapter opening timelines contextualize the material that follows, and definitions of key terms are provided in a glossary at the end of the book. Every chapter ends with student activities, cultural materials, and annotated suggestions for further reading. Key updates for this edition: New material on key topical issues such as Islam's relationship with the West, Islamic State, BRICS and other emerging economies, the continuing effects of the Arab Spring, and R2P. Coverage of the 2015 Iran nuclear deal and North Korea's continued development of its nuclear weapons and missile programs. Analysis of new technologies for warfighting - such as drones, IEDs and cyber technologies - as well as technologies for countering terrorism and conducting unconventional wars. Updated examples from around the globe in every chapter. Stimulating and provocative both for students and for instructors, Introduction to Global Politics, 3rd Edition, is essential reading for students of political science, global politics, and international relations.

The Globalization Myth Shannon K. O'Neil, 2022-10-18 A case for why regionalization, not globalization, has been the biggest economic trend of the past forty years The conventional wisdom about globalization is wrong. Over the past forty years as companies, money, ideas, and people went abroad more often than not, they looked regional rather than globally. O'Neil details this transformation and the rise of three major regional hubs in Asia, Europe, and North America. Current technological, demographic, and geopolitical trends look only to deepen these regional ties. O'Neil argues that this has urgent implications for the United States. Regionalization has enhanced economic competitiveness and prosperity in Europe and Asia. It could do the same for the United States, if only it would embrace its neighbors.

Routledge Companion to Media and Humanitarian Action Robin Andersen, Purnaka L. de Silva, 2017-09-14 In this

moment of unprecedented humanitarian crises, the representations of global disasters are increasingly common media themes around the world. The Routledge Companion to Media and Humanitarian Action explores the interconnections between media, old and new, and the humanitarian challenges that have come to define the twenty-first century. Contributors, including media professionals and experts in humanitarian affairs, grapple with what kinds of media language, discourse, terms, and campaigns can offer enough context and background knowledge to nurture informed global citizens. Case studies of media practices, content analysis and evaluation of media coverage, and representations of humanitarian emergencies and affairs offer further insight into the ways in which strategic communications are designed and implemented in field of humanitarian action.

Senseless Violence and Its Ramifications Ami Rokach, 2018-10-22 The baby boomer generation grew up in the 1950s when there existed the general belief that the Cold War was the greatest threat to the world order, and a frightening possibility. It was difficult to believe, then, that it could get worse, but the same threat of violence is now a daily occurrence around the globe. People are being shot, slaughtered, maimed, and disappear for a multitude of reasons, none having any connection, most of the time, with the victims. The scale of loss when these tragedies occur is devastating, leaving the public as well as policy makers and legislators scrambling for solutions, clarification, and understanding of how we have become a society where violence is so rampant, so frequent, and so senseless. This book includes contributions by leading experts on violence and its ramifications, who review the devastation, reasons, and consequences of violence which is senseless, cruel, and aims to hurt and destroy anyone in its path. This book was originally published as a special issue of The Journal of Psychology.

The Educational Success of Homeless Youth in California Patricia F. Julianelle, 2007 The California Research Bureau (CRB), in participation with the California Council on Youth Relations (CCYR), and with support from The California Wellness Foundation, has been conducting a major research and policy initiative to bring attention to the issues facing homeless youth in California. These include lack of shelter and educational opportunities, health and mental health needs, and problematic interaction with law enforcement agencies and the courts. This report represents one of the research components of this project. Homelessness places youth at extreme risk of victimization and violence. Youth living in public places are often victims of physical and sexual assaults and robberies. Some youth are forced to engage in survival sex in exchange for shelter, food, or money. Crowded living situations and exposure to the elements lead to higher rates of illness, and the mental and emotional stress of homelessness leads to increased risks of substance abuse, depression, and even suicide. Given this context, school can be an oasis for homeless youth, where they can find security and support and obtain the skills they need to survive safely on their own. Yet, three-fourths of California homeless youth surveyed by the CRB were not in school. Most of the 54 youth surveyed were between 17 and 24, yet very few (six) had graduated from high school or attained a GED.

This data is consistent with national surveys of homeless youth on their own. At the same time, a majority of California youth surveyed expressed the desire to return to school and had life goals (such as becoming a teacher or social worker or working in the medical field) that require extensive education to achieve. This report discusses seven key issues related to challenges homeless youth face in achieving their educational goals. It also presents policy options that address these challenges. A list of resources is included. Appended are: (1) Education Contacts for Homeless Children and Youth; and (2) Education Funding for Homeless Children and Youth. (Contains 112 endnotes.).

Social Work Brenda DuBois,Karla Krogsrud Miley,2002 This introductory textbook distinguishes itself from others, because it takes a discipline approach rather than a social problems approach to framing the foundations of social work knowledge, values, and skills. This is a revision of the very first text to fully incorporate the strengths or empowerment

perspective. The text takes a strong generalist eco-systems approach, while integrating material from the CSWE education core: values and ethics, cultural diversity, social justice, social work practice, human behavior, populations at risk, and policy and services. The text details the roles of the social worker in the functions of consultation, resource management, and education, and presents an easy-to-understand paradigm that shows students how the partnership between practitioners and consumers takes place at all systems levels.
