Sociology: A Down to Earth Approach James M Henslin,Adam M Possamai,Alphia L Possamai-Inesedy,Tim Marjoribanks,Katriona Elder,2015-05-20 James Henslin has always been able to share the excitement of sociology, with his acclaimed down-to-earth approach and personal writing style that highlight the sociology of everyday life and its relevance to students' lives. Adapted for students studying within Australia, this text, now in a second edition, has been made even more relevant and engaging to students. With wit, personal reflection, and illuminating examples, the local author team share their passion for sociology, promote sociology to students and entice them to delve deeper into this exciting science. Six central themes run throughout this text: down-to-earth sociology, globalisation, cultural diversity, critical thinking, the new technology, and the growing influence of the mass media on our lives. These themes are especially useful for introducing the

controversial topics that make studying sociology such a lively, exciting activity.

Discovering Sociology Mark McCormack, Eric Anderson, Kimberly Jamie, Matthew David, 2021-02-14 This second edition of a major textbook uses lively prose and a series of carefully-crafted pedagogical features to both introduce sociology as a discipline and to help students realize how deeply sociological issues impact on their own lives. Over the book's 12 chapters, students discover what sociology is, alongside its historical development and emergent new concerns. They will be led through the theories that underpin the discipline and familiarized with what it takes to undertake good sociological research. Ultimately students will be led and inspired to develop their own sociological imagination - learning to question their own assumptions about the society, the culture and the world around them today. Historically, the majority of introductory sociology textbooks have run to many hundreds of pages, discouraging students from further reading. By contrast, Discovering Sociology has been carefully designed and developed as a true introduction, covering the key ideas and topics that first year undergraduate students need to engage with without sacrificing intellectual rigour. New to this Edition: - Two new chapters adding coverage on crime, deviance and political sociology - Updated examples, Vox Pops and case studies keep this new edition feeling fresh and contemporary and ensure diverse coverage, including from beyond Western sociology - Thoughtfully updated and refreshed layout and visual features. Accompanying online resources for this title can be found at bloomsburyonlineresources.com/discovering-sociology-2e. These resources are designed to support teaching and learning when using this textbook and are available at no extra cost.

Civic Engagement in Food System Governance Alan R. Hunt, 2015-10-05 The local food movement is one of the most active of current civil engagement social movements. This work presents primary evidence from over 900 documents,

interviews, and participant observations, and provides the first descriptive history of local food movement national policy achievements in the US, from 1976 to 2013, and in the UK, from 1991 to 2013, together with reviews of both the American and British local food movements. It provides a US-UK comparative context, significantly updating earlier comparisons of American, British and European farm and rural policies. The comparative perspective shows that, over time, more effective strategies for national policy change required social-movement building strategies, such as collaborative policy coalitions, capacity-building for smaller organizations, and policy entrepreneurship for joining together separate rural, farming, food, and health interests. In contrast, narrowly-defined single issue campaigns often undermined long-term policy change, even if short-term wins emerged. By profiling interviews of American and English movement leaders, policymakers, and funders, the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences.
