Designed as a self-study book, it will enable learners to select and study at their own speed those grammar points which they find confusing and want to clarify. All the traditional grammar problems which intermediate students encounter e.g. tenses, modals, prepositions etc., are thoroughly covered. The page layout of each unit makes for ease of use, with the grammar point explained on the left-hand page and exercises to practise it on the right-hand page. There are 130 units in all, and a contents list and detailed index ensure that students can easily find the units they need.

Perspectives on Language Learning Materials Development Freda Mishan, Angela Chambers, 2010 Language learning materials development remains a surprisingly under-supported aspect of language teaching. This book constitutes a much-needed resource in the area, aiming to support and advance the craft of materials design. The volume offers a snapshot of

the contemporary influences on language learning materials development from diverse perspectives around the globe. These influences include the demands of teaching ESOL in Britain and Ireland, the impact of Corpus Linguistics, the needs of young learners and of diverse worldwide audiences, the development of intercultural competence, as well as the integration of L2 acquisition research. Contributors to the volume are drawn from a broad range of teaching, research and materials development backgrounds. The book includes some chapters based on papers given at the MATSDA (Materials Development Association) 2008 conference.

**Handbook of Research in Second Language Teaching and Learning** Eli Hinkel, 2016-11-18 Volume III of the *Handbook of Research in Second Language Teaching and Learning*, like Volumes I and II, is a comprehensive, state-of-the-art overview of current research into social contexts of second language (L2)/foreign language (FL) teaching and learning; language policy; curriculum; types of instruction; incremental language skills such as listening, speaking, reading, writing, vocabulary, and grammar; international communication; pragmatics; assessment and testing. It differs from earlier volumes in its main purpose—to provide a more in-depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar, and writing. Volume III preserves continuity with previous volumes in its coverage of all the classical areas of research in L2/FL teaching and learning and applied linguistics, but rather than offering a historical review of disciplinary traditions, it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning the essential language abilities, and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas. What's new in Volume III? Updates the prominent areas of research, including the sub-disciplines addressed in Volumes I and II, and represents the disciplinary mainstays. Considers and discusses perspectives held by different schools of thought on the what, the how, and the why of teaching foundational language skills, including theories, pedagogical principles, and their implementation in practice. Captures new and ongoing developments and trends in the key areas of L2/FL teaching and learning, and innovative research topics that have gained substantial recognition in current publications, including the role of corpora, technology, and digital literacy in L2/FL teaching and learning. Examines new trends in language pedagogy and research, such as an increased societal emphasis on teaching academic language for schooling, somewhat contradictory definitions of literacy, and the growing needs for instruction in intercultural communication.
