Learning Go Jon Bodner,2024-01-10 Go has rapidly become the preferred language for building web services. Plenty of tutorials are available to teach Go's syntax to developers with experience in other programming languages, but tutorials aren't enough. They don't teach Go's idioms, so developers end up recreating patterns that don't make sense in a Go context. This practical guide provides the essential background you need to write clear and idiomatic Go. No matter your level of experience, you'll learn how to think like a Go developer. Author Jon Bodner introduces the design patterns experienced Go developers have adopted and explores the rationale for using them. This updated edition also shows you how Go's generics support fits into the language. This book helps you: Write idiomatic code in Go and design a Go project Understand the reasons behind Go's design decisions Set up a Go development environment for a solo developer or team Learn how and when to use reflection, unsafe, and cgo Discover how Go's features allow the language to run efficiently Know which Go features you should use sparingly or not at all Use Go's tools to improve performance, optimize memory usage, and reduce garbage collection Learn how to use Go's advanced development tools

Revised and updated, this second edition contains eight new articles on key subjects, including speech communities, the power and performance of language, and narratives. Translation as Reparation Paul Bandia, 2014-06-03 *Translation as Reparation* showcases postcolonial Africa by offering African European-language literature as a case study for postcolonial translation theory, and proposes a new perspective for postcolonial literary criticism informed by theories of translation. The book focuses on translingualism and interculturality in African Europhone literature, highlighting the role of oral culture and artistry in the writing of fiction. The fictionalizing of African orature in postcolonial literature is viewed in terms of translation and an intercultural writing practice which challenge the canons of colonial linguistic propriety through the subversion of social and linguistic conventions. The study opens up pathways for developing new insights into the ethics of translation, as it raises issues related to the politics of language, ideology, identity, accented writing and translation. It confirms the place of translation theory in literary criticism and affirms the importance of translation in the circulation of texts, particularly those from minority cultures, in the global marketplace. Grounded in a multidisciplinary approach, the book will be of interest to students and scholars in a variety of fields, including translation studies, African literature and culture, sociolinguistics and multilingualism, postcolonial and

intercultural studies.
