**Jean-Pierre Fontaine (auteur d'un guide de Paris.)**

Approaches to Private Participation in Water Services PPIAF.,2006 Annotation This informative toolkit provides options for the design of policies to facilitate the delivery of good quality water and sanitation services to the poor. It highlights the need for tariffs, investment, stakeholder consultation, and regulatory policies to address the affordability and sustainability of those services.

**On power system automation:** Christoph Brosinsky,2023-01-01 The ubiquitous digital transformation also influences power system operation. Emerging real-time applications in information (IT) and operational technology (OT) provide new opportunities to address the increasingly demanding power system operation imposed by the progressing energy transition. This IT/OT convergence is epitomised by the novel Digital Twin (DT) concept. By integrating sensor data into analytical models and aligning the model states with the observed system, a power system DT can be created. As a result, a validated high-fidelity model is derived, which can be applied within the next generation of energy management systems (EMS) to support power system operation. By providing a consistent and maintainable data model, the modular DT-centric EMS proposed in this work addresses several key requirements of modern EMS architectures. It increases the situation awareness in the control room, enables the implementation of model maintenance routines, and facilitates automation approaches, while raising the confidence into operational decisions deduced from the validated model. This gain in trust contributes to the digital transformation and enables a higher degree of power system automation. By considering operational planning and power system operation processes, a direct link to practice is ensured. The feasibility of the concept is examined by numerical case studies.

**Transport Strategies for Net-Zero Systems by Design** OECD,2021-11-08 Efforts that primarily focus on incremental change in systems that are unsustainable by design are one of the main barriers to scaling up climate action. This report applies the OECD well-being lens process to the transport sector.

**Good Governance and the Sustainable Development Goals in Southeast Asia** Rasyikah Md Khalid,Ainul Jaria Maidin,2022-06-09 This book discusses management and governance initiatives undertaken by agencies and stakeholders towards achieving the Sustainable Development Goals (SDGS) in the Southeast Asian region, specifically Malaysia, Indonesia, Thailand and Singapore. It highlights the theories, methodologies and action plans involved in implementing the goals in

these countries and the importance of developing a positive relationship between the public and government agencies. With contributors coming from a range of disciplines and backgrounds across the Association of Southeast Asian Nations (ASEAN) region, this edited collection provides a holistic quantitative and qualitative approach to achieving the SDGs. In order to realise these development objectives, it argues that a strong understanding of the basic principles of governance across all levels is required, supported by effective citizen participation and conflict resolution. It provides a detailed overview of the importance of governance at the country level, addressing the key elements of an integrated framework to support sustainable transitions. Regional case studies highlight processes and recommendations for improving governance and risk management and elevating citizen awareness and participation. Good Governance and the Sustainable Development Goals in Southeast Asia is a comprehensive and valuable companion for researchers, government agencies, and professionals with an interest in the SDGs in Southeast Asia and beyond.
