El violín del virtuoso (PDF) Nuria García Font, 2019-08-13 Crónica de los barrios sin luna es una saga de libros que cuenta la historia de Javi, Oona y Fabio, tres jóvenes que trabajan en uno de los departamentos más insólitos de la Policía, el C.N.C. (Casos No Clasificados). Como integrantes de este grupo, su trabajo será resolver aquellos casos que poseen alguna característica que los hace poco comunes. Fabio, Oona y Javi han sido invitados a la cena inaugural de las «Jornadas de las Artes» celebradas en la Universidad. Con motivo de las mismas, se ha organizado una exposición que recoge los instrumentos pertenecientes a algunos de los compositores más importantes de la historia. Como pieza central está Il Cannone, el violín predilecto de Niccolò Paganini. Durante el discurso ofrecido por el Rector, se produce un súbito apagón de las luces que genera el desasosiego de los asistentes. Finalmente, la situación parece restablecerse, pero algo ha cambiado. El preciado violín ha desaparecido de la vitrina que lo contenía y en su lugar hay una nota que contiene un extraño mensaje: «El maestro ha vuelto».

Mundo del trabajo en la marina mercante española (1834-1914), El Enric García Domingo, 2017-04-25 El sector marítimo fue uno de los campos donde la industrialización (entendida como un proceso de cambio en la organización de la producción, el trabajo y las relaciones laborales, más que como la adopción de una nueva tecnología basada en el vapor) tuvo un impacto más acusado. No solo económico y social, sino también de identidades y culturas sociolaborales. Este libro se centra en el itinerario que llevó a la marina mercante española de la vela al vapor, y lo hace desde el punto de vista de los marinos mercantes, para observar y explicar cómo este colectivo diverso y complejo se enfrentó y se adaptó a la industrialización. Las tripulaciones de los buques de altura vivieron en primera persona un cambio tecnológico que alteró formas de trabajo y de vida vigentes desde muchos siglos atrás. Para ello se hace necesario analizar con detalle todas las clases y categorías profesionales, desde la clases directoras (el capitán y los oficiales de cubierta y de máquinas) hasta las ejecutoras (los subalternos de cubierta y de máquinas), ya que todos compartieron en esencia los condicionantes del trabajo en la mar. Y entre todos ellos son los marineros quienes conforman el auténtico núcleo de la investigación, pues son los marineros quienes conforman el auténtico núcleo de la investigación, pues son ellos quienes estuvieron sujetos en mayor medida al reto de redefinir su papel a bordo cuando el elemento propulsor de los buques pasó de los palos y las velas a la máquina.

Gastronomy and Urban Space Andrzej Kowalczyk, Marta Derek, 2020-01-20 This book focuses on the relationship between gastronomy and urban space. It highlights the intrinsic role of eating establishments and the gastronomy industry for cities by assessing their huge impacts on urban changes and discussing some of the challenges posed by new developments. Written by authors with a background in geography, it starts by discussing theoretical aspects of studies on gastronomy in urban space to place the subject in the broader context of urban geography. Covering both changes and challenges in gastronomy in urban space, it presents a wide range of problems, which are described and analysed using various case studies from Europe and other parts of the world.

The Ambiguous Legacy of Socialist Modernist Architecture in Central and Eastern Europe Mariusz Sokołowicz, Aleksandra Nowakowska, Błażej Ciarkowski, 2023-04-28 This book examines the unique socialist-modernist architecture built in the twentieth century in Central and Eastern Europe as a source of heritage and of existing and potential value for the present and future generations. Due to the historical context in which it was created, such architecture remains ambiguous. On the one hand, the wider public associates it with the legacy of the unpleasant period of the real socialist economic regime. Yet, on the other hand, it is also a manifestation of social modernization and the promotion of a significant proportion of the population. This book focuses particularly on concrete heritage, a legacy of modernist architecture in Central and Eastern Europe, and it was this material that enabled their rebuilding after World War II and modernization during the following decades. The authors search for the value of modernist architecture and using case studies from Poland, Bulgaria, Northern Macedonia, Lithuania and Slovenia verify to what extent this heritage is embedded in the local socio-economic milieu and becomes a basis for creating new values. They argue that the challenge is to change the ways we think about heritage, from looking at it from the point of view of a single monument to thinking in terms of a place with its own character and identity that builds its relation to history and its embeddedness in the local space. Furthermore, they propose that the preservation of existing concrete structures and adapting them to modern needs is of great importance for sustainability. With increasing awareness of the issue of preserving post-war architectural heritage and the strategies of dissonant heritage management, this multidisciplinary study will be of interest to architecture historians, conservators, heritage economists, urban planners and architects.

Knowledge Management and Sustainability David Israel Contreras-Medina, Julia Pérez Bravo, Elia Socorro Díaz Nieto, 2021-12-29 Based on the importance of human beings as creators and managers of knowledge towards the achievement of sustainability in the current digital age, this book is an effort to present many studies taking individuals as centers of knowledge and starting points for environmental, social, and economic development. From various theoretical and

empirical studies developed by researchers from Mexico, Colombia, and Brazil, this book presents, in an ordered sequence, the individual as the creator of knowledge, the role of human beings as knowledge managers with and for sustainability, the opportunities for knowledge sharing in virtual research collaborations for sustainability, and the advantages and disadvantages with and for sustainability from a human-centered perspective in the digital era. Moreover, this text describes the antecedents of competitive advantage in a sustainable cooperative network, knowledge management in technology projects, an empirical study of knowledge management of tutorial intervention, a model of processes and knowledge management to increase competitiveness, the role of Information and Communication Technologies (ICT) for managing sustainable practices, finishing with knowledge management trends with and for sustainability, from a human-centered perspective in the digital era. Offering an innovative approach, this book seeks to expand the understanding of the theme of knowledge management and sustainability from the perspective of the human resource as a generator of knowledge. There is mounting focus on knowledge-intensive work and sustainable development in the corporate world. In light of these trends, this edited volume will be of value to researchers, academics, professionals, and advanced students in the fields of management, environment and sustainability, and development studies.

Structural Studies, Repairs and Maintenance of Heritage Architecture XV C.A. Brebbia, V. Echarri, 2017-08-15 Comprising papers presented at the 15th International Conference on Studies, Repairs and Maintenance of Heritage Architecture this volume brings together global contributions from scientists, architects, engineers and restoration experts dealing with different aspects of heritage buildings, including the preservation of architectural heritage. The importance of retaining the built cultural heritage cannot be overemphasised. Rapid development and the inappropriate conservation techniques are threatening many built cultural heritage unique sites in different parts of the world. This current volume covers a wide range of topics related to the historical aspects and the reuse of heritage buildings, as well as technical issues on the structural integrity of different types of buildings, such as those constructed with materials as varied as iron and steel, concrete, masonry, wood or earth. Material characterisation techniques are also addressed, including non-destructive tests via computer simulation. Modern computer simulation can provide accurate results demonstrating the stress state of the building and possible failure mechanisms affecting its stability. The included papers focus on such topics as: Heritage architecture and historical aspects; Learning from the past; Surveying and monitoring; Modern (19th/20th century) heritage; Ports and coastal heritage; Heritage masonry structures; Wooden structures; New technologies and materials; Corrosion and material decay; Seismic vulnerability and retrofit; Re-use of heritage buildings; Heritage and tourism; Conservation policies; Guidelines, codes and regulations for heritage; Heritage management; Defence, Industrial and Transportation heritage; Social, cultural and economic aspects; Adaptability and accessibility; Monitoring and damage detection; Vernacular architecture.

A Far-Away War Ian Liebenberg,2016-01-31 South Africa's armed forces invaded Angola in 1975, setting off a war that had consequences for the whole region that are still felt today. A Far-Away War contributes to a wider understanding of this war in Angola and Namibia. The book does not only look at the war from an e;olde; South African (Defence Force) perspective, but also gives a voice to participants e;on the other sidee; - emphasising the role of the Cubans and Russians. This focus is supplemented by the inclusion of many never-before-published photographs from Cuban and Russian archives, and a comprehensive bibliography.
