**Agroecological Footprints Management for Sustainable Food System** Arnab Banerjee, Ram Swaroop Meena, Manoj Kumar Jhariya, Dhiraj Kumar Yadav, 2020-12-16 Agroecological footprints are a unique and popular concept for sustainable food system. Measuring and keeping a tab on the agroecological footprints of various human activities has gained remarkable interest in the past decade. From a range of human activities, food production and agriculture are most essential as well as extremely dependent on the agroecosystems. It is therefore crucial to understand the interaction of agroecosystem constituents with the extensive agricultural practices. The environmental impact measured in terms of agroecological footprints for a healthy for the sustainable food system. The editors critically examine the status of agroecological footprints and how it can be maintained within sustainable limits. Drawing upon research and examples from around the world, the book is offering an up-to-date account, and insight into how agroecology can be implemented as a solution in the form of eco-friendly practices that would boost up the production, curbs the environmental impacts, improves the bio-capacity, and reduces the agroecological footprints. It further discusses the changing status of the agroecological footprints and the growth of other footprint tools and types, such as land, water, carbon, nitrogen, etc. This book will be of interest to teachers, researchers, government planners, climate change scientists, capacity builders, and policymakers. Also, the book serves as additional reading material for undergraduate and graduate students of agriculture, agroforestry, agroecology, soil science, and environmental sciences. National and international agricultural scientists, policymakers will also find this to be useful to achieve the 'Sustainable Development Goals'.

*Trade Wars* Nils Ole Oermann, Hans-Jürgen Wolff, 2022-11-03 This book explores the causes and instruments of 500 years of armed and non-armed international trade conflicts. Nils Ole Oermann and Hans-Jürgen Wolff draw on decades of experience to examine trade wars, economic sanctions, and different types of economic warfare, investigating their history, ethics, economic driving forces, and legality under current rules. They provide a clear and accessible account of the economics of trade, of trade and financial policy since the nineteenth century, and of the effectiveness of sanctions and the 'winnability' of trade wars. The book also describes the transformation of economic warfare since 1989, namely in cyberspace and in the world financial system, and shows how China's rise challenges the Western model of democracy and free market economies. The authors conclude with a plea for improved economic statecraft and an overhaul of the current trading

regime.

**Technology in Financial Markets** Marco Dell'Erba, 2024-01-16 In recent years, technology has emerged as a disruptive force in the economy and finance, leading to the establishment of new economic and financial paradigms. Focusing on blockchain technology and its implementations in finance, Technology in Financial Markets proposes a novel theoretical approach to disruption. Relying on complexity science, it develops a dynamic perspective on the study of disruptive phenomena and their relationship to financial regulation and the law. It identifies the intrinsic interconnections characterizing the multidimensional technology-driven transformations, involving commercial practices, capital markets, corporate-governance, central banking, and financial networks. From this perspective, it considers the way they are reflected at the level of contract law, financial law, corporate law, central banking law. The book adopts a unique comparative approach and explains and clarifies the factual and historical dimensions underlying the emergence of the crypto-economy. In this book blockchain is used as a case study. Blockchain exemplifies the way each subpart of the financial system - commercial practices, financial markets, corporations, central banking, networks - and consequently each subcategory of financial regulation evolves on an individual basis. It shows how such subparts evolve altogether bringing systemic transformations, and ultimately leading to the creation of new economic and financial paradigms. The book considers both these perspectives, analysing the evolution of each subpart and emphasizing the interconnected transformations. In doing this, it adopts the structure of an ascending climax, starting from contracts, and escalating to increasingly broad dimensions, in particular capital markets, corporate governance, central banking, and financial networks.

**Islamic Charity** Samantha May, 2021-07-29 Since 9/11 and the global War on Terror, practitioners of Islam in Europe and beyond have been scrutinised and surveyed under suspicion of disloyalty and as potential disrupters of national social cohesion. Seemingly benign, altruistic practices, such as charity, are viewed as potential threats to national security and have increasingly become subject to counter-terrorism policies. This work seeks to critically assess the assumptions behind the lesser-known financial War on Terror, through exploration of the effects of current policies on Muslim charitable practices in the UK. The consequences of current policies are multi-faceted - from the stigmatization and suspicion of Muslim charities and communities, individual loss of status and financial standing, to a decrease of living standards and/or loss of lives. Engaging with the everyday socio-political activities of Muslim individuals, this book gives voice to the motivations, apprehensions and challenges faced by Muslim charitable practitioners. A must read for anyone wanting to challenge policy assumptions behind increased surveillance of charities and individual donors, whilst outlining the repercussions of current policies on Muslim individuals and charities.

**In Sheep's Clothing** George K. Simon, 1996 The vignettes contained in this book are based upon clinical cases and first-hand accounts of actual occurrences and circumstances. However, the names, professions, locations, and other biographical

data used in the vignettes have been altered in order to preserve anonymity and privacy to the greatest degree possible without distorting the fundamental psychological realities the stories are intended to illustrate.

**Ultimate Price** Howard Steven Friedman,2020-05-05 How much is a human life worth? Individuals, families, companies, and governments routinely place a price on human life. The calculations that underlie these price tags are often buried in technical language, yet they influence our economy, laws, behaviors, policies, health, and safety. These price tags are often unfair, infused as they are with gender, racial, national, and cultural biases that often result in valuing the lives of the young more than the old, the rich more than the poor, whites more than blacks, Americans more than foreigners, and relatives more than strangers. This is critical since undervalued lives are left less-protected and more exposed to risk. Howard Steven Friedman explains in simple terms how economists and data scientists at corporations, regulatory agencies, and insurance companies develop and use these price tags and points a spotlight at their logical flaws and limitations. He then forcefully argues against the rampant unfairness in the system. Readers will be enlightened, shocked, and, ultimately, empowered to confront the price tags we assign to human lives and understand why such calculations matter.

**Suppressing Dissent** Zaha Hassan,H. A. Hellyer,2024-12-12 Civic space worldwide is shrinking - nowhere is this plainer than in Palestine-Israel Suppressing Dissent brings together leading experts of shrinking civic space and transnational repression concerning Palestine-Israel to show how failing to address the phenomenon has impacts in the United States, the Middle East and beyond.
