The Dynamics of English in Namibia Anne Schröder, 2021-09-15 The English language as spoken in Namibia has virtually been overlooked in most textbooks, handbooks, and surveys of varieties of English around the world, or else has only been mentioned in passing. However, this variety of English has recently attracted the attention of several researchers and the present volume brings together most scholars actively involved in the research on English in Namibia from various linguistic fields to present their current research. It covers a wide range of linguistic issues, such as empirical analyses on various levels of linguistic description and use, as well as the application of diverse methodologies, from questionnaire surveys, sociolinguistic interviews and focus group discussions, to corpus linguistics, linguistic landscaping, and digital ethnography. This book represents the first comprehensive collection of articles and in-depth discussions of this emerging variety of World Englishes.

Heritage Language Policies around the World Corinne A. Seals, Sheena Shah, 2017-09-18 Heritage language policies define the context in which heritage languages are maintained or abandoned by communities, and this volume describes and analyzes international policy strategies, as well as the implications for the actual heritage language speakers. This volume brings together heritage language policy case studies from around the world, foregrounding globalization by covering five regions: the Americas, Europe, Africa, Asia, and Australasia. The countries profiled include the United States, Canada, Argentina, Norway, Sweden, Ireland, Uganda, Namibia, Morocco, Japan, South Korea, Singapore, New Zealand, Australia, and Fiji. This volume also highlights an expanded definition of 'heritage language', choosing to focus on individual and community identities, and therefore including both Indigenous and immigrant languages. Focusing specifically on language policy relating to heritage languages, the chapters address key questions such as Are heritage languages included or excluded from the national language policy discourse? What are the successes and shortcomings of efforts to establish heritage language policies? What is the definition of 'heritage language' in official usage by the local/regional government and stakeholders? How are these language policies perceived by the actual heritage language communities?

African Englishes Collen Sabao, Esther Mavengano, 2025-09-25 This book investigates the functions and linguistic forms

of African Englishes, and what this means for languages indigenous to Africa. It examines the historical imposition of English on the continent, as part of a broader project of cultural imperialism, and traces its transformation from a colonial tool to a dynamic and diverse language, examining its set of contemporary usage patterns, and its likely future directions. Thorough diverse critical approaches, this book unpacks how language contact has given rise to distinct variations including second language varieties, pidgins and creoles, that are moulded by Africa's linguistic and cultural diversity. Drawing on case studies from West, East, and Southern Africa, this book illuminates contemporary English usages in multilingual spaces, where cultural and linguistic plurality drive ongoing shifts in communication. More than just being a study of language change, this book calls for a reassessment of the future of African Englishes and their impact on indigenous languages. Thus, the book is an essential read for scholars and students in linguistics, African Studies, and World Englishes, as it contributes fresh insights into the intersections of language, culture, identity, and power in modern-day African lifeworlds.
