Giving Preservation a History Randall F. Mason, Max Page, 2019-10-21 In this volume, some of the leading figures in the field have been brought together to write on the roots of the historic preservation movement in the United States, ranging from New York to Santa Fe, Charleston to Chicago. Giving Preservation a History explores the long history of historic preservation: how preservation movements have taken a leading role in shaping American urban space and development; how historic preservation battles have reflected broader social forces; and what the changing nature of historic preservation means for efforts to preserve national, urban, and local heritage. The second edition adds several new essays addressing key developing areas in the field by major new voices. The new essays represent the broadening range of scholarship on historic preservation generated since the publication of the first edition, taking better account of the role of cultural diversity and difference within the field while exploring the connections between preservation and allied concerns such as environmental sustainability, LGBTQ and nonwhite identity, and economic development.

Soul City Thomas Healy, 2021-02-02 A New York Times Book Review Editors' Choice 2021 Hooks National Book Award Winner The fascinating, forgotten story of the 1970s attempt to build a city dedicated to racial equality in the heart of "Klan Country" In 1969, with America's cities in turmoil and racial tensions high, civil rights leader Floyd McKissick announced an audacious plan: he would build a new city in rural North Carolina, open to all but intended primarily to benefit Black people. Named Soul City, the community secured funding from the Nixon administration, planning help from Harvard and the University of North Carolina, and endorsements from the New York Times and the Today show. Before long, the brand-new settlement - built on a former slave plantation - had roads, houses, a health care center, and an industrial plant. By the year 2000, projections said, Soul City would have fifty thousand residents. But the utopian vision was not to be. The race-baiting Jesse Helms, newly elected as senator from North Carolina, swore to stop government spending on the project. Meanwhile, the liberal Raleigh News & Observer mistakenly claimed fraud and corruption in the construction effort. Battered from the left and the right, Soul City was shut down after just a decade. Today, it is a ghost town - and its industrial plant, erected to promote Black economic freedom, has been converted into a prison. In a gripping, poignant narrative, acclaimed author Thomas Healy resurrects this forgotten saga of race, capitalism, and the struggle for equality. Was it an impossible dream from the beginning? Or a brilliant idea thwarted by prejudice and ignorance? And how might America be different today if Soul City had been allowed to succeed?

Island Tinkerers Honghong Tinn, 2025-01-07 How Taiwan rose to global prominence in high tech manufacturing, from

computer maker to the world's leading chip manufacturer. How did Taiwan, a former Japanese colony and the last fortress of the defeated Chinese Nationalists, ascend to such heights in high-tech manufacturing? In *Island Tinkerers*, Honghong Tinn tells the critical history of how hobbyists and enthusiasts in Taiwan, including engineers, technologists, technocrats, computer users, and engineers-turned-entrepreneurs, helped transform the country with their hands-on engagement with computers. Rather than engaging in wholesale imitation of US sources, she explains, these technologists tinkered with imported computing technology and experimented with manufacturing their own versions, resulting in their own brand of successful innovation. Defying the stereotype of "the West innovates, and the East imitates," Tinn tells the story of Taiwanese technologists' efforts over the past six decades. Beginning in the 1960s, they grappled with the "black-boxed" computers that were newly available through international technical-aid programs. Shortly after, multinational corporations that outsourced transistor and integrated circuit assembly overseas began employing Taiwanese engineers and factory workers. Island tinkerers developed strategies to adapt, modify, assemble, and work with computers in an inventive manner. It was through this creative and ingenious tinkering with computers that they were able to gain a better understanding of the technology, opening the door to future manufacturing endeavors that now include Acer, Foxconn, Asus, and Taiwan Semiconductor Manufacturing Company (TSMC).

The Black Sea Between the EU and Russia Thomas Weihe, 2007 At once an energy corridor and gateway for trafficking and organized crime, the Black Sea region is an area of burgeoning importance to the European Union. Its frozen conflicts in Abkhazia, South Ossetia, and Transnistria are dangerous centers of instability in Europe's immediate neighborhood. The Black Sea is also nearing the EU in purely geographic terms: in 2007 its littoral states Romania and Bulgaria will join, accession talks with Turkey have been opened, Georgia and Ukraine have expressed interest in EU membership and are being discussed as possible candidates for a NATO enlargement. The growing Western presence in the region has set off alarm bells in Russia, which regards the Black Sea as its sphere of influence. The prospect of NATO expanding poses a particularly acute threat of escalation. Also, Moscow's remarks that independence for Kosovo could serve as a precedence for the separatist frozen conflict regions are being seen as harbingers of future conflict. EU and regional representatives have therefore counselled respect for Russia's interests around the Black Sea, consideration of its objections, and efforts to facilitate cooperation that would benefit all sides. Does the EU need a Black Sea strategy? If so, what form should it take? This 134th Bergedorf Protocol documents a meeting of senior politicians and experts from the region and EU states in Odessa who analyzed the situation and put forward policy options

The Black Cat Edgar Allan Poe, 2020-08-01 The Black Cat is a short story by Edgar Allan Poe. It was first published in the August 19, 1843, edition of The Saturday Evening Post. It is a study of the psychology of guilt, often paired in analysis with Poe's The Tell-Tale Heart. In both, a murderer carefully conceals his crime and believes himself unassailable, but eventually breaks down and reveals himself, impelled by a nagging reminder of his guilt.

Learning from the Blackouts International Energy Agency, 2005 Electricity market reform has fundamentally changed the environment for maintaining reliable and secure power supplies. Growing inter-regional trade has placed new demands on transmission systems, creating a more integrated and dynamic network environment with new real-time challenges for reliable and secure transmission system operation. Despite these fundamental changes, system operating rules and practices remain largely unchanged. The major blackouts of 2003 and 2004 raised searching questions about the appropriateness of these arrangements. Management of system security needs to be transformed to maintain reliable electricity services in this more dynamic operating environment. These challenges raise fundamental issues for policymakers. This publication presents case studies drawn from recent large-scale blackouts in Europe, North America, and Australia. It concludes that a comprehensive, integrated policy response is required to avoid preventable large-scale blackouts in the future.--Publisher summary.
