This Changes Everything Naomi Klein, 2015-08-04 #1 bestseller, winner of the Hilary Weston Writers' Trust Prize for Non-Fiction, and Naomi Klein's most important book yet--about the economic drivers that are warming our planet and how the climate crisis can yet spur economic, cultural and political transformation. Klein argues that our current growth-based economic model is waging war on the life support systems of our planet. Using phenomenal research, she lays out why climate change is not an issue--it is a civilizational wake-up call, a powerful message delivered in the language of fires, floods, storms and droughts. Klein attacks the dominant economic policies of deregulated capitalism and endless resource extraction, and brilliantly identifies the threads that connect our failed responses to the crisis--from hard-core climate deniers to celebrity billionaires with messiah complexes, to the reckless quest to engineer the planet--and she reveals how the Big Green environmental organizations may be hurting more than helping. She argues that we urgently need an entirely new model of human progress and shows why climate change--with its full economic and moral implications understood--is the most powerful weapon we have ever had in the fight for equality and social justice. Tracing the rise of a bold new resistance movement against extreme energy, she highlights the real solutions emerging in the rubble of our failed systems--solutions that require us to break virtually every rule in the free-market playbook. The climate change debate is about to get a lot hotter.

Climate Change in Popular Culture James Craig Holte, 2022-06-17 An invaluable resource for general readers

investigating climate change, this book examines the impact of climate change on popular culture and analyzes how writers and directors treat the disasters caused by climate change in their novels and films. *Climate Change in Popular Culture: A Warming World in the American Imagination* is the first study that includes analyses of both fiction and popular nonfiction works devoted to climate change. In addition, the book examines a number of classic works from the perspective of the growing field of climate change literature and includes a brief history of climate change science as well basic scientific definitions, all intended for general readers. The text provides an introduction to the science, politics, and economics of climate change. It also includes both historical overviews and potential probable futures projected by leading climate scientists and environmental writers. In addition, the text looks at how such creative writers and directors as Margaret Atwood, John Steinbeck, Paulo Bacigalupi, Kim Stanley Robinson, T. C. Boyle, Michael Crichton, and Octavia Butler, among others, have used the disasters caused by climate change in their work.

Configurations of Migration Jennifer Leetsch, Frederike Middelhoff, Miriam Wallraven, 2023-10-24 In a global context in which phenomena of migration play an ever more important role, the ways individual and collective experiences of migration are covered in the media, represented in culture, and interpreted are coming under increasing scrutiny. This book explores the complex relationship between creative engagements with migration on the one hand, and forms of knowledge about migration on the other, inquiring into the ways aesthetic practices are intertwined with knowledge structures. The book responds to three pressing research questions. First, it analyses how fictional texts, plays, images, films, and autobiographical accounts mediate forms of knowledge about migration. Second, it identifies the ways in which specific media approaches and aesthetic practices influence people's ideas about and awareness of migratory experiences in a globalized world. Finally, it delineates how historical perspectives help us compare epistemological approaches to migration in the nineteenth, twentieth, and early twenty-first centuries, and how these approaches affect the way critics and the public responded to and thought about different forms of (forced) migration. Bringing together renowned scholars working across disciplines, it investigates the possibilities and limitations that different media present when it comes to reflecting on, communicating, and imagining experiences of migration, and how these representations in turn create ways of knowing and understanding migration.

Provisional Cities Renata Tyszczyk, 2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene – the proposed geological epoch of human-induced changes to the Earth system. It charts an environmental history of curfews, admonitions and alarms about dwelling on Earth. 'Provisional cities' are explored as exemplary sites for thinking about living in this unsettled time. Each chapter focuses on cities, settlements or proxy urbanisations, including past disaster zones, remote outposts in the present and future urban fossils. The book explores the dynamic, changing and contradictory relationship between architecture and the global environmental crisis and looks at how to re-position

architectural and urban practice in relation to wider intellectual, environmental, political and cultural shifts. The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability, responsibility and opportunity that are presented by immense processes of planetary change. These are cautionary tales for the Anthropocene. Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice. This book would be beneficial to students and academics working in architecture, geography, planning and environmental humanities as well as professionals working to shape the future of cities.

T&T Clark Handbook of Christian Theology and Climate Change Hilda P. Koster, Ernst M. Conradie, 2019-12-12 The T&T Clark Handbook of Christian Theology and Climate Change entails a wide-ranging conversation between Christian theology and various other discourses on climate change. Given the far-reaching complicity of North Atlantic Christianity in anthropogenic climate change, the question is whether it can still collaborate with and contribute to ongoing mitigation and adaptation efforts. The main essays in this volume are written by leading scholars from within North Atlantic Christianity and addressed primarily to readers in the same context; these essays are critically engaged by respondents situated in other geographic regions, minority communities, non-Christian traditions, or non-theological disciplines. Structured in seven main parts, the handbook explores: 1) the need for collaboration with disciplines outside of Christian theology to address climate change; 2) the need to find common moral ground for such collaboration; 3) the difficulties posed by collaborating with other Christian traditions from within; 4) the questions that emerge from such collaboration for understanding the story of God's work; and 5) God's identity and character; 6) the implications of such collaboration for ecclesial praxis; and 7) concluding reflections examining whether this volume does justice to issues of race, gender, class, other animals, religious diversity, geographical divides and carbon mitigation. This rich ecumenical, cross-cultural conversation provides a comprehensive and in-depth engagement with the theological and moral challenges raised by anthropogenic climate change.

On Fire Naomi Klein, 2020-09-01 #1 New York Times and internationally bestselling author Naomi Klein makes the case for a Green New Deal in this “keenly argued, well-researched, and impassioned” manifesto (The Washington Post). An instant bestseller, *On Fire* shows Klein at her most prophetic and philosophical, investigating the climate crisis not only as a profound political challenge but also as a spiritual and imaginative one. Delving into topics ranging from the clash between ecological time and our culture of “perpetual now,” to the soaring history of humans changing and evolving rapidly in the face of grave threats, to rising white supremacy and fortified borders as a form of “climate barbarism,” this is a rousing call to action for a planet on the brink. An expansive, far-ranging exploration that sees the battle for a greener world as indistinguishable from the fight for our lives, *On Fire* captures the burning urgency of the climate crisis, as well as the fiery energy of a rising political movement demanding a catalytic Green New Deal. “Naomi Klein’s work has always moved and guided me. She is the great chronicler of our age of climate emergency, an inspirer of generations.” —Greta Thunberg,

climate activist If I were a rich man, I'd buy 245 million copies of Naomi Klein's 'On Fire' and hand-deliver them to every eligible voter in America...Klein is a skilled writer. —Jeff Goodell, The New York Times

Delving into topics as diverse as anarchy, intersectionality, Confucianism, and neoconservatism, boxed features give you confidence in political analysis: -Focus on: learn more about the global colour line or the tragedy of the commons -Key figures: discuss the ideas of Hans Morgenthau, Frantz Fanon or bell hooks -Debating: argue whether the United Nations are obsolete, or whether nuclear weapons promote peace -Global politics in action: apply your learning to the migration crisis in Europe or the Arab Spring -Approaches to: consider human rights or the Covid-19 pandemic from the perspective of realist, liberal, postcolonial, Marxist, feminist, constructivist and post-structuralist theory -Global actors: understand the significance of Black Lives Matter, Amnesty International or the International Monetary Fund. Hot Money Naomi Klein,2021-08-26 In twenty short books, Penguin brings you the classics of the environmental movement. In *Hot Money* Naomi Klein lays out the evidence that deregulated capitalism is waging war on the climate, and shows that, in order to stop the damage, we must change everything we think about how our world is run. Over the past 75 years, a new canon has emerged. As life on Earth has become irrevocably altered by humans, visionary thinkers around the world have raised their voices to defend the planet, and affirm our place at the heart of its restoration. Their words have endured through the decades, becoming the classics of a movement. Together, these books show the richness of environmental thought, and point the way to a fairer, saner, greener world.

Karl Polanyi and the Contemporary Political Crisis Peadar Kirby, 2020-12-10 Has politics reached breaking point? Rather than defending liberalism or abandoning it, how can a socially just and ecological alternative be built? Peadar Kirby investigates the causes of our current multifaceted global crisis by drawing on the work of Karl Polanyi. This book explores Polanyi's theory that social disruptions result from the attempt to run society according to the rules of the market. Drawing on these ideas, it outlines pathways towards an alternative future that overcome weaknesses in Marxism. Linking the ecological, political and socio-economic crises, Kirby identifies that an alternative socio-ecological model is emerging, consistent with the insights of Polanyi. *Karl Polanyi and the Contemporary Political Crisis* is an urgent intervention into key debates on the future of politics, on the low-carbon transition, on automation and on the emerging world order.

No Is Not Enough Naomi Klein, 2017-06-13 ****The New York Times and Sunday Times Bestseller**** 'An ordinary person's guide to hope. Read this book' Arundhati Roy 'As accessible as it is brilliant' Owen Jones 'A genuine page turner' Michelle Alexander Naomi Klein - award-winning journalist, bestselling author of *No Logo*, *The Shock Doctrine* and *This Changes Everything*, scourge of brand bullies and corporate liars - gives us the toolkit we need to survive our surreal, shocking age. 'This is a look at how we arrived at this surreal political moment, how to keep it from getting a lot worse, and how, if we keep our heads, we can flip the script.' Naomi Klein shows us how we got here, and how we can make things better. *No Is Not Enough* reveals, among other things, that the disorientation we're feeling is deliberate. Fair Economics Irene Schoene, 2015-09-10 Alternative economics for the 21st century Modern economics bases its view of the world on assumptions about nature and people laid down by Adam Smith, nearly 300 years ago, in a time when people traveled by horse and carriage and wrote by the light of candles. We now live in a globally connected, postindustrial world of digital communication and space exploration and yet, our economic model remains stuck in the past. In *Fair Economics*, Irene Schoene puts forward an alternative economics that is not only relevant to our modern world of technology and industry but which also shows an awareness of environmental and geographic considerations. This book is a must-read for

anyone who has questioned our economic model, wondered how the financial crash was able to happen, or wondered what we can do stop it happening again.
