Hospice and Palliative Care in Southeast Asia Michael Wright, Ednin Hamzah, Temsak Phungrassami, Agnes Bausa-Claudio, 2010 This book provides a thorough evidence-base for palliative care provision in the countries of Malaysia, Thailand and the Philippines. It stimulates a more informed debate and discusses how to improve policy-making among intergovernmental and governmental organisations, generating intelligence on barriers to development and how to overcome them.

Effective Hospital Management Rufino Macagba MD MPH, 2019-04-30 This book proposes that hospitals should aim not only to heal or rehabilitate the sick, but should also teach people how to live a healthy life. The management system described can be used by hospital managers at any level to improve performance and results following a team approach where various needed skills are added when needed. The key to success is to have team members and staff whose competencies complement each other. Mastering hospital management is a lifetime quest, but one can begin to use and benefit from the proven management methods described. Continuing improvements are achieved by having a team committed to continuous improvement, whose skills reinforce one another, reading recommended books, learning from visiting other hospitals, and talking to colleagues in those hospitals. -Dr. Rufino L. Macagba

Bible and Theology from the Underside of Empire Vuyani Vellem, 2017-03-30 'Empire' has become an apt label to name the present horizon of global life and is associated with logic and practices which threaten human life in myriad ways. These reflections not only expose the true nature of empire, but suggest an alternative vision of flourishing wrought by God's kingdom. In a creative and imaginative manner the contributions highlight new liberative possibilities for life through non-

conventional Bible reading. The authors display a sensitive moral antenna for the oppressive manifestations of empire, and courageously intimate a new paradigm for Christian mission and public witness today.

Indigenous Public Health Linda Burhansstipanov,Kathryn L. Braun,2022-09-06 Income, education, job security, food and housing, and gender and race are all examples of the social determinants of health. These factors influence the health and well-being of patients, as well as how they interact with health care providers and receive health care, and unfortunately, certain biases can become a barrier to maintaining good health in some communities. Indigenous groups in North America and US-associated Pacific jurisdictions have been subjected to occupation and forced relocation, mandated boarding schools, and other attempts by state and federal governments to eliminate their cultural strengths and resources. Indigenous Public Health illustrates how successful community engagement strategies, programs, and resources within Indigenous communities have resulted in diverse, successful public health programs, and helped community members overcome barriers to health. Editors Linda Burhansstipanov and Kathryn L. Braun explore the problems that impact engagement efforts, discuss public health topics, acknowledge and honor the strengths of different communities, and emphasize that collaboration and the sharing of resources can only improve lives.
