Internet of Things, Smart Spaces, and Next Generation Networks and Systems Yevgeni Koucheryavy, Ahmed Aziz, 2025-07-26 This two-volume set LNCS 15554 and LNCS 15555 constitutes the refereed proceedings of the 24th International Conference on Next Generation Wired/Wireless Networking, NEW2AN 2024, and the 17th Conference on Internet of Things and Smart Spaces, ruSMART 2024, held in Marrakesh, Morocco, during December 11-12, 2024. The 48 full papers included in the joint proceedings were carefully reviewed and selected from 354 submissions. They address various aspects of next-generation data networks, with special attention to advanced wireless networking and applications. In particular, novel and innovative approaches to performance and efficiency analysis of 5G and beyond systems, advanced queuing theory, and machine learning are demonstrated. Additionally, the papers focus on the Internet of Things, optics, signal processing, as well as digital Economy and business aspects.

Strategies for Circular Economy and Cross-sectoral Exchanges for Sustainable Building Products Marco Migliore, Cinzia Talamo, Giancarlo Paganin, 2019-09-25 This book offers a valuable tool for understanding current efforts to promote the reuse and enhancement of pre-consumer waste in the development of new products for the construction sector, as well as the financial and regulatory tools being used to support this trend. It explores the vast and complex topic of the circular economy from the perspective of strategies for the reuse/recycling of waste, and develops a number of key premises: waste reuse/recycling must be considered using a logic of cross-sectoriality, recognizing the need to enhance the “dialogue” between different sectors; pre-consumer waste is particularly interesting for the recycling market because the construction sector can reduce its environmental impacts by enhancing its capacity to use secondary raw materials and by-products from other sectors; and lastly, the manufacturing sector is currently experimenting with promising forms of reducing/recycling pre-consumer waste and is at the same time providing by-products that can be used in other production chains. As such, the book offers a valuable asset for professionals who are interested in sustainability in construction, and in the study of construction products; however, it will be equally useful for local decision-makers tasked with implementing development policies and innovations in the industrial sector.

Data Science and Analytics Usha Batra, Nihar Ranjan Roy, Brajendra Panda, 2020-05-27 This two-volume set (CCIS 1229 and CCIS 1230) constitutes the refereed proceedings of the 5th International Conference on Recent Developments in

Science, Engineering and Technology, REDSET 2019, held in Gurugram, India, in November 2019. The 74 revised full papers presented were carefully reviewed and selected from total 353 submissions. The papers are organized in topical sections on data centric programming; next generation computing; social and web analytics; security in data science analytics; big data analytics.

Fund Custody and Administration David Loader, 2016-07-14 Fund Custody and Administration provides an overall perspective of investment funds without limiting its analysis to specific fund structures, as other books do. Since governance and oversight of investment funds are now major regulatory requirements, administrators and custodians must place greater emphasis on the custody and safekeeping of fund assets, on the independent and robust valuation of the assets, and on collateral management. By focusing on both the asset transactions made by the investment manager for the portfolio and on the transactions in the shares or units of the fund itself, it gives readers insights about the essential elements of investment fund management and administration, regardless of their geographical backgrounds. - Explores the key stages in the investment process, from setting up a fund through its launch and operation - Explains the roles of participants as well as the ways regulation affects the fund and its operation - Describes the work flow associated with custody and administration procedures and processes - Defines the role of compliance and risk management in the context of the fund and also how compliance requirements apply to custodians and administrators

Agile and Lean Service-Oriented Development: Foundations, Theory, and Practice Wang, Xiaofeng, Ali, Nour, Ramos, Isidro, Vidgen, Richard, 2012-11-30 Challenges in unpredictable markets, changing customer requirements, and advancing information technologies have lead to progression towards service oriented engineering and agile and lean software development. These prevailing approaches to software systems provide solutions to challenges in demanding business environments. Agile and Lean Service-Oriented Development: Foundations, Theory and Practice explores the groundwork of service-oriented and agile and lean development and the conceptual basis and experimental evidences for the combination of the two approaches. Highlighting the best tools and guidelines for these developments in practice, this book is essential for researchers and practitioners in the software development and service computing fields.
