

What Is Triple Bottom Line Reporting

Victor M. Corman

The Triple Bottom Line Adrian Henriques, Julie Richardson, 2013-06-17 'The Triple Bottom Line' - which delivers simultaneous social, financial and environmental benefits - is a rallying cry for business sustainability. This text examines the implications of the idea, showing what has already been achieved.

Triple Bottom Line Reporting Dr. Sumanta Dutta, 2015 Numerous business organisations, in an attempt to 'demonstrate' their behaviour is sustainable, are beginning to adopt environmental management systems, undertake social agenda's, and issue stand-alone "sustainability" or "triple bottom line" (TBL) reports in addition to the financial report. The apparent purpose of such practices and reporting is to make organisations more accountable to a diverse group of "stakeholders". Hence TBL emerged as a new tool for measuring organisational performance. Triple Bottom Line Reporting (TBLR) goes beyond the traditional way of reporting mechanism and encourages businesses to give closer attention to the whole impact of their commercial activities; over and above their financial performance. TBL implies business should provide equal importance to all the three dimensions of business impact without giving unique weight to their financial results. Present study is an attempt to highlight the literature based evaluation of Triple Bottom Line Reporting (TBLR) in India and its future scope.

Understanding the Social Dimension of Sustainability Jesse Dillard, Veronica Dujon, Mary C. King, 2008-07-01 The imperative of the twenty-first century is sustainability: to raise the living standards of the world's poor and to achieve and maintain high levels of social health among the affluent nations while simultaneously reducing and reversing the environmental damage wrought by human activity. Scholars and practitioners are making progress toward environmental and economic sustainability, but we have very little understanding of the social dimension of sustainability. This volume is an ambitious, multi-disciplinary effort to identify the key elements of social sustainability through an examination of what motivates its pursuit and the conditions that promote or detract from its achievement. Included are theoretical and empirical pieces; examination of international and local efforts; discussions highlighting experiences in both the developing and industrialized nations; and a substantial focus on business practices. Contributors are grounded in sociology, economics, business administration, public administration, public health, geography, education and natural resource management.

Triple Bottom Line Lorraine Nelson, Catherine Wilson, 2003 Outlines the benefits of sustainable business practices and how to maximise the potential of triple bottom line reporting, and explains how to adapt such practices in an organisation-wide context.

Stumbling Toward Sustainability John C. Dernbach, 2002 In 1992, at the United Nations Conference on Environment and Development in Rio de Janeiro, the nations of the world agreed to implement an ambitious plan for ecologically sustainable human development. This book is a comprehensive review of U.S. efforts to achieve such development since Rio. The U.S. has unquestionably begun to take steps toward sustainable development. Yet the nation is now far from being a sustainable society, and in many respects is farther away than it was in 1992. Nevertheless, legal and policy tools are available to put the U.S. on a direct path to sustainability. This book brings together 42 distinguished experts from a variety of backgrounds and academic disciplines. It is among the most thorough assessments ever conducted of U.S. law and policy concerning the environment.

A question bank at the end of the book provides practice on exam style questions.

Triple Bottom Line im Accounting und Reporting Jennifer Schubert, 2008-07-01 Diplomarbeit aus dem Jahr 2007 im Fachbereich BWL - Controlling, Note: 1,0, Hochschule Coburg (FH), Sprache: Deutsch, Abstract: In Zeiten der zunehmenden Globalisierung und steigender Naturkatastrophen in Verbindung mit der globalen Erderwärmung wird der Fokus international auf einen schonenden und ergiebigeren Umgang mit den Umweltressourcen gerichtet. Zurzeit produziert die Menschheit irreversible ökologische Schäden, die sich in Form von Zerstörung der Ozonschicht, Klimawandel oder Überfischung der Weltmeere auftreten. Nachfolgende Generationen können diese Schäden nicht wieder rückgängig machen und müssen mit den Konsequenzen leben ohne ein Wahlrecht zu haben. Jeder Mensch ist auf irgendeine Art und Weise von unternehmerischen Aktivitäten betroffen und ist daher an den relevanten Informationen interessiert. Dieser Wissensbedarf nach Informationen über bspw. Arbeitsverhältnissen, Umweltbewusstsein oder effizienten Verbrauch von Ressourcen wird mit der Nachhaltigkeitsberichterstattung gedeckt. Grund hierfür ist nicht die einseitige Fokussierung auf finanzielle Zahlen, sondern auch ökologischen und sozialen Informationen. Die Entwicklungen seit der Konferenz in Rio de Janeiro mit der Verabschiedung der Rio Deklaration und der Agenda 21 zeigen, dass Unternehmen langfristig ihre Handlungen in Richtung „sustainability development“ ausrichten müssen.

Triple Bottom Line Famous Izedonmi, 2015 “Change is commonly referred to as the only constant thing”. This is equally seen in the manner in which corporate reporting changes to suit globalization, competition, and agitations by various interest groups. One change that has blown the way of reporting is the Triple Bottom Line Reporting whose focus is on the economic value companies add, as well as the environmental and social value. Our objective based on this emerging concept was to examine conceptually the concept of TBL as well as the arguments for and against this reporting style. We observed that irrespective of the arguments put forward for and against this reporting style, the overall concept is on more disclosures and

this in itself is awesome as long as the benefits derivable outweigh its cost.
