Autism Spectrum Disorders Megan Moore Duncan, Jeanne Holverstott, Brenda Smith Myles, Terri Cooper Swanson, 2007-09-30 With the increased number of children being diagnosed with Autism Spectrum Disorders, parents and professionals are in search of materials that provide information that will enable them to better understand affected children. While in the past individuals who were diagnosed had limited verbal and intellectual skills, newly diagnosed children often have good language skills and even areas of giftedness. This A-to-Z work contains original entries on the topic of Autism Spectrum Disorders. Entries include facts about disabilities, personal and historic perspectives, interventions, assessments, educational methods, trusted internet resources, and national organizations. The work outlines the contributions of founding researchers and other professionals and includes personal perspectives from individuals with ASD and their parents. It also includes lesson plans that can be implemented in a home, school, or community setting. No other such definitive resource exists that provides both educational and practical information related to ASD.

**Eating Disorders** Paul Robinson, Tracey Wade, Beate Herpertz-Dahlmann, Fernando Fernandez-Aranda, Janet Treasure, Stephen Wonderlich, 2024-12-20 This Handbook covers all eating disorders in every part of the world. Eating disorders in Western countries are described but also in different parts of Asia, Africa, the Middle East, amongst indigenous peoples, and peoples of cultural and linguistic diversity, Latin America and Eastern Europe and we will describe the impact of pandemics. The sections are organised with an introduction followed by definitions and classifications, then epidemiology, then psychosocial aetiology, clinical features, neurobiology, family peers and carers, and finally conclusions. The latest DSM and ICD classifications are covered and eating disorders not yet classified. The authors cover the clinical features of eating disorders complicating diabetes type 1, the neurobiology of eating disorders including immunology, neurotransmitters and appetite. The treatment section will include emergency treatment, evidence-based psychological approaches, intensive interventions and emerging areas, and the family section will include voluntary bodies, family and carers and pregnant mothers with eating disorders. Outcome covers prognosis in all the major eating disorders and describe the severe and enduring type of eating disorder. The work is the primary source of information about eating disorders for students, doctors, psychologists and other professionals. The fact that it is regularly updated makes it second only to primary sources such as journals for retrieving information on the subject. In contrast to journals the manual will provide accessibility unavailable elsewhere.
