Red Rubber Edmund Dene Morel, 2020-09-07 The terrifying reign of Leopold II, King of Belgium, was marked by atrocities in the Congo - murder, enslavement and violence was used in pursuit of raw rubber. Following advances in industry, rubber became a valuable commodity - at first, the Congolese thought this new trade would bring prosperity to their country. Instead, what ensued was murderous and exploitative barbarity of a scale never seen in Africa. Between 1890 and 1910, the Belgian forces occupying the Congo in Africa perpetrated horrific atrocities against the indigenous population. King Leopold II had brought Congo directly under his control. He permitted his soldiers to commit mass murder and enslavement, rapes, mass amputations, beatings and degradations of the population. Millions of Congolese died in the midst of this atrocious misrule. Belgium however profited enormously, and Leopold II spent some of his revenues from rubber sales on grandiose public building projects. Edmund Dene Morel was a British politician and campaigner who worked for years investigating and publicizing the brutality of Belgian rule in the Congo. He was appalled when Britain stood idly by as Leopold II's tyranny ensued. Morel first published this book in 1906, while this reprint is derived from an updated edition of 1919; by this time the king had died, having finally been forced to surrender his control of the colony to the government of Belgium.

Black Newspapers and America's War for Democracy, 1914-1920 William G. Jordan, 2001 Studies the efforts of black newspapers to offer support and demonstrate patriotism during World War I, and demand the end to lynching, disfranchisement of blacks, and segregation as a condition for their participation in the war.

The age of internationalism and Belgium, 1880-1930 Daniel Laqua, 2015-07-01 Belgium was a major hub for transnational movements. By taking this small and yet significant European country as a focal point, the book critically examines major issues in modern history, including nationalism, colonial expansion, debates on the nature of international relations and campaigns for political and social equality. Now available in paperback, this study explores an age in which many groups and communities - from socialists to scientists - organised themselves across national borders. The timeframe covers the rise of international movements and associations before the First World War, the conflagration of 1914 and the emergence of new actors such as the League of Nations. The book acknowledges the changing framework for transnational activism, including its interplay with domestic politics and international institutions. By tracing international movements and

ideas, the book aims to reveal and explain the multifarious and sometimes contradictory nature of internationalism.

In and Out of Focus Christraud M. Geary, 2003-05-02 This book accompanies an exhibition at the National Museum of African Art, Smithsonian Institution, on the role of photography in Central Africa. This is the first book to link two related themes: the role of photographic images in constructing and circulating fantasies, ideas, and sentiments in Europe and the US relating to the peoples of Central Africa; and the role of photography in enabling Africans to project images of themselves by becoming familiar with photographic technology. Broad in thematic and temporal scope, the book focuses on several time periods, especially on the years before and between the two world wars. This is also the first publication devoted to the important holdings of the Eliot Elisofen Photographic Archives, a department of the National Museum of African Art, Smithsonian Institution and a unique repository with more than 200,000 historical and contemporary images from all over Africa. This book raises important issues associated with photographic practice in Africa, the distribution of images, the circulation of ideas in Europe and the US, and African responses to photography through several poignant case studies. This book also advances the scholarly discourse on colonial/anthropological photography, and contributes to a better understanding of African responses to photography.

The International ,1914

Atrocity Labelling Markus P. Beham,2022-11-03 Atrocity. Genocide. War crime. Crime Against Humanity. Such atrocity labels have been popularized among international lawmakers but with little insight offered into how and when these terms are applied and to what effect. What constitutes an event to be termed a genocide or war crime and what role does this play in the application of legal proceedings? Markus P. Beham, through an interdisciplinary and comparative approach, unpicks these terms to uncover their historical genesis and their implications for international criminal law initiatives concerned with atrocity. The book uniquely compares four specific case studies: Belgian colonial exploitation of the Congo, atrocities committed against the Herero and Nama in German South-West Africa, the Armenian genocide and the man-made Ukrainian famine of the 1930s. Encompassing international law, legal history, and discourse analysis, the concept of 'atrocity labelling' is used to capture the meaning underlying the work of international lawyers and prosecutors, historians and sociologists, agenda setters and policy makers.
