Global Housing Projects Josep Llu's Mateo, 2021-06-02 The world is merging into one global system of goods, people and information. This book explores the social, cultural, and economic phenomena of globalization through housing. The Chair of Architecture and Design at the ETH in Zurich examines the last 25 years of housing development. This book is a historical criticism with the built projects as protagonists. Housing typologies have been chosen as contemporary architectural prototypes. The selection of housing projects reflects the most innovative and influential built housing projects to propose new important guidelines in housing.

Conservatism, Christian Democracy and the dynamics of transformation Gary Love, Christian Egander Skov, 2025-09-02 Conservatism, Christian Democracy, and the Dynamics of Transformation compares the centre-right political traditions of Britain, the Nordic countries, France, West Germany, and Austria and looks for evidence of political cooperation and influence across borders during the period 1945-90. The book explores how a variety of intellectuals, politicians, and political parties transformed their politics in response to major economic, social, and political challenges and seeks to explain why conservatives and Christian democrats came to feel that they belonged to a wider centre-right political family by the end of this period. It also examines why these political traditions found it difficult to cooperate with each other after the Second World War and why they decided to invest more political capital in inter-party relations and wider transnational projects from the 1960s. As the book shows, these developments resulted in two new centre-right internationals: the European Democrat Union and the International Democrat Union.

The Builder Ruth Richardson, Robert Thorne, 1994 Originally founded by Joseph Hansom, best known for his famous cab, the journal's editor from 1844 to 1883 was the architect George Godwin. During its first forty years, the journal's illustrations were mainly from wood engravings, although the editor's interest in innovation ensured that new illustrative printing techniques were also tried.
