Robert Ludlum's The Paris Option Robert Ludlum,Gayle Lynds,2010-04-01 For 30 years, Robert Ludlum's novels have set the standard for the finest in international intrigue and suspense. With an unbroken string of bestsellers in almost every country in the world, Robert Ludlum's books have been enjoyed by hundreds of millions of readers, and are widely acknowledged as classics in the field. Now, after the bestselling Covert-One novels The Hades Factor and The Cassandra Compact comes the third thrilling novel in the series - The Paris Option. A fiery explosion in the dark of night shatters one of the laboratory buildings in Paris's esteemed Pasteur Institute. Among the dead is Emile Chambord, one of the leaders in the global race to create a molecular - or DNA - computer. Unfortunately, Professor Chambord kept the details of his work secret, and his notes were apparently destroyed in either the bomb blast or the raging fire that followed. The scientific community does not expect a workable DNA computer to be developed for years. But suddenly U.S. fighter jets disappear from radar screens for a full five minutes, and there's no explanation. Utilities across the Western states cease functioning, and all telecommunications abruptly stop, with devastating consequences. This is not the work of a clever hacker, although Washington, worried about a panic, assures the public it is. Only the enormous power and speed of a DNA computer could have caused such havoc. Under the cover of visiting his friend Marty Zellerbach, who was severely injured when the Pasteur lab was destroyed, Covert-One agent Jon Smith flies to Paris to search for the connection between the Pasteur explosion and the forces now wielding the computer. Following a trail that leads him across two continents, Smith uncovers a web of deception that threatens to wreck havoc and forever reshape the world.

While the death toll mounts, their quest leads to the highest levels of power and the darkest corners of the earth, as they match wits with a determined genius--and as the fate of the world lies in the balance.

Dido's Daughters Margaret W. Ferguson,2007-11-01 Winner of the 2004 Book Award from the Society for the Study of Early Modern Women and the 2003 Roland H. Bainton Prize for Literature from the Sixteenth Century Society and Conference. Our common definition of literacy is the ability to read and write in one language. But as Margaret Ferguson reveals in Dido's Daughters, this description is inadequate, because it fails to help us understand heated conflicts over literacy during the emergence of print culture. The fifteenth through seventeenth centuries, she shows, were a contentious era of transition from Latin and other clerical modes of literacy toward more vernacular forms of speech and writing. Fegurson's aim in this long-awaited work is twofold: to show that what counted as more valuable among these competing literacies had much to do with notions of gender, and to demonstrate how debates about female literacy were critical to the emergence of imperial nations. Looking at writers whom she dubs the figurative daughters of the mythological figure Dido—builder of an empire that threatened to rival Rome—Ferguson traces debates about literacy and empire in the works of Marguerite de Navarre, Christine de Pizan, Elizabeth Cary, and Aphra Behn, as well as male writers such as Shakespeare, Rabelais, and Wyatt. The result is a study that sheds new light on the crucial roles that gender and women played in the modernization of England and France.
