

Describe San Francisco As An Ethnic Enclave

Ana Lidia Lau

Ethnic Renewal in Philadelphia's Chinatown Kathryn Wilson, 2015-04-10 Philadelphia's Chinatown, like many urban chinatowns, began in the late nineteenth century as a refuge for immigrant laborers and merchants in which to form a community to raise families and conduct business. But this enclave for expression, identity, and community is also the embodiment of historical legacies and personal and collective memories. In *Ethnic Renewal in Philadelphia's Chinatown*, Kathryn Wilson charts the unique history of this neighborhood. After 1945, a new generation of families began to shape Chinatown's future. As plans for urban renewal—ranging from a cross-town expressway and commuter rail in the 1960s to a downtown baseball stadium in 2000—were proposed and developed, “Save Chinatown” activists rose up and fought for social justice. Wilson chronicles the community's efforts to save and renew itself through urban planning, territorial claims, and culturally specific rebuilding. She shows how these efforts led to Chinatown's growth and its continued ability to serve as a living community for subsequent waves of new immigration.

Race, Ethnicity, And Nationality In The United States Paul Wong, 2021-09-02 This book is intended for use in advanced undergraduate and graduate-level courses on race and ethnicity and on diversity in America. It was first conceived as a collective project of the Research and Resident Scholar Program in Comparative Race Relations at Washington State University, which was established in 1994 with support from the Rockefeller Foundation. A number of the participating authors are established scholars in racial/ethnic studies, and several have published award-winning bestsellers. Others are relative newcomers to the field who were invited to join the project because they were doing important work on less well covered topics, such as relations between African Americans and Chicano/Latino Americans.

Asian American Literature and the Environment Lorna Fitzsimmons, Youngsuk Chae, Bella Adams, 2014-10-24 This book is a ground-breaking transnational study of representations of the environment in Asian American literature. Extending and renewing Asian American studies and ecocriticism by drawing the two fields into deeper dialogue, it brings Asian American writers to the center of ecocritical studies. This collection demonstrates the distinctiveness of Asian American writers' positions on topics of major concern today: environmental justice, identity and the land, war environments, consumption, urban environments, and the environment and creativity. Represented authors include Amy Tan, Maxine Hong Kingston, Ruth Ozeki, Ha Jin, Fae Myenne Ng, Le Ly Hayslip, Lan Cao, Mitsuye Yamada, Lawson Fusao Inada, Jeanne Wakatsuki

Houston, Milton Murayama, Don Lee, and Hisaye Yamamoto. These writers provide a range of perspectives on the historical, social, psychological, economic, philosophical, and aesthetic responses of Asian Americans to the environment conceived in relation to labor, racism, immigration, domesticity, global capitalism, relocation, pollution, violence, and religion. Contributors apply a diversity of critical frameworks, including critical radical race studies, counter-memory studies, ecofeminism, and geomantic criticism. The book presents a compelling and timely green perspective through which to understand key works of Asian American literature and leads the field of ecocriticism into neglected terrain.

Geospatial Approaches to Energy Balance and Breast Cancer David Berrigan, Nathan A. Berger, 2019-07-15 Cancer occurs in specific places and spaces, each of which have identifiable geographic coordinates, characterized by unique natural, built and social characteristics, all of which contribute significantly to cancer across the spectrum from etiology through diagnosis, treatment and outcomes. In the first volume of this series, published in 2010, a single chapter was focused on these geographic influences. Since then, the field of geospatial studies of cancer prevention and control has exploded in approaches and applications. Accordingly, this volume focuses on what has now become a very specific research endeavor, Geospatial Factors Impacting Breast Cancer. The book provides important insights into this relatively new and rapidly developing field. It should be of value to all students of the Energy Balance & Cancer Series and a wide-ranging introduction to problems in cancer prevention and control for geographers, demographers and other researchers with a geospatial perspective. Moreover, it provides important information for all oncologists, endocrinologists, and behavioral modification professionals to better understand their patients in the context of their environment. It should also provide important considerations for physicians, scientists, public health professionals and disparity investigator planning clinical trials, community interventions and community planning.

Encyclopedia of Urban Studies Ray Hutchison, 2009-09-15 The United Nations estimates that by 2030, more than two-thirds of the total world population will live in urban areas. Most of this increase will take place not in Europe or in the United States but in the megacities and newly emerging urban regions of what used to be called the developing world. Urban studies is an expansive and growing field, covering many disciplines and professional fields, each with its own schedule of conferences, journals, and publication series. These two volumes address the specific theories, key studies, and important figures that have influenced not just the individual discipline but also the field of urban studies more generally. The Encyclopedia of Urban Studies is intended to present an overview of current work in the field and to serve as a guide for further reading in the field. Key Features Includes important work and traditions from each of the urban disciplines, including urban anthropology, urban economics, urban geography, urban history, urban politics, urban psychology, and urban sociology Addresses both the growth and expansion of urban areas (urbanization) and the nature and quality of urban life (urbanism) Demonstrates the international and interdisciplinary nature of the field with contributions from scholars in many different countries Confronts a number of important issues, ranging from individual problems of poverty to societal problems of provision of adequate housing and social exclusion Provides entries on a number of cities, including those in different historical periods and regions of the world and those that have been important in the development of urban studies Key Themes Disciplinary Approaches in Urban Studies Urban Studies—Topical Areas Urban Issues Urban Planning Urban Theory Urban Transportation Urban Culture Places Cities Persons The Encyclopedia of Urban Studies serves as an introduction to topics of significance in urban studies for an audience that includes undergraduate students, beginning graduate students of urban studies and the related urban disciplines, a broader public that has an interest in the new urban world, and even established teachers and scholars who are exploring new areas of study.

Asian American Society Mary Yu Danico, 2014-08-19 Asian Americans are a growing, minority population in the United States. After a 46 percent population growth between 2000 and 2010 according to the 2010 Census, there are 17.3 million Asian Americans today. Yet Asian Americans as a category are a diverse set of peoples from over 30 distinctive Asian-origin subgroups that defy simplistic descriptions or generalizations. They face a wide range of issues and problems within the larger American social universe despite the persistence of common stereotypes that label them as a “model minority” for the

generalized attributes offered uncritically in many media depictions. *Asian American Society: An Encyclopedia* provides a thorough introduction to the wide-ranging and fast-developing field of Asian American studies. Published with the Association for Asian American Studies (AAAS), two volumes of the four-volume encyclopedia feature more than 300 A-to-Z articles authored by AAAS members and experts in the field who examine the social, cultural, psychological, economic, and political dimensions of the Asian American experience. The next two volumes of this work contain approximately 200 annotated primary documents, organized chronologically, that detail the impact American society has had on reshaping Asian American identities and social structures over time. Features: More than 300 articles authored by experts in the field, organized in A-to-Z format, help students understand Asian American influences on American life, as well as the impact of American society on reshaping Asian American identities and social structures over time. A core collection of primary documents and key demographic and social science data provide historical context and key information. A Reader's Guide groups related entries by broad topic areas and themes; a Glossary defines key terms; and a Resource Guide provides lists of books, academic journals, websites and cross references. The multimedia digital edition is enhanced with 75 video clips and features strong search-and-browse capabilities through the electronic Reader's Guide, detailed index, and cross references. Available in both print and online formats, this collection of essays is a must-have resource for general and research libraries, Asian American/ethnic studies libraries, and social science libraries.

The Behavior Therapist ,1990

Sick Architecture Beatriz Colomina,2025-10-21 A thought-provoking essay collection about how architecture and sickness are surprisingly interwoven—from Ancient Greece to present-day New York City. Illnesses, wellness, and architecture are inseparable. Medical professionals and architects have always been in a kind of dance, often influencing one another, though the dance is not always synchronized. Drawing from a wide range of historical and contemporary case studies from ancient Greece to twentieth-century India to present-day New York City, *Sick Architecture* highlights a topic that has shaped our lives from the very beginnings of architecture to the outbreak of the Covid-19 pandemic and beyond. *Sick Architecture* goes beyond the sicknesses recognized by the medical profession to ask: What aspects of society may be ill, in need of care, or subject to pathologization? Similarly the book goes beyond physical buildings and cities to interrogate architecture's policy protocols and spatial logics. Its thirty-five diverse essays explore moments in global history when shifting notions of health became vectors for the development of architectural practice and discourse—as well as the reverse, when architecture acted as a reservoir and vector for illness.

Jewish Hometown Associations and Family Circles in New York Hannah Kliger,1992-07-22 An illuminating portrait of family and community life among Jewish immigrants from Eastern Europe, prepared in the 1930s through the WPA Federal Writers' Project, is published here in English for the first time. The WPA Yiddish Writers' Group, headed by I.E. Rontch, conducted an ambitious study of some 2,500 landsmanshaftn, associations of Jewish immigrants from the same hometown that played an important role in helping newcomers adjust to life in America. The results of the survey, an incomparable source for the study of Jewish immigration history, were disseminated in two Yiddish volumes in 1938 and 1939; however, the project ended before this abridged English version could be published.
