Proceedings of the International Conference on Education Research Reza Hosseini,

Giving Students a Say Myron Dueck, 2021-01-26 Assessment is an essential part of teaching and learning, but too often it leads to misleading conclusions—sometimes with dire consequences for students. How can educators improve assessment practices so that the results are accurate, meaningful, informative, and fair? Educator and best-selling author Myron Dueck draws from his firsthand experience and his work with districts around the world to provide a simple but profound answer: put student voice and choice at the center of the process. In this engaging and well-researched book, Dueck reveals troubling issues related to traditional approaches and offers numerous examples of educators at all levels who are transforming assessment by using tools and methods that engage and empower students. He also shares surprising revelations about the nature of memory and learning that speak to the need for rethinking how we measure student understanding and achievement. Readers will find sound advice and detailed guidance on how to * Share and cocreate precise learning targets, * Develop student-friendly rubrics linked to standards, * Involve students in ongoing assessment procedures, * Replace flawed grading systems with ones that better reflect what students know and can do, and * Design structures for students' self-reporting on their progress in learning. Inspired by the origins of the word assessment—derived from the Latin for to sit beside—Dueck urges educators to discard old habits and instead work with students as partners in assessment. For those who do, the effort is rewarding and the benefits are significant

Developing an Innovative Teaching Concept: "Hidden Champions. Departure to Globalia" Roman Horschig, 2015-12-02 Master's Thesis from the year 2015 in the subject Business economics - Miscellaneous, grade: 1,0, , language: English, abstract: The aim of this thesis is to contribute valuable input to the process of teaching in general. New ideas and teaching concepts are required due to fast changing educational circumstances. By developing a teaching concept that increases the involvement of students throughout the whole semester this thesis adds new ideas in the area of modern teaching. Professors, students and other members of the staff have been interviewed to find out what good teaching is about. After gathering information and interpretation of the findings, the thesis describes teaching tools that fit into a new innovative teaching concept. Especially Hidden Champions show new ways to compete in a highly competitive market. Therefore the lecture, which is the basis of the whole concept, discusses these companies. They are extremely successful and mostly unknown by the general society. Hidden Champions and their factors for success are core topics of the thesis. Furthermore, elements like a power point presentation and the way of using the teaching tools are described. The results of the thesis show that many issues in teaching are already at a high quality level, but there are many possibilities to add new ideas. The point of improvement the thesis works on is to continuously motivate students throughout the whole semester.
