Beating the Odds Mary Ellen Snodgrass, 2008-08-30 Many famous people have overcome difficult circumstances and gone on to become successful in their fields. This book profiles the lives of 75 courageous and persistent people who have triumphed over adversity. These individuals have conquered a range of problems, including physical, psychological, social, and economic handicaps. Individuals profiled come from a range of professions and reflect battles against religious prejudice, medical conditions, eating disorders, poverty, and other social ills. Among the people profiled are Mitch Albom, Hillary Clinton, Magic Johnson, Stephen King, Greg Louganis, and Henry Winkler. The volume includes an historical timeline, a list of relevant films documenting the achievements of these superstars, and a general bibliography. Some of the most successful people in our society have overcome great odds in order to achieve their dreams. Through courage and persistence, they have triumphed over a range of adversities and serve as models for students faced with similar circumstances. This book profiles the struggles and accomplishments of 75 such individuals from all walks of life. Each entry highlights the physical, psychological, social, or economic struggles of the person and discusses how the person won their battle against adversity. Among the individuals profiled are: Mitch Albom, Roseanne Barr, Sandra Cisneros, Hillary Clinton, Pat Conroy, Michael J. Fox, Magic Johnson, Stephen King, Greg Louganis, Jessica Lynch, Colin Powell, Salman Rushdie, Martin Sheen, Henry Winkler, and many more. The volume closes with an historical timeline, a list of films related to the achievements of these superstars, and a general bibliography. In addition to inspiring students to succeed against all odds, the book promotes respect for diversity and explores a host of social issues related to religious prejudice, eating disorders, medical conditions, poverty, and other concerns.

Felimanuel Series Emmanuel Gbireh, 2012 It is chiefly through books that we enjoy intercourse with superior minds. In the best books, great men talk to us, give us their most precious thoughts, and pour their souls into ours. God be thanked for books. They are the voices of the distant and the dead, and make us heirs of the spiritual life of past ages. Books are true levelers. They give to all who will faithfully use them, the spiritual presence of the best and greatest of our race. William Ellery Channing Some of the things you will discover in Felimanuel Series, The Magical Secret to Success in English Language, Essay Writing for Junior and Senior High Schools Volume 1, With Bonus Success Secrets: The book is comprehensively, logically and coherently written and the language used is also easy to understand; hence, little or no

further explanation is needed. The book teaches how to choose examination questions and answer them without sweat. Sample outlines/plans and sample essays have been written to guide pupils and students. The bonus success secrets will help pupils and students to pass in all seemingly difficult subjects like mathematics and science. The bonus success secrets will also guide pupils and students towards the attainment of greater success in life. The book has been designed in such a way that it can be used for examination purposes and for other practical uses in the day-to-day life of whoever uses it faithfully. In writing this book on English Language, essay writing, I decided to move away from the traditional way of some authors flooding their English Language, essay writing books with so many sample essays based on my experiences as an English teacher some years back. Many pupils / students have the habit of memorizing written essays found in books and reproduce them during examinations, class exercises or when given project/home work when they see that the question being asked is similar to the answered one they came across. I hope the experts in the educational sector will agree with me that this does not augur well for the proper development of the child because he/she would not have the opportunity to think and plan on his /her own before writing a script with originality (I stand to be corrected if I am mistaken). It is in line with this that I have given only single sample essays per essay topic treated with more suggested outlines/plans. Most people often fail to plan their lives and this usually have disastrous effects on them. Also in writing examination, most candidates fail to plan their essays before answering selected questions. As the old adage says, If you fail to plan, you plan to fail. It is based on the above that in writing this book, I dedicated the first chapter to the basics of essay writing. Below is an excerpt of chapter one of the book. After highlighting on the basics of essay writing, I went ahead to discuss what paragraphs are and how they can be used in our daily writings. This is followed by the use of punctuation marks. Here again, I have given a comprehensive write-up as to how punctuation marks can be used to enrich our written works. Other topics covered in the book are writing of narrative essays, descriptive essays, friendly letters, semi- formal letters, summary writing, argumentative essays, speeches and talks, report writing, articles for publication, expository essays and advertisement. After a comprehensive, logical and coherent treatment of each topic, I followed up with sample questions, outlines/plans and essays. These are only to serve as a guide to users of the book. I will like to take this opportunity to entreat teachers to encourage pupils /students whom they teach to learn how to write an outline/plan and to use it when answering essay related questions, not only with English language, but with all other subjects that they deem it fit to apply. Some people may not see the usefulness of the outline/plan, but it helps the pupil / student

Saving Students from a Shattered System Eldon 'Cap' Lee, Mary Gale Budzisz, 2010-12-16 Based on real experiences of those in the trenches, this book describes a new delivery system of education designed to allow all students to succeed with the help of teachers who are led by their passion to do what is right for students. Lee and Budzisz take the reader step-by-step through not only what is wrong with the system of education and what must be changed for education but what the

school of the future must look like. Education's goal should be to make sure that students do more than maintain an existence in their adult lives—they must flourish, living life to the fullest. This detailed plan leaves no stone unturned in providing the tools to build a quality education program for all.

Think Big Ben Carson, M.D., Cecil Murphey, 2009-08-30 Do you feel like your life is a series of shattered dreams? Have you bought into the lie that you'll never amount to anything? In *Think Big*, Dr. Ben Carson is here to tell you some good news: none of that is true. By learning to think big, Ben rose from his humble beginnings to create a life full of amazing accomplishments and international renown. He climbed from the academic bottom of his fifth-grade class to become—at age thirty-three—head of pediatric neurosurgery at Johns Hopkins Hospital. He learned that he had potential, but more importantly, he learned how to unleash it—and you can too. If you put the principles in this book in motion, you can transform your life into one you'll love. As Dr. Carson teaches you how to unlock your own potential, you'll also learn: The importance of surrounding yourself with a supportive community How to look for God's gifts in your daily life The key to shifting your perspective and thinking big Your life is big—far bigger than you've ever imagined. Inside these pages lie the keys to recognizing your full potential. If you're ready to build a life that is rewarding, significant, and abundantly fruitful, let *Think Big* be your guide.

You Have a Brain Ben Carson, M.D., 2015-02-03 Eight proven principles to help you overcome your self-doubt, conquer your fear of the future, reverse negative thoughts about yourself, and hurdle any other obstacles standing between you and your dreams. But instead of letting his circumstances control him, Dr. Carson took control of his attitude and actions, leading to his discovery of eight straightforward but revolutionary principles that helped shape his future. In *You Have a Brain*, Dr. Carson unpacks the eight important parts of T.H.I.N.K. B.I.G.—Talent, Honesty, Insight, Being Nice, Knowledge, Books, In-Depth Learning, and God—and presents the stories of people who demonstrated those things in his life. Through the advice and real-world examples laid out in these pages, you will learn how to incorporate these T.H.I.N.K. B.I.G. principles into your own life so that you, like Dr. Carson, can embrace an amazing future filled with incredible success. *You Have a Brain*: Includes discussion questions at the back of the book Unpacks the eight essential parts of Thinking Big: Talent, Honesty, Insight, Strong People Skills, Knowledge, Books, In-Depth Learning, and God Is written by Dr. Ben Carson, a world-renowned neurosurgeon, former presidential candidate, and current Secretary of Housing and Urban Development (HUD) Teaches

Believing Minds. Fernando José Walsh, 2025-10-09 Is science truly the enemy of faith? Can a practicing scientist believe in God? Is there an inevitable clash between scientific knowledge and the Bible? From Copernicus (1473-1543) to contemporary researchers, 200 highly distinguished scientists provide compelling testimony that science clearly affirms a Creator, one perfectly consistent with the God revealed in the Scriptures. This book delves into the lives and powerful convictions of these titans of science who were also giants of faith. The culmination of years of deep investigation, this book uncovers a profound truth often obscured by media influence: the supposed incompatibility between science and faith is a fallacy. Instead, it reveals that modern science was born and accelerated by thinkers who based their research on the foundational belief in a wisely designed universe. They saw nature's laws as the imprint of a Supreme Creator who empowered humanity, created in His image, to discover these laws for universal good. Explore the inspiring journeys, remarkable achievements, and deep spiritual convictions of legendary figures like Newton, Galileo, Pascal, Morse, Pasteur, Edison, Marconi, and Einstein. Featured within are over 30 Nobel Prize winners in crucial scientific fields, alongside astronauts whose perspectives were transformed by their experiences. Grounded in extensive, meticulous research, the book champions its thesis with undeniable clarity: Science demonstrates that God exists (Derek Barton, 1918-1998, Nobel Laureate in Chemistry 1969).
