**Birdmen, Batman, and Skyflyers** Michael Abrams,2007-12-18 The Wright Brothers were wimps. Or so you might think after reading this account of their unsung but even more daring rivals—the men and women who strapped wings to their backs and took to the sky. If only for a few seconds. People have been dying to fly, quite literally, since the dawn of history. They've made wings of feather and bone, leather and wood, canvas and taffeta, and thrown themselves off the highest places they could find. Theirs is the world's first and still most dangerous extreme sport, and its full history has never been told. Birdmen, Batman, and Skyflyers is a thrilling, hilarious, and often touching chronicle of these obsessive inventors and eccentric daredevils. It traces the story of winged flight from its doomed early pioneers to their glorious high-tech descendants, who've at last conquered gravity (sometimes, anyway). Michael Abrams gives us a brilliant bird's-eye view of what it's like to fly with wings. And then, inevitably, to fall. In the Immortal Words of Great Birdmen... "Someday I think that everyone will have wings and be able to soar from the housetops. But there must be a lot more experimenting before that can happen." —Clem Sohn, the world's first batman, who plummeted to his death at the Paris Air Show in 1937 "The trouble was that he went only halfway up the radio tower. If he had gone clear to the top it would have been different." —Amadeo Catao Lopes in 1946, explaining the broken legs of the man who tried his wings "One day, a jump will be the last. The jump of death. But that idea does not hold me back." —Rudolf Richard Boehlen, who died of jump-related injuries in 1953 "It turned out that almost everyone from the thirties and forties had died. That just made me want to do it more." —Garth Taggart, stunt jumper for The Gypsy Moths, filmed in 1968 "You have to be the first one. The second one is the first loser." —Felix Baumgartner, who in 2003 became the first birdman to cross the English Channel

And to accomplish any of that you'd also have to believe that they not only exist, but they are human, their far more human than you or I, that the possibility that you and I aren't what we thought, that maybe we're the Aliens of this planet and not Awen and her kind.... **Winging It with You** Chip Pons, 2025-06-10 Popular bookstagrammer Chip Pons's gay rom-com about two men who impulsively pose as a couple to compete in a reality show contest just minutes after meeting at an airport, and their run-in with the very real feelings that start to simmer between them. Catching flights . . . and feelings Asher Bennett thought his relationship was just fine. Until he's unceremoniously dumped at the Boston airport ahead of the world-wide travel competition reality show, *The Epic Trek*. Armed with only a ticket and righteous indignation, Asher finds the closest solace he can: a mimosa and mozzarella sticks combo at an airport TGI Fridays. Still, Asher is determined to find a new partner and luckily, right in front of him is a smooth-talking airline pilot ready for takeoff. Theo Fernandez has been grounded. He's the

only pilot that has never taken a vacation and the edict has been passed down: prove you're prioritizing a work-life balance or say goodbye to your wings. As he struggles to bask in his new downtime, without reconnecting with his family, he stumbles upon the perfect opportunity. The handsome guy who stole his mozzarella sticks at his favorite terminal eatery has a sudden opening for a partner . . . on a nationally televised reality show. Theo and Asher buckle up to fake date for the cameras, but as they do the undercurrents of attraction make them wonder if their on-screen chemistry hints at something bigger. Do they have the courage to leave behind their baggage, and wing it together for another chance at love?

**Leonardo da Vinci Who** Ignatius Simmons, AI, 2024-01-02 Leonardo da Vinci Who explores the remarkable intersection of art and science through the life and work of history's most famous polymath. Moving beyond the common view of da Vinci as merely the Mona Lisa's creator, this comprehensive study reveals how his unique approach to observation and problem-solving revolutionized multiple fields during the Renaissance. The book examines how his unconventional background—born illegitimate and lacking formal classical education—may have contributed to his innovative thinking and extraordinary achievements across disciplines. Through chronologically organized chapters, readers journey from da Vinci's early artistic apprenticeship in Florence to his groundbreaking anatomical studies and engineering innovations in Milan. The narrative weaves together his various pursuits, demonstrating how his artistic skills enhanced his scientific observations and vice versa. For instance, his meticulous study of bird flight informed both his mechanical designs and his artistic representations of motion, while his anatomical drawings combined scientific accuracy with artistic beauty. Set against the vibrant backdrop of 15th-century Italy, the book draws from da Vinci's own notebooks, contemporary accounts, and modern scientific analysis to present a uniquely integrated view of his genius. Rather than focusing solely on biographical details, it emphasizes the interconnected nature of his work—from engineering and anatomy to art and physics—showing how his methodologies continue to inform modern approaches to innovation and creative problem-solving. This balanced approach makes complex concepts accessible while maintaining scholarly integrity, offering valuable insights for both general readers and specialists in art and science.
