**A Military History of the Modern Middle East** James Brian McNabb, 2017-03-09 This timely study synthesizes past history with the major military events and dynamics of the 20th- and 21st-century Middle East, helping readers understand the region's present and look into its future. The Middle East has been and will continue to be a major influence on policy around the globe. This work reviews the impact of past epochs on the modern Middle East and analyzes key military events that contributed to forming the region and its people. By helping readers recognize historical patterns of conflict, the book will stimulate a greater understanding of the Middle East as it exists today. The work probes cause and effect in major conflicts that include the fall of the Ottoman Empire, the World Wars, the Arab-Israeli wars, and the U.S. wars with Iraq, examining the manner in which military operations have been conducted by both internal and external actors. New regional groups—for example, the Gulf Cooperation Council (GCC)—are addressed, and pertinent events in Afghanistan and Pakistan are scrutinized. Since military affairs are traditionally an extension of politics and economics, the three are considered together in historical context as they relate to war and peace. The book closes with a chapter on the Arab Awakening and its impact on the future balance of power.

**Students' Aid to Pre-modern Middle Eastern Studies** John A. K. Leslie, 1999 This reference book ranges through the pre-history and ancient and medieval history of the Middle East, following the Arab and Ottoman conquests into the Moorish kingdoms of Spain, Egypt's expansion into the Sudan and the Turkish empire in the Balkans.'

Mapping Gendered Routes and Spaces in the Early Modern World Merry E. Wiesner-Hanks, 2016-03-03 How did gender

figure in understandings of spatial realms, from the inner spaces of the body to the furthest reaches of the globe? How did women situate themselves in the early modern world, and how did they move through it, in both real and imaginary locations? How do new disciplinary and geographic connections shape the ways we think about the early modern world, and the role of women and men in it? These are the questions that guide this volume, which includes articles by a select group of scholars from many disciplines: Art History, Comparative Literature, English, German, History, Landscape Architecture, Music, and Women's Studies. Each essay reaches across fields, and several are written by interdisciplinary groups of authors. The essays also focus on many different places, including Rome, Amsterdam, London, and Paris, and on texts and images that crossed the Atlantic and the Mediterranean, or that portrayed real and imagined people who did. Many essays investigate topics key to the 'spatial turn' in various disciplines, such as borders and their permeability, actual and metaphorical spatial crossings, travel and displacement, and the built environment.

*Plague in the Early Modern World* Dean Phillip Bell, 2019-01-08 *Plague in the Early Modern World* presents a broad range of primary source materials from Europe, the Middle East, North Africa, China, India, and North America that explore the nature and impact of plague and disease in the early modern world. During the early modern period frequent and recurring outbreaks of plague and other epidemics around the world helped to define local identities and they simultaneously forged and subverted social structures, recalibrated demographic patterns, dictated political agendas, and drew upon and tested religious and scientific worldviews. By gathering texts from diverse and often obscure publications and from areas of the globe not commonly studied, *Plague in the Early Modern World* provides new information and a unique platform for exploring early modern world history from local and global perspectives and examining how early modern people understood and responded to plague at times of distress and normalcy. Including source materials such as memoirs and autobiographies, letters, histories, and literature, as well as demographic statistics, legislation, medical treatises and popular remedies, religious writings, material culture, and the visual arts, the volume will be of great use to students and general readers interested in early modern history and the history of disease.

**Trade in the Pre-modern Era, 1400-1700** Douglas A. Irwin, 1996 This is the first title in *The Growth of the World Economy* series and collects together the most significant research and scholarship on a crucial period in the growth of international trade, from the fifteenth to the seventeenth centuries. This three hundred year span saw a dramatic expansion in the volume of world trade. Trade during this period became more truly international due to the rise of the nation-state in

Europe. Articles are written by leading scholars around the world and take up such topics as the emergence of new world trade routes, trade in particular goods and commodities, European trade policies and mercantilism. With its focus on the beginnings of world trade, *Trade in the Pre-Modern Era, 1400-1700* will be an indispensable reference source for all researchers concerned with the initial development of both international trade and the expansion of the world economy.

**Genocide in the Middle East** Hannibal Travis, 2010 *Genocide in the Middle East* describes the genocide of the Armenians, Greeks, and Assyrians of the Ottoman Empire in the nineteenth and early twentieth centuries; of the Kurds and other persons living under Saddam Hussein in northern Iraq in the late 1980s; and of the Dinka, Nuba, Fur, Masalit, and Zaghawa peoples of Sudan from the 1970s to the present. It situates these crimes in their historical context, as outgrowths of intolerant religious traditions, imperialism and the rise of the nation-state, Cold War insurgencies and counterinsurgencies, and the global competition for resources and markets at the expense of indigenous peoples. This requires a more thorough investigation of the case law on genocide than has been attempted in the literature on genocide to date, including detailed accounts of the prosecutions of the leaders of the Ottoman Empire after World War I, of Saddam Hussein and other Iraqi officials after Operation Iraqi Freedom, and of President Omar Hassan al-Bashir and other leaders of Sudan by the International Criminal Court. Finally, the book explores emerging problems of genocidal terrorism, cultural genocide, and structural genocide due to starvation, disease, and displacement. The field of genocide studies has grown rapidly in recent years, fueled by interest in the Armenian genocide, the wars in the former Yugoslavia and Iraq, and the widespread massacres in southern Sudan and Darfur. While several comparative studies of the Armenian genocide, the Holocaust, and other genocides have been published, none of them focuses on genocide in the Middle East and North Africa since the nineteenth century. This book provides a comprehensive history of genocide in the broader Islamic world, with a particular focus on the twentieth century. It is of interest to general readers, undergraduates, graduate students, academics, journalists, and legal professionals, and will be useful as a text for courses on International Law, International Criminal Law, Law and Religion, Middle East Studies, International Relations, Public Policy, Criminal Justice, or World History. The comprehensive research is breath-takingly evident. This historical account of the lesser known genocidal conflicts is incredibly revealing. Perhaps the best thing one could say about this book is that the familiar adage--"Those who ignore history are bound to repeat it"--reverberates throughout this intensely engaging volume. -- ASIL UN21 Newsletter This ambitious book in its research and coverage tells a sorry tale of mankind's inhumanity and intolerance over millennia of genocidal deeds and rhetoric. A fast-moving narrative reaches from biblical times to Darfur, describing tragic events accompanied by selective quotations from their participants and observers. Genocide may be a recently invented term, but its occurrences based on a variety of causes and reasons seem to have been a deep part of the human experience of group interactions. -- Henry Steiner,

Professor of Law, Emeritus, Harvard Law School, and co-author, *International Human Rights in Context: Law, Politics, Morals* (Oxford and New York: Oxford University Press, 3d ed. 2007) In *Genocide in the Middle East*, Hannibal Travis breaks new ground in genocide studies by unveiling the full panoply of genocidal processes in the Middle East and West Asia as no previous scholar has. But he does much more: in terms of its twentieth and twenty-first-century coverage, this is simply the most expansive, detailed, and up-to-date history of genocide we possess. -- Adam Jones, Associate Professor, Political Science, University of British Columbia Okanagan, and author of *Genocide: A Comprehensive Introduction* (London: Routledge, 2006) Professor Travis' study of genocide, and the contribution he makes for a better understanding of the Assyrian one, is an invaluable event. ... This is not a book of sociology, but of historical review and analysis. As such, it deserves the highest of accolades. -- *Journal of Assyrian Academic Studies*

*The Oxford Encyclopedia of the Modern Islamic World: Faqi-Leba* John L. Esposito, 1995 This unique reference is the first comprehensive encyclopedia dedicated to the institutions, religion, politics, and culture in Muslim societies throughout the world. Placing particular emphasis on the nineteenth and twentieth centuries, *The Oxford Encyclopedia of the Modern Islamic World* contains over 750 articles in four volumes. The focus throughout is on the Islamic dimension of the Muslim experience in recent history, and background articles ground the information in its historical context and ensure continuity. Entries address political and social action as well as formal texts, and emphasis is placed on the practice and theory of Islam in Muslim societies around the globe. Unlike more limited explorations of Islam, this work looks at Muslim societies in the Arab heartland as well as in South and Southeast Asia, and even in Europe and the Americas. Thus it is an invaluable resource offering extensive comparative and systematic analyses of Islamic beliefs, institutions, movements, practices, and peoples on an international scale. Topical categories covered include history and geography; schools of thought; religious beliefs; theology and philosophy; mysticism; religious practice, devotionism, and ritual; religious law; politics; economics; culture and society; and biographies. Alphabetically arranged articles range from brief 500-word essays to major interpretive and synthetic treatments of topics such as the Islamic state, pilgrimage, law, marriage, and foreign relations. Related entries cover such topics as social and political movements, women, Muslim minorities, human rights, Islam in the West, and interreligious affairs. Truly multidisciplinary, this work reflects the breadth and depth of contemporary scholarship in Islamic studies, combining the tools of the humanities and social sciences to examine the interrelationship of religion, politics, and culture in Muslim societies and to explain the changing realities of Muslim life. Designed for easy use by both scholars and students, the work has an index and an extensive system of cross-references that provide easy access to the network of related articles throughout the encyclopedia. Entries are written by Muslim and non-Muslim scholars from around the world. Unique in its focus on the modern Islamic world, this encyclopedia is an invaluable reference for anyone concerned with

Islam: scholars and students of many disciplines, government and media analysts who increasingly require an understanding of the Muslim world, and interested lay readers who are becoming more and more familiar with Islamic politics and culture.
