*The Truth about Cancer* Ty Bolinger, 2015 Cancer touches more lives than you may think. According to the World Health Organization, one out of three women alive today, and one out of two men, will face a cancer diagnosis in their lifetime. To Ty Bollinger, this isn't just a statistic. It's personal. After losing seven members of his family to cancer over the course of a decade, Ty set out on a global quest to learn as much as he possibly could about cancer treatments and the medical industry that surrounds the disease. He has written this book to share what he's uncovered-some of which may shock you-and to give you new resources for coping with cancer in your life or the life of someone you love. As Ty explains, there are many methods we can access to treat and prevent cancer that go well beyond chemotherapy, radiation, and surgery; we just don't know about them. *The Truth about Cancer* delves into the history of medicine-all the way back to Hippocrates's credo of do no harm -as well as cutting-edge research showing the efficacy of dozens of unconventional cancer treatments that are helping patients around the globe. You'll read about the politics of cancer; facts and myths about its causes (a family history is only part of the picture); and the range of tools available to diagnose and treat it. If you're facing a cancer diagnosis right now, this book may help you and your health-care provider make choices about your next steps. If you're already undergoing conventional treatment, it may help you support your health during the course of chemo or radiation. If you're a health-care provider and want to learn all you can to help your patients, it will expand your horizons and inspire you with true stories of successful healing. And if you just want to see cancer in a new light, it will open your eyes.

*The Truth about Cancer* Ty M. Bollinger, 2016 After losing several family members to cancer, Ty Bollinger refused to accept the notion that chemotherapy, radiation and surgery were the most effective treatments available for cancer patients. He began a quest to learn all he possibly could about alternative cancer treatments and the medical industry. What he uncovered was shocking. There is ample evidence to support the allegation that the war on cancer is largely a fraud and that multinational pharmaceutical companies are running the show

Summary, Analysis & Review of Ty Bollinger's *The Truth About Cancer* by Instaread Preview *The Truth About Cancer* by health advocate Ty Bollinger is a nonfiction book that details the little-known history of the modern medical establishment and how its profit-driven agenda forever altered the course of medicine, particularly the treatment of cancer. Bollinger has

studied alternative and nontoxic treatments for cancer, as well as cancer prevention tactics, as part of an effort to educate the public and especially cancer patients about how to combat cancer without harsh drugs or procedures. Cancer is a chronic disease that occurs when healthy cells come into contact with carcinogens or other toxins and then become malignant. The formation of cancer cells is a normal occurrence, and the immune system is naturally designed to ward off the growth of these mutated cells before they cause disease or form tumors. But the immune system itself can be compromised, possibly because of overexposure to environmental toxins or lack of proper nutrients.... We are so happy and grateful to Bob Wright of the AACI/IWARC for this 'miracle' of natural healing and their prayers. **End of Oblivion: The Great Deceit and Why We Need to Reclaim Our Spiritual Evolution** Aleksandar Ostojic, 2019-08-08 End of Oblivion: The Great Deceit and Why We Need to Reclaim Our Spiritual Evolution is an informal overview of the current state of humanity and the world, and delves into how our perceptions of reality have been drastically distorted to the point where the majority of the population cannot perceive distortion any longer. Deceit is present in every area of our lives, but beneath these secular manifestations, deeper metaphysical undercurrents are interlacing with our spiritual, evolutionary direction. Armed with a wealth of factual evidence as well as personal observations, the author puts forth a compelling explanation as to who is really behind this great deceit and offers choices on how to break free for those curious enough to ponder. It is time to remove our blindfolds, to consciously choose our path, and to reclaim the true purpose of our being - our spiritual evolution. The book reflects on the Law of One material.

Julia didn't care what the numbers said. She defied the odds and found a path where few had dared to look. Julia Burns inspires others who face seemingly insurmountable challenges to take heart, to advocate for themselves, and to pursue the path that makes them feel well and whole, no matter the odds.

**Cancer and Society** Eric H. Bernicker, 2019-03-04 While a number of books have looked at the intersection between human health in general and other topics, such as climate change or diet, this book focuses specifically on cancer as it impacts and is impacted by social justice issues. The massive explosion of research knowledge of cancer immunology and genomics is holding out great promise of therapeutic advances, yet other human actions—climate change, pollution, business decisions, advertising – are fostering health inequalities as well as increasing risks. Those involved in cancer care and research are in a unique position to let their experiences and knowledge inform the public, yet very often have not taken strong public roles when it comes to discussing issues surrounding tobacco, climate change and health risks, financial toxicity of treatments, and diet choices. Written by a multidisciplinary team of authors and for medical oncologists, cancer researchers, occupational health workers, and related medical students, residents, and fellows, this book encourages oncologists to address public health care and the societal issues associated with cancer risk. This volume discusses the overarching theme of environmental justice and oncology, focuses on business and cancer (such as clinical trials, drug development and profits, and global disparities), as well as animals and cancer.
