War on Ivermectin Pierre Kory, Jenna McCarthy, 2023-06-06 Big Pharma and health agencies cry, "Don't take ivermectin!" A media storm follows. Why then, does the science say the opposite?" Ivermectin is a dirty word in the media. It doesn't work. It's a deadly horse dewormer. Prescribe or promote it and you'll be called a right-wing quack, be banned from social media, or lose your license to practice medicine. And yet, entire countries wiped out the virus with it, and more than ninety-five studies now show it to be unequivocally effective in preventing and treating Covid-19. If it didn't work, why was there a coordinated global campaign to cancel it? What's the truth about this decades-old, Nobel Prize-winning medication? The War on Ivermectin is the personal and professional narrative of Dr. Pierre Kory and his crusade to recommend a safe, inexpensive, generic medicine as the key to ending the pandemic. Written with Jenna McCarthy, Dr. Kory's story chronicles the personal attacks, professional setbacks, and nefarious efforts of the world's major health agencies and medical journals to dismiss and deny ivermectin's efficacy. Part personal narrative, part scathing expose, The War on Ivermectin highlights the catastrophic impacts of the mass media censorship and relentless propaganda that led to the greatest humanitarian crisis in history. Although numerous studies and epidemiologic data have shown that millions of lives were saved globally with the systematic use of ivermectin, many more millions perished. This carnage was the direct result of what Dr. Kory eventually discovered to be the pharmaceutical industry's silent but deadly war on generic medicines and the corrupt, captured medical and media systems that allow it to continue. For anyone who thought Covid-19 was the enemy, Dr. Kory's book will leave no doubt that the true adversary in this war is a collective cabal of power-hungry elites who put profits over people and will stop at nothing in their quest for control. The War on Ivermectin is published through ICAN PRESS, an imprint of Skyhorse Publishing. ICAN (Informed Consent Action Network) is a nonprofit organization investigating the safety of medical procedures, pharmaceutical drugs, and vaccines while advocating for people's right to informed consent.

[A Patriot's History of Globalism](#) Larry Schweikart, 2024-02-20 Larry Schweikart has won wide acclaim for his number one New York Times bestseller, A Patriot's History of the United States. Now, with A Patriot's History of Globalism, Schweikart shows that globalism, or the attempt to form a one-world government is nothing new. In the wake of Napoleon's defeat in

1814, the globalists of the day (mostly monarchs) sought to create a governing arrangement for Europe. Within forty years, three of the major participants were at war with each other. After World War I, they tried again at Versailles, this time even more aggressively changing boundaries of nations and moving populations. That attempt only lasted twenty years before another major war between the participants. Yet again, after World War II, globalists used the threat of the atomic bomb to try to form an international government with the United Nations. Most recently, the World Economic Forum and World Health Organization are attempting to minimize nationalities with global control of money and medicine. But there are signs this tide has been reversed and is finally in decline. A Patriot's History of Globalism is the gold standard text for the history of globalism.

Rise of the Fourth Reich Steve Deace, Daniel Horowitz, 2023-02-14 A Wall Street Journal Bestseller COVID-19 fascism was the worst tyranny in American history, and those responsible must be held accountable so nothing like it ever happens again. COVID-19 was used to launch the worst tyranny in American history, which we're still facing even now. It was also the worst oppression in global history since the Third Reich. Just as that evil required a reckoning at Nuremberg, this one does as well. In this Nuremberg 2.0, we call witnesses that our elected representatives and law enforcement agents need to hear from in order to know the full extent of the evil, and who is responsible for it—so that this never happens again.

Dark Agenda Samuel Dancey, 2022-11-08 What is the purpose of the medical industry? Is the health of the people really its goal? Medicine has become a sacred topic, unchallenged and undiscussed. But now, more than ever, it needs to be examined more closely. Samuel Dancey argues that the biggest truth in medicine is not about your health, but about making the most money. From Dancey's point of view, the COVID-19 pandemic lays bare this truth. The powers that be went to great effort and expense to ensure that only their side of the narrative was ever given to the public. What were they hiding? Citing a variety of sources that are not widely known by the public, Dancey gives a perspective very different from the one seen on the six o'clock news: the COVID pandemic was the world's biggest medical hoax. Dark Agenda looks at the different aspects of pandemic response around the world to support this claim, contending that thousands of doctors and researchers were bullied and threatened with the loss of their medical licenses if they spoke against the mainstream story. Dancey argues that tactics of fear and isolation were used to coerce the public into unreasonable restrictions, such as masking and social distancing, and eventually people were forced to get a vaccine that was eventually proven to be unsafe and ineffective. Why all this political interference and scientific manipulation? The answer, says Dancey, is profit. Imagine a medicine that must be taken by every single individual on the planet: seven billion people getting a vaccination three, four, or even five times. That

translates to a lot of money enough to stage a pandemic, for starters. The mishandling of the COVID-19 outbreak and the experimental vaccine have caused far more deaths and other problems than the coronavirus itself. These will remain with us for years to come.

African Health Leaders Francis Omaswa,Nigel Crisp,2014 Most accounts of health and healthcare in Africa are written by foreigners. African Health Leaders: Making Change and Claiming the Future redresses the balance. Written by Africans, who have themselves led improvements in their own countries, the book discusses the creativity, innovation and leadership that has been involved tackling everything from HIV/AIDs, to maternal, and child mortality and neglected tropical diseases. It celebrates their achievements and shows how, over three generations, African health leaders are creating a distinctively African vision of health and health systems. The book reveals how African Health Leaders are claiming the future - in Africa, but also by sharing their insights and knowledge globally and contributing fully to improving health throughout the world. It illustrates how African leadership can enable foreign agencies and individuals working in Africa to avoid all those misunderstandings and misinterpretations of culture and context which lead to wasted efforts and frustrated hopes. African Health Leaders challenges Africans to do more for themselves; build on success; tackle weak governance, corrupt systems and low expectations and claim the future. It sets out what Africa needs from the rest of the world in the spirit of global solidarity - not primarily in aid, but through investment, collaboration, partnership and co-development. It concludes with a vision for improvement based on three foundations: an understanding that 'health is made at home'; the determination to offer access to health services for everyone; and an insistence on the pursuit of quality.
