**Anna-Maria De Cesare, Giampaolo Salvi**

**Approaches to the Typology of Word Classes** Petra Maria Vogel, Bernard Comrie, 2000 The series is a platform for contributions of all kinds to this rapidly developing field. General problems are studied from the perspective of individual languages, language families, language groups, or language samples. Conclusions are the result of a deepened study of empirical data. Special emphasis is given to little-known languages, whose analysis may shed new light on long-standing problems in general linguistics.

**The Oxford Handbook of Word Classes** Eva van Lier, 2023 This handbook explores multiple facets of the study of word classes, also known as parts of speech or lexical categories. The contributions showcase the importance of word classes for the whole discipline of linguistics, while also highlighting the many ongoing debates in the areas and outlining fruitful avenues for future research.

Manual of Romance Word Classes Anna-Maria De Cesare, Giampaolo Salvi, 2024-09-02 Word classes are linguistic categories serving as basis in the description of the vocabulary and grammar of natural languages. While important publications are regularly devoted to their definition, identification, and classification, in the field of Romance linguistics we lack a comprehensive, state-of-the-art overview of the current research. This Manual offers an updated and detailed discussion of all relevant aspects related to word classes in the Romance languages. In the first part, word classes are discussed from both a theoretical and historical point of view. The second part of the volume takes as its point of departure single word classes, described transversally in all the main Romance languages, while the third observes the relevant word classes from the point of view of specific Romance(-based) varieties. The fourth part explores Romance word classes at the interface of grammar and other fields of research. The Manual is intended as a reference work for all scholars and students interested in the description of both the standard, major Romance languages and the smaller, lesser described Romance(-based) varieties.

**Word Classes** Raffaele Simone, Francesca Masini, 2014-09-15 The universal and typological status of the notion of word class — closely related to part-of-speech systems, morphology, syntax and the lexicon-syntax interface — continues to be of major linguistic theoretical interest. The papers included in this volume offer a fresh look at the variety of current theoretical and descriptive approaches to word class issues, and present original analyses and new data from a number of languages.

The primary focus is on methods (including computational ones) and criteria for identifying and representing major word classes and subclasses in specific languages, with considerable attention also directed towards the characterization of the nature and role of minor — or neglected — word classes, including trans-categorization processes. The range of topics and perspectives covered makes this volume of considerable interest to both theoretical linguists and typologists.

*The Meaning of Word Classes* Lajos Marosán, 2006 Linguists who believe that word classes bear meaning are numerous; the author of this book, however, argues that this belief is untenable. This book proposes a new account of the claim that parts of speech have meaning - a view which has been present in grammars and some philosophical treatises ever since language was studied. The author presents questions of grammatical analysis, critically discussing the relevant views held by typologists and generativists, traditional grammarians and prototype theoreticians.
