**Case Studies from Primary Care Settings** Marie L. Talashek, 1998 This text is organized using a lifespan approach in dealing with health promotion, disease prevention, and common primary care illnesses management, all of which are integral parts of the patient care given by nurse practitioners and physician assistants. Illustrations, line drawings, and halftones illustrate pathologies or normal physical variations that cannot be explicated with the text. Selection of the case studies includes the 20 most common diagnoses seen in primary care settings as cited in the most recent National Ambulatory Medical Care Survey, as well as other common problems that primary care providers manage. The case studies also represent a cross cultural array of patients in a wide variety of settings, including private practices, government clinics. HMOs, not-for-profit clinics, and other ambulatory care sites, all of which may exist in urban, suburban, or rural areas.

The amalgam used to fill teeth is 40 to 50 percent mercury, a known poison. This book explains how mercury migrates from the teeth into the body, affecting our overall health in a dramatic manner. This groundbreaking book includes the following topics and questions: Mercury in Medicine and Dentistry; The History of Mercury in Medicine; The Arguments For and Against; Do we really have electricity in our mouths? Measurement of Mercury in the urine; How long does it stay in the body? Mercury in the body, where does it go? Does Mercury cause any changes in our tissues and organs? Does Mercury cause psychiatric and behavioural changes? Micromercurialism, signs and symptoms. This pioneering book is written in a clear, straightforward manner, ideal for the layman and professional who want to become aware of the body of information currently available on mercury toxicity from dental amalgams. Then, informed, each individual can draw his own conclusions.
