Backbone David H. Wagner,2016-10-18 A practical, step-by-step guide to help men know themselves deeply, root out weaknesses, enhance strengths, and upgrade their experience of life So many self-help books encourage men to get in touch with their feminine side if they truly want to embrace change. This book blows this theory out of the water, enabling men to transform themselves entirely—to find their mission; to live a life of strength, wisdom, and honor—while working with their positive masculinity instead of against it. Straight talking, down-to-earth, and humorous life coach David Wagner addresses the challenges that modern men typically face. He asks the reader to join him in a series of profound self-examination exercises and questions covering life purpose, male identity, spirituality, self-limitation, sexuality, relationships, fatherhood, and more. Every chapter offers practical advice and also includes observations and examples from David's own life as well as insights gained from the many clients and men's groups he has worked with over the years. Combining no-nonsense wisdom with brutally honest exercises, Backbone is the ultimate man's handbook to understanding himself, his purpose, his passion, and his power.

Gerontologic Palliative Care Nursing Marianne Matzo,Deborah Witt Sherman,2004 Older adults afflicted with progressive, eventually fatal, chronic illness have care needs and personal priorities that tend to focus on living well despite the disease. At this phase of life, the wish is for symptom relief, maintenance of activities, concern for family, and preparation for death and bereavement. When progressive disability marks the last months and years, the patient should remain focused on living life as fully as possible until its end. Major advances in enabling function and managing symptoms have taken place in the past decade or two. People who once would have suffered terribly from pain can now expect to be comfortable with aggressive pain and symptom management. The challenge in today's nursing practice is that nurses work in a care system that was not designed to deal with the challenges posed by large numbers of persons coming to the end of life at the same time. Nurses are not adequately prepared to provide quality, compassionate care for persons who are old, sick, and eventually dying. Matzo and Sherman's new book provides a valuable resource for practicing nurses at all levels in the health care continuum who care for older adults at the end of life. The goal of the book is to enhance quality of life for older adult patients and families who have progressive, incurable illnesses. Focuses on quality end-of-life nursing care and its impact from a palliative care perspective. Addresses active and compassionate care therapies to enhance physical, psychological, social, and spiritual domains of life. Explores the spiritual, social, and psychological aspects of key nursing competencies at the end of life and progresses to the more evidence-based information and interventions related to pain, symptom management, disease progression, and care of the dying elder. Includes Case Studies which help put the content into a more humanistic perspective. Provides Evidence-Based Practice boxes that apply current research to findings.
