Entrenamiento en circuito Manfred Scholich, 1991-01-01 Desde 1958, cuando Morgan y Adamson desarrollaron este tipo de entrenamiento, sus posteriores modificaciones, en todos los campos de la educación física y del deporte, imponían un trabajo sustancioso y a fondo en esta materia. El realizado por el autor recurre para sus propuestas a sus observaciones directas y sus investigaciones comprobadas por médicos deportivos. En todos los casos ha utilizado la medición de la frecuencia del pulso, antes y después de la carga, como un método sencillo, evaluándola debidamente junto con la capacidad de recuperación del entrenado. Lo que en un principio fue calificado como algo tan sólo novedoso o de moda, integra actualmente todo tipo de deportes, incluyendo el entrenamiento rehabilitatorio. El entrenamiento en circuito, por su organización y método, brinda una serie de ejercicios tendientes a desarrollar y perfeccionar las formas más simples y más complejas del movimiento, acentuando el grado y duración del efecto de la carga mediante exigencias corporales ya conocidas y dominadas. Los programas, dosificados en función de objetivos, ámbitos, volúmenes, duración, intensidad, densidad, frecuencia y variación, son fiel reflejo de una exactitud expositiva que no decae ni un solo instante. INDICE Prólogo 1. Definiciones. 2. Consideraciones sobre las leyes que regulan el desarrollo de las capacidades físicas del rendimiento. 3. Tipo y grado de la carga interna como expresión de la relación recíproca en la unidad dialéctica, entre la intensidad y el volumen de la carga externa. 4. Métodos básicos para el desarrollo de las capacidades condicionales. 5. El entrenamiento en circuito: una forma organizativo-metodológica del entrenamiento de la condición. 6. Entrenamiento en circuito según el método de rendimiento en duración. 7. Entrenamiento en circuito según el método extensivo de intervalos. 8. Entrenamiento en circuito según el método intensivo de intervalos. 9. Entrenamiento en circuito según el método de repeticiones. 10. Organización y ejecución del circuito en taller. 11. Entrenamiento en circuito con ejercicios en parejas. 12. Entrenamiento en el hogar. 13. Evaluación del rendimiento en el deporte escolar. 14. Sistematización de los ejercicios según la clasificación anatómica y los diferentes grados de carga. 15. Desarrollo y completamiento de la capacidad especial de rendimiento a través del entrenamiento en circuito.

Tratado de Psiquiatría del niño y adolescente Mardomingo Sanz, María Jesús, 2015-12-01 El Tratado de Psiquiatría del niño y del adolescente propone al lector una exposición panorámica y detallada de la Psiquiatría Infantil de nuestro tiempo, destacando los avances de la investigación de las últimas décadas, sus aplicaciones a la práctica clínica y las perspectivas para el futuro. Ofrece al médico y a todos aquellos que se relacionan con los trastornos psiquiátricos de los

niños, herramientas concretas de diagnóstico y tratamiento y sitúa al paciente y su realidad personal como centro y motor de las decisiones terapéuticas. Uno de sus desafíos es mostrar la complejidad del conocimiento médico y psiquiátrico de nuestro tiempo con un lenguaje claro y preciso. El libro se estructura en cinco partes. La primera plantea una visión histórica, conceptual y metodológica de la psiquiatría infantil. La segunda se centra en los fundamentos neurobiológicos y dedica especial atención a los avances de la biología molecular, a los primeros años de la vida del niño y a sus consecuencias en el futuro. La tercera parte se dedica a los principales trastornos psiquiátricos de la infancia y adolescencia y se describen los cambios y vicisitudes de los criterios diagnósticos. La cuarta aborda la evaluación y el diagnóstico desde la perspectiva psiquiátrica, psicológica y de las técnicas de imagen. En la quinta parte se expone el tratamiento farmacológico y en la urgencia, las psicoterapias y los principios éticos de la práctica psiquiátrica

El Barça con Xavi. Una filosofía de juego connatural. Kevin Vidaña, 2021-05-31 'El Barça con Xavi. Una filosofía de juego connatural' es la sensibilidad previa al conocimiento, la atención superlativa a lo que está siendo, lo que no se rinde a condicionamientos del pasado. Hablamos de una filosofía de juego propia y característica del ser humano. Autoconocimiento sin fin ni conclusiones donde la naturaleza se respeta a sí misma sin necesidad de moldes uniformes, una sobresaliente escucha a lo verdadero que no requiere de datos para darse significado. XAVI HERNÁNDEZ ES... "Aquel que habita en todas las cosas, y sin embargo es diferente a ellas, a quien ninguna cosa conoce, cuyo cuerpo son todas las cosas, que controla todo desde dentro. Él es tu alma, el Controlador Interno, el Inmortal" Brahad-aranyaka (Upanishads).
