**Eisenstein on the Audiovisual** Robert Robertson,2011-03-24 The pioneering film director and theorist Sergei Eisenstein is known for the unequalled impact his films have had on the development of cinema. Less is known about his remarkable and extensive writings, which present a continent of ideas about film. Robert Robertson presents a lucid and engaging introduction to a key area of Eisenstein's thought: his ideas about the audiovisual in cinema, which are more pertinent today than ever before. With the advent of digital technology, music and sound now act as independent variables combined with the visual medium to produce a truly audiovisual result. Eisenstein explored in his writings this complex, exciting subject with more depth and originality than any other practitioner, and this is an accessible and original exploration of his ideas. Winner of the Kraszna Krausz Foundation's And/Or Award for Best Moving Image Book of 2009, Eisenstein on the Audiovisual is essential reading for students and practitioners of the audiovisual in cinema and related audiovisual forms, including theatre, opera, dance and multimedia.

*Music and Modernism, c. 1849-1950* Charlotte de Mille,2011-01-18 Music and Modernism is a collection of essays which re-evaluates the significant connections between the disciplines of music, fine art and architecture in the period covering the emergence and flowering of modernism, c. 1849-1950. Combining established scholars in the field with those at the start of their careers, this book presents an exceptional cross-section of European and American modernism through a series of detailed case-studies. Avoiding a simplistic engagement with cross- or inter-disciplinarity, the focus of attention centres on themes that became key to modernist artists and critics: association, perception, representation, subjectivity, writing and language. Accordingly, this book re-thinks modernism itself in the light of both the fine arts and music, to advocate a multiplicity of modernisms from which it is necessary for scholars to construct their own narratives.

*The Healing Forces of Music* Randall McClellan,2000 The Healing Forces of Music explores the shamanistic practices and musical cosmologies of the ancient world, the worlds of Eastern and Western classical forms, as well as contemporary resources. McClellan takes us into basic acoustics, the process of hearing and the vibratory nature of the human body. He presents a healing method through cymatics (the effect of vibration on physical matter), and also systems of healing with sound, voice and mantra, Tantric therapies and the utilization of the Endocrine Gland system and Chakra energies. He presents a thorough investigation of the physical, emotional, mental and spiritual effects of music, the characteristics of healing music, procedures for using music as a healing agent and advocates a new philosophy of music as a transcendent experience. -- Back cover.
