Introduction to Psychology James W. Kalat, 2005

Psychological Science Catherine A. Sanderson, Karen R. Huffman, 2023-04-11 Psychological Science: The Curious Mind, by award-winning authors and professors Catherine A. Sanderson and Karen Huffman, introduces 21st-century, digital-native students to the fascinating field of psychology. This new program emphasizes the importance of developing scientific literacy and an understanding of research and research methods. The program uses an inviting why-focused framework that taps into students' natural curiosity, incorporating active learning and real-life application to engage students. Psychological Science: The Curious Mind embraces the guidelines released by the American Psychological Association (APA)'s Introductory Psychology Initiative (IPI) in 2021. It provides an excellent framework for instructors who want to implement those guidelines in their Introductory Psychology courses, and it provides students with the content and motivation to achieve the course's ultimate outcome: an enduring, foundational understanding of psychological science.

McCarthy, 2018-12-13 Research Methods and Statistics in Psychology provides a seamless introduction to the subject, identifying various research areas and analyzing how one can approach them statistically. The text provides a solid empirical foundation for undergraduate psychology majors, and it prepares the reader to think critically and evaluate psychological research and claims they might hear in the news or popular press. This second edition features updated examples of research and new illustrations of important principles. It also includes updated coverage of ethical issues in research and of current diversity issues.

Religious and Non-Religious Perspectives on Happiness and Wellbeing Sharada Sugirtharajah, 2022-04-25 This book explores the theme of happiness and well-being from religious, spiritual, philosophical, psychological, humanistic, and health perspectives. Taking a non-binary approach, it considers how happiness in particular has been understood and appropriated in religious and non-religious strands of thought. The chapters offer incisive insight from a variety of perspectives, including humanism, atheism and major religions such as Christianity, Islam, Buddhism, Hinduism, and Judaism. Together they demonstrate that although worldviews might vary substantially, there are concurrences across religious and non-religious perspectives on happiness that provide a common ground for further cross-cultural and interreligious exploration. What the book makes clear is that happiness is not a static or monolithic category. It is an ongoing process of being and becoming, striving and seeking, living ethically and meaningfully, as well as arriving at a tranquil state of being. This multifaceted volume makes a fresh contribution to the contemporary study of happiness and is valuable reading for scholars and students from religious studies and theology, including those interested in interreligious dialogue and the psychology of religion, as well as positive psychology.
