**Draft Town Planning Scheme for the City of Gold Coast** Gold Coast (Qld.). Council,1971

**The Gold Coast Transformed** Tor Hundloe,Bridgette McDougall,Craig Page,2015-03-23 The Gold Coast is one of Australia's premier tourism destinations, a city cut out of coastal vegetation, including paperbark swamps, mangroves and rainforests of worldwide significance. The Gold Coast Transformed is a collection of integrated chapters identifying and assessing the environmental impacts of the building of Australia's sixth largest city. From the time of the first timber-getters through to the present, the book traces the cumulative impacts of humans on the now World Heritage-listed rainforest and surrounding ecosystems. The city's natural and engineered environments are both fascinating and vulnerable. The construction of massive high-rise apartment blocks, on what were frontal beach dunes, is one of the fundamental mistakes not to be repeated. The book illustrates how and why major environmentally destructive development took place and discusses the impacts of such development on the Gold Coast's beaches, wildlife, and terrestrial and marine environments, such as the destruction of riparian mangrove forest. The Gold Coast Transformed also shows the possibility of sustaining natural populations and reducing the city's ecological footprint. It will be of interest to ecologists, environmental scientists and managers, town planners, economists, policymakers and the general public.

*Planning for Climate Change* Simin Davoudi,Jenny Crawford,Abid Mehmood,2009-09-02 Climate change is changing the context of spatial planning and shaping its priorities. It has strengthened its environmental dimension and has become a new rationale for coordinating actions and integrating different policy priorities. This book sets out the economic, social and environmental challenges that climate change raises for urban and regional planners and explores current and potential responses. These are set within the context of recent research and scholarly works on the role of spatial planning in combating climate change. Addressing both mitigation measures for reducing greenhouse gas emissions and adaptation to the effects of climate change, the book provides an overview of emerging practice, with analysis of the drivers of policy change and practical implementation of measures. It scopes planning issues and opportunities at different spatial scales,

drawing on both the UK and international experiences and highlighting the need to link global and local responses to shared risks and opportunities.

**Greening Affordable Housing** Abdullateef Olanrewaju,Zalina Shari,Zhonghua Gou,2019-01-30 Books on green building theories, principles and strategies applicable to life cycles of all kinds of buildings and building types are already widely available. However, those specifically on greening affordable housing that guide various housing stakeholders at different life cycles are still very limited. This book intends to fill this gap. Integrating green building enables stakeholders to address the environmental component that has not traditionally been seen as an integral part of affordable housing development. The book presents theories and principles with practical methods, strategies and processes not only to make affordable housing green but also to support economic stability and social equity.

**Cities, Citizens and Environmental Reform** Robert Freestone,2022-08-10 Cities, Citizens and Environmental Reform tells a story of community involvement in the development of Australian town planning from the early 20th century - from the first wave of enthusiasm for modern town planning ideals before the Great War onto the more challenging social and political environment for the original town planning associations in the post-Second World War era. Meticulously researched and peppered with archival illustrations, the book reveals common threads and local differences in community planning movements across the nation and contributes to our understanding of modern urban planning in Australia.

**Off the Plan** Caryl Bosman,Ayşın Dedekorkut-Howes,Andrew Leach,2016-02-01 The Gold Coast is a well-known and loved destination for local and international tourists, a city of surf and sun, pleasure and leisure. However, it is also one of the fastest growing cities in Australia, occupying the largest urban footprint outside the state capitals. How did the Gold Coast come to be what it is today? Off the Plan is the first in-depth, multidisciplinary academic study on the urbanisation and development of the Gold Coast. It addresses the historical circumstances, both accidental and intentional, that led to the Gold Coast's infamous transition from a collection of settlements unburdened by planning regulations or a city centre to become Australia's sixth largest city. With chapters on tourism, environment, media, architecture, governance and politics, planning, transportation, real estate development and demographics, Off the Plan demonstrates the importance that historical analysis has in understanding present-day planning problems and the value of the Gold Coast as a model for the rapidly evolving western city.
