Reward Management Michael Armstrong, Helen Murlis, 2007 Based on the authors' experience, research and benchmarking activities, this definitive book explains that reward management is about performance - of individuals, teams and the whole organization. It examines in detail the processes and various approaches that can be adopted to achieve and reward outstanding skill and competence levels in the workplace. Comprehensive and highly practical in its approach, it takes a strategic perspective and addresses the wide gap that exists between theory and practice, with a focus on the implications for practitioners. Job Evaluation Maeve Quaid, 1993 Despite the recent widespread interest in and application of job evaluation technique, Quaid claims that we know very little about the more fundamental properties of the technique and that we have become satisfied with a number of unexamined assumptions. Using examples from a real-life organizational context, she demonstrates that many qualities that have been attributed to job evaluation are unfounded and that, in fact, despite its

many claims, at the rational level job evaluation accomplishes little, if anything at all. Annotation copyright by Book News, Inc., Portland, OR
