How to Survive and Thrive When Bad Things Happen Jim Taylor, PhD, 2019-06-08 Few of us go through life without experiencing some sort of crisis, whether health, financial, relationship, career, or personal safety. Crises happen and they are often out of our control. But the one thing we can control is how we respond to them. Yet, our natural instincts often hinder us as we confront today's crises that are complex, amorphous, and not readily solvable. Changing our reaction to a crisis is an immense challenge, yet with powerful lessons provided in these pages, anyone can turn crises into opportunities for reflection, positive action, and growth. . A crisis mentality can overwhelm you when bad things happen. Turning crises into opportunities empowers you to overcome the darkness that can engulf you in troubled times and allow you to seek the light that can guide you through hard times. Exploring the essential psychological, emotional, and interpersonal factors that most impact your reaction to a crisis, Jim Taylor provides you with deep insights and practical tools that help you move from a crisis mentality of fear, pessimism, and panic that controls you to an opportunity mindset of calm, confidence, and courage that you control in a crisis. He offers compelling examples, both recent and historical, well-known and unfamiliar, to bring these issues to life. Illustrations from government, large and small business, and ordinary people will highlight who responded well and who did not. Break free from the crisis mentality and embrace an opportunity mindset with nine strategies that will not only help you to survive, but actually thrive, when bad things happen.

Hardwired: How Our Instincts to Be Healthy are Making Us Sick Robert S. Barrett, Louis Hugo Francescutti, 2020-10-30 For the first time in a thousand years, Americans are experiencing a reversal in lifespan. Despite living in one of the safest and most secure eras in human history, one in five adults suffers from anxiety as does one-third of adolescents. Nearly half of the US population is overweight or obese and one-third of Americans suffer from chronic pain - the highest level in the world. In the United States, fatalities due to prescription pain medications now surpass those of heroin and cocaine combined, and each year 10% of all students on American college campuses contemplate suicide. With the proliferation of social media and the algorithms for social sharing that prey upon our emotional brains, inaccurate or misleading health articles and videos now move faster through social media networks than do reputable ones. This book is about modern health - or lack of it. The authors make two key arguments: that our deteriorating wellness is rapidly becoming a health emergency, and two, that much of these trends are rooted in the way our highly evolved hardwired brains and

bodies deal with modern social change. The co-authors: a PhD from the world of social science and an MD from the world of medicine – combine forces to bring this emerging human crisis to light. Densely packed with fascinating facts and little-told stories, the authors weave together real-life cases that describe how our ancient evolutionary drives are propelling us toward ill health and disease. Over the course of seven chapters, the authors unlock the mysteries of our top health vices: why hospitals are more dangerous than warzones, our addiction to sugar, salt, and stress, our emotionally-driven brains, our relentless pursuit of happiness, our sleepless society, our understanding of risk, and finally, how world history can be a valuable tutor. Through these varied themes, the authors illustrate how our social lives are more of a determinant of health outcome than at any other time in our history, and to truly understand our plight, we need to recognize when our decisions and behavior are being directed by our survival-seeking hardwired brains and bodies.

The Story of Us Humans, from Atoms to Today's Civilization Robert Dalling,2006-03 The Story of Us Humans explains human nature and human history, including the origins of our species, emotions, behavior, morals, and society. It explains what we are, how we got here, and where we are today by describing the origin, history, and current ways of our neighborhoods, religion, government, science, technology, and business. Written in plain language, it explains what astronomy, physics, geology, biology, chemistry, anthropology, history, religion, social science, and political science tell us about ourselves. Most everyone feels that human success is measured in terms of healthy and happy children and communities. Human thoughts and actions involve little besides love and children, spouse and family, community and justice because we are parenting mammals and social primates. Each of us simply wants to laugh and joke with our family and friends, pursue life, raise children and strive to be a valued and contributing member of our community. We have made incredible progress building civilization in just a few hundred generations using nothing except our animal minds. Have you wondered: * What are the laws of nature and how many laws are there? * How did molecular life begin and then evolve into worms fish, amphibians, reptiles, mammals, primates, and humans? * What are the differences between these animals? * How did we get from the Big Bang to bacteria and on to Christianity, democracy, and globalization? * What is life like for gatherer-hunters? * When did we first become farmers and first build cities, and what was life like at those times? * What was life like in Ancient Mesopotamia, Ancient Athens, 13th-century Cahokia, Medieval China and Europe, 19th-Century New England, Yoruban villages, and in the U.S. during the 1920s? * What was the Industrial Revolution and how has it changed our lives? * What are the Hindu, Muslim, Confucian, Jewish, Christian, Buddhist, and Humanist religions and world views? * How have our wages, infant mortality rates, lifespans, crime rates, and poverty and inequality rates varied through the ages? * What are the biggest economic and social secrets in the U.S. today? * What are some meaningful goals and priorities for

our civilization and how can we measure the success of our attempts to reach those goals? Includes questions, index, bibliography, and 1,200 internet links taking you to images, videos, and discussed documents.
