**Remote Performances in Nature and Architecture** Bruce Gilchrist, Jo Joelson, 2016-03-03 Outlandia is an off-grid artists' fieldstation, a treehouse imagined by artists London Fieldworks (Bruce Gilchrist & Jo Joelson) and designed by Malcolm Fraser Architects, situated in Glen Nevis, opposite Ben Nevis. It is performative architecture that immerses its occupants in a particular environment, provoking creative interaction between artists and the land. This book explores the relationship between place and forms of thought and creative activity, relating Outlandia and the artists there to the tradition of generative thinking and making structures that have included Goethe's Gartenhaus in Weimar, Henry Thoreau's cabin at Walden Pond and Dylan Thomas's writing shack in Laugharne. Based on a series of residencies and radio broadcasts produced by London Fieldworks in collaboration with Resonance 104.4fm, the Remote Performances project enabled twenty invited artists to consider and engage in transmissions, sound performances and dialogues on their artmaking strategies immersed in this specific rural environment of mountain, forest and river; flora and fauna. Some artists engaged in dialogue with people living and working in the area with a range of specialisms and experience in, for examples, forestry, mountain culture, wildlife, tourism, and local history. This book explores the ways in which being in the field impacts on artists and permeates through to the artworks they create. It considers the relationship between geography and contemporary art and artists' use of maps and fieldwork. It charts these artists' explorations of the ecological and cultural value of the natural environment, questioning our perceptions and relationships to landscape, climate and their changes. The book is an inspiring collection of ways to think differently about our relationship with the changing natural environment. The book includes essays by Jo Joelson, Francis McKee, Tracey Warr and Bruce Gilchrist, and texts, images and drawings by the artists: Bram Thomas Arn

*Guide to Reliable Distributed Systems* Kenneth P Birman, 2012-01-13 This book describes the key concepts, principles and implementation options for creating high-assurance cloud computing solutions. The guide starts with a broad technical

overview and basic introduction to cloud computing, looking at the overall architecture of the cloud, client systems, the modern Internet and cloud computing data centers. It then delves into the core challenges of showing how reliability and fault-tolerance can be abstracted, how the resulting questions can be solved, and how the solutions can be leveraged to create a wide range of practical cloud applications. The author's style is practical, and the guide should be readily understandable without any special background. Concrete examples are often drawn from real-world settings to illustrate key insights. Appendices show how the most important reliability models can be formalized, describe the API of the Isis2 platform, and offer more than 80 problems at varying levels of difficulty.

Linux+ David Engle,Cisco Learning Institute,2011-02-22 A preparatory text for the CompTia Linux+ (Exam# XK0-001). The purpose of this textbook is to prepare the reader to successfully complete the latest CompTIA Linux+ Certification Exam, which requires that the person seeking certification possess a working knowledge of Planning and Implementation, Installation, Configuration, Administration, Systems Maintenance, and Troubleshooting. These specific areas of required knowledge are provided inside the front cover of this book. It is suitable for readers and students in computer engineering technology, electrical engineering technology, networking technology and telecommunications technology programs, corporations, and government agencies. Linux has become popular over a relatively short period of time. There are literally thousands of programmers who have an active role in developing Linux, with hundreds of ongoing projects using Linux and various hardware for many purposes. This product is a blended educational and training solution that combines a printed text, a lab experience and an online web-based curriculum that can be delivered anytime and anywhere there is an internet connection. Students are provided with ample resource information in the text as well as from the online course. The online course includes hundreds of FLASH animations and graphics that allow a level of engagement not possible by using a text alone. It includes an online component that allows students to take the tests electronically. Once the student completes the exam it is graded; the grades are stored in the instructor's electronic gradebook and the student is provided with a Personalized Feedback that leads them to the points missed on the exam. This feature helps students and teachers ensure that the appropriate level of proficiency is reached for each objective. The Cisco Learning Institute is a 501 C3 not-for-profit corporation dedicated to helping teachers and students use technology to enhance the learning experience.
