Posthumanism and India Debashish Banerji, Md. Monirul Islam, Samrat Sengupta, 2024-12-10 The book is about what posthumanism means in the contemporary Indian context and what different lines of consideration this can take. The world today has universalized a Eurocentric history of the human with its privileges, oppressions, exploitations and exclusions. On the one hand, this has led to the triumphalist narrative of technology, the blurring of biological embodiment through prostheses and the dream of transhumanist self-exceeding. On the other hand, we are witness to the contemporary eruption of dystopian anomalies due to the dis-balance or revolt of the "others" of humanism — climate crisis, chronic pandemic, religious, ethnocentric and geopolitical violence, ideological and authoritarian state control. Posthumanism is both an acknowledgement of these blurred boundaries of humanism and a critical response to it. The editors of this volume opine that the discourse of posthumanism in India warrants urgent consideration, if we are to adequately address both national and global emergencies and look for solutions that India may be in a unique position to offer. Essays in the volume are by scholars in the area dealing with representative directions relating to posthumanism in India. The essays are divided into five areas of cultural relevance — (1) internal selves and others; (2) technology, normativity and ethics; (3) human and animal; (4) bodies and their discards; (5) becoming-cosmos. Together they form the beginnings of an approach to a critical cartography of posthumanism as it pertains specifically to India.

The Emotional Overdraft Andy Brown, 2024-01-22 Is it possible to run a successful business without sacrificing your mental and physical health? Most business owners and leaders have a habit of overcoming their company's challenges at the expense of their own wellbeing. They work long hours, try to do too many things, and struggle to reconcile the excitement of the early days with the stress and exhaustion they feel now. Their businesses may be profitable, but those profits have come at a high personal cost. In other words, they've run up an emotional overdraft. If this is you, you can be sure that not only is this damaging for your health, it's also masking some of the issues that need to be resolved in your business. Because reducing your emotional overdraft is as much of a lifesaver for your company as it is for you. While it's common to feel this way, it's not inevitable. This book explains why you've run up an emotional overdraft and how you can reduce it, so that you can create a healthier relationship with your business, your loved ones, and yourself. In the process, you'll be helping your company to thrive in ways you could never imagine — and without having to try so hard. Andy Brown is an award-winning

adviser and coach for people-based businesses, helping them to grow sustainably and increase their value.

Journey To Centricity Ilenia Vidili, 2021-11-23 Managers and leaders know that customer centricity means providing positive customer experiences. But what if that's not enough? In the current age, where Millennials and Generation Z are shaping the very fabric of society and business, to remain relevant, organisations must provide more than occasional good experiences. A narrow focus on short-termism, excessive tech automatisations and outdated product mentalities are a liability to customer centricity. We need businesses that are willing to radically change, embrace a long-term, customer-focussed perspective, and are able to create value for all stakeholders. In *Journey to Centricity*, Ilenia Vidili instils a customer-oriented vision from the C-suite beyond, to transform your day-to-day operations and culture through three pillars: Humanity. Make your brand more human by embracing a higher purpose, an empathic human touch and sustainable corporate responsibility. Technology. Apply the necessary tools as enablers to ease of use, hyper-personalisation and innovation to improve your customers' lives. Culture. Invest effort in changing old-style mindsets that improve your culture and fortify your brand, to create a place where employees feel motivated, valued and appreciated. Drawing on B2C practical advice from Ilenia's first-hand interviews with leaders of world-class organisations such as illycaffè, Enel, Polestar, Forrester and Bain & Co, this book lays out a customer-centric framework for thriving in the new era of stakeholder capitalism. Receive a powerful call to action to combat old paradigms, improve customer focus, create value for all stakeholders and contribute to a sustainable business world. There has never been a more critical time for change. Transform your mission into a journey to centricity.

Occupational Therapies without Borders - Volume 2 Frank Kronenberg, Nick Pollard, Dikaïos Sakellariou, 2011-10-24 The companion text to *Occupational Therapy without Borders - Volume 1: learning from the spirit of survivors!* In this landmark text writers from around the world discuss a plurality of occupation-based approaches that explicitly acknowledge the full potential of the art and science of occupational therapy. The profession is presented as a political possibilities-based practice, concerned with what matters most to people in real life contexts, generating practice-based evidence to complement evidence-based practice. As these writers demonstrate, occupational therapies are far more than, as some critical views have suggested, a monoculture of practice rooted in Western modernity. Nobel Peace Laureate Desmond Tutu captures the ethos of this book, which essentially calls for engagements in the service of a purpose that is larger than the advancement of our profession's interests: Your particular approach to advancing our wellbeing and health strikes me as both unique and easily taken for granted. Whilst you value and work with medical understandings, your main aim seems to go beyond these. You seem to enable people to appreciate more consciously how what we do to and with ourselves and others on a daily basis impacts on our individual and collective wellbeing. As occupational therapists you have a significant contribution to make [...] allowing people from all walks of life to contribute meaningfully to the wellbeing of others. - Links philosophy with practical examples of engaging people in ordinary occupations of daily life as a means of enabling them to

transform their own lives - Includes contributions from worldwide leaders in occupational therapy research and practice - Describes concrete initiatives in under-served and neglected populations - Looks at social and political mechanisms that influence people's access to useful and meaningful occupation - Chapters increase diversity of contributions - geographically, culturally and politically - Emphasis on practice, education and research maintains academic credibility - A glossary and practical examples in nearly every chapter make text more accessible to students

The Winning Link: A Proven Process to Define, Align, and Execute Strategy at Every Level Billy Ray

Taylor, 2022-08-02 Give ownership of business strategy to every employee at every level of your organization You have a great product. You have top-notch talent. You have a process that's been carefully mapped out. So, what's missing?

Executive, speaker, and leadership authority Billy Ray Taylor points to a lack of clarity on strategy that makes it impossible for your employees to understand how their activities fit within the company's overall vision and to take true ownership of their careers. In this groundbreaking guide, Taylor reveals how his proprietary LinkedX Process can help your organization cultivate extreme ownership at every level, from top management to front-line employees. Each chapter clearly covers one of the five steps of the Process, providing an actionable roadmap to reaching clearly defined benchmarks and turning them into winning practices. Taylor's proven program will show you how to: Build and deploy a clear, purpose-driven strategy with clarity Align the strategy with process, assets, and talent to deliver growth and profitability Enable and develop people-driven ownership and adherence to process Measure what matters by defining standards and performance Understand that winning is more than just the numbers Highlighted by Taylor's personal experiences working with companies across the globe, The Winning Link offers you a step-by-step playbook for creating a corporate culture-driven approach to success.

Creating Organizational Value through Dialogical Leadership Rens van Loon, 2017-07-27 This book demonstrates

Dialogical Leadership which is the workplace application of the Dialogical Self Theory, first developed by Dutch psychologist Hubert Hermans in the 1990s. It encourages scientists and science-practitioners interested in leadership issues to discuss the power of dialogue in solving workplace culture problems. Van Loon's work extends the concept of Dialogical Self Theory to the leadership of organizations, drawing on social constructionism by the American psychologist Ken Gergen and the leadership framework of British academic Keith Grint. This book explicitly links the health of organizations to the psychological and emotional health of those who lead them, concluding with the factors of teamwork and motivation. Dialogical Leadership jettisons the idea that organizations are run by 'superheroes', presenting a more realistic picture of the workplace. This is the first book to isolate 'generative dialogue' as the key mechanism for successful change and transformation programs in organizations. It rejects the idea that successful organizations are 'rational systems' conforming to scripts laid down by leaders, and it places dialogue and co-creation - 'reciprocal exchange' - at the heart of successful change programs. It starts from the kinds of questions leaders ask themselves - their 'interior dialogue' - and the quality of

their interactions with others – their external dialogues – which can as shown in this book, be the difference between success and failure.

Stimulus, Intention and Process in Creative Writing Graeme Harper, 2024-02-01 Stimulus, Intention and Process in Creative Writing explores three exciting and key areas of creative writing practice and understanding. What stimulates a writer to write – or to write a particular piece? What do they intend to achieve when they do it? And is there a process we can study and perhaps even understand? The authors in this book, who are both practitioners and researchers, explore these three areas in unique and thought-provoking ways. They bring to the discussion both expertise in relation to what we already know, and a sense of forward-thinking in discussing how we can find out more. This is a book for creative writing researchers and students who are seeking new knowledge about how creative writing is done, what informs and encourages those doing it, and what results from that knowledge and encouragement. It is also potentially a book for creative writing practitioners who wonder how the things that interest them have them writing certain things, and the ways they go about approaching, undertaking and completing these projects. The chapters in this book were originally published in *New Writing: The International Journal for the Practice and Theory of Creative Writing*.

Protests and the Media Giedre Kubiliute, Ian R. Lamond, 2024-02-23 This insightful volume critically explores activist events in their scale and their capacity to attract media attention through a critical event studies lens, offering new perspectives on protests and social movement. This book conceives events of dissent as the public manifestation of counter-narratives that articulate advocacy for policy change. It focuses on the material and virtual manifestation of protest events and the media response to them, associated with three active social movements – Reclaim These Streets, Extinction Rebellion, and Black Lives Matter. In doing so, the text sheds light on how different political orientations within the media

articulate the representation of events of dissent manifest by these groups, and how this results in significantly different opinion-forming statements on the issues behind those movements, as well as how this reflects mediated assessment of the responses of politicians, the public, and emergency service responses to protest events. Furthermore, it will explore the role of the Internet in the organisation of protest events and their part in the formation of networks of resistance, enabling the roll out of events with a global reach – demonstrated, more recently, by protests across many European cities against the war in Ukraine. This timely and significant book will appeal to scholars of and those interested in events tourism, protest, political communication, and media, amongst others.

Pedagogy in a New Tonality Peter Gouzouasis, 2011 This is a book for teachers, by teachers, from elementary school to university level classrooms. It is about the use of creative instructional strategies in K-12 class room settings, and the transformations the teachers made in their journeys from being traditional practitioners to becoming pedagogical in their approaches to teaching and learning across the curriculum. Over twenty teachers conducted research in their classrooms on the implementation of creative strategies, tactics, graphics organizers, and visual journals in teaching and learning. They have written their inquiries in a narrative style, informed by various forms of arts based educational research. Their research is approachable and usable by other teachers who are interested in becoming reflective-reflexive practitioners. Many of the strategies, tactics, and graphics organizers are described by Barrie Bennett in his widely used textbook, *Beyond Monet: The Artful Science of Instructional Intelligence*. However, through their journeys of becoming teacher-learner-researchers, many discovered numerous, creative variations of Bennett's work as it was implemented in their classrooms. While there are many professional books that provide ideas on collaborative learning and creative teaching approaches, there is very little published research on the efficacy of these concepts in the K-12 classroom. These inquiries provide practical insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving their students' learning.
