Church and Mission in the Context of War Eraston Kambale Kighoma, 2021-06-16 The church in the Democratic Republic of Congo is no stranger to conflict, yet little research has been done on the impact of war in shaping the local church's understanding of itself and its mission. In this in-depth study, Dr. Eraston Kambale Kighoma traces the survival and theological development of the Baptist Church in Central Africa over a twenty-year period of conflict. Utilizing a combination of descriptive, contextual and integrative approaches, he examines the effect of war on the church's theology in action, especially its understanding and practice of mission. This study sheds new light on existing theories of missions, while offering specific insight into the church's missionary task in contexts of conflict. It offers an excellent addition to missiological studies for scholars and practitioners alike.

Congo Stories John Prendergast, Fidel Bafilemba, 2025-04-08 From the author of the New York Times bestselling and award-winning *Not on Our Watch*, John Prendergast co-writes a compelling book with Fidel Bafilemba--with stunning photographs by Ryan Gosling--revealing the way in which the people and resources of the Democratic Republic of Congo have been used throughout the last five centuries to build, develop, advance, and safeguard the United States and Europe. The book highlights the devastating price Congo has paid for that support. However, the way the world deals with Congo is finally changing, and the book tells the remarkable stories of those in Congo and the United States leading that transformation. The people of Congo are fighting back against a tidal wave of international exploitation and governmental oppression to make things better for their nation, their neighborhoods, and their families. They are risking their lives to resist and alter the deadly status quo. And now, finally, there are human rights movements led by young people in the United States and Europe building solidarity with Congolese change-makers in support of dignity, justice, and equality for the Congolese people. As a result, the way the world deal with Congo is finally changing. Fidel Bafilemba, Ryan Gosling, and John Prendergast traveled to Congo to document some of the stories not only of the Congolese upstanders who are building a better future for their country but also of young Congolese people overcoming enormous odds just to go to school and help take care of their families. Through Gosling's photographs of Congolese daily life, Bafilemba's profiles of heroic Congolese activists, and Prendergast's narratives of the extraordinary history and evolving social movements that directly link Congo with the United States and Europe, *Congo Stories* provides windows into the history, the people, the challenges, the

possibilities, and the movements that could change the course of Congo's destiny. Chosen by Amazon as the Best Book of the Month for December 2018 in Biographies & Memoirs, History, and Nonfiction. Featuring the life story of Dr. Denis Mukwege, winner of the 2018 Nobel Peace Prize

Land Reforms and Natural Resource Conflicts in Africa Tukumbi Lumumba-Kasongo, 2015-10-16 This book is a critical examination of the place and role of land in Africa, the role of land in political formation and national identification, and the land as an economic resource within both national economic development and liberal globalization. Colonial and post-colonial conflicts have been rooted in four related claims: the struggle over scarce resources, especially access to land resources; abundance of natural resources mismanaged or appropriated by both the states, local power systems and multinationals; weak or absent articulated land tenure policies, leading to speculation or hybrid policy framework; and the imperatives of the global liberalization based on the free market principles to regulate the land question and mineral appropriation issue. The actualization of these combined claims have led to conflicts among ethnic groups or between them and governments. This book is not only about conflicts, but also about local policy achievements that have been produced on the land question. It provides a critical understanding of the forces and claims related to land tenure systems, as part of the state policy and its system of governance.

If Bill Gates Were An African... Cliff Awah, 2024-05-15 It is not a common feat for an African to produce a well-researched work on the life of one of America's richest persons and put it alongside Africa's predicaments. In this spell-bounding publication, Cliff brings in the African continent with its rich natural and human resources but with a very sorry story. He has masterfully explained the colonization of Africa and Africans by European Powers. But, the wounds and scars of slavery which were aggravated by the impact of colonialism, tribalism, Neo-colonialism and the failure of African leaders and policy-makers to create a conducive atmosphere for the socio-economic and political development of African countries are largely responsible for the miseries in Africa. In this soul-searching book, Africans and more especially African leaders, policy-makers and businessmen and women should not willy-nilly transplant what exists in the USA and/or in Europe but should rather adapt what is good, taking into account the African context (Victor Julius Ngoh, 'Foreword'). *If Bill Gates Were An African*, is a wakeup call appealing to the consciences of Africans especially its leaders to make use of the various cultures and civilizations of the world to build a better Africa - the Africa we want, that meets the needs and aspirations of Africans. An Africa with Good Governance, free from corruption, embezzlement, nepotism and a land of freedom and opportunities for Africans to exploit and have better living conditions worthy of their human dignity (Cliff Awah, 'Preface').

Decolonizing Global Health Ferdinand C Mukumbang, 2025-12-18 This insightful work uses a critical realist perspective to unpack the colonially informed culture, structures, and mechanisms which exist across global health institutions, offering a vision for radical change through a process of decolonization. Shedding light on the institutional structures that perpetuate

and sustain long-standing power imbalances in global health research and practice, post-colonial critical realism provides a cogent, meta-theoretical basis for understanding colonialism and decolonization. It reveals these structures as social constructions rather than naturally occurring phenomena. In astutely examining a range of factors, from the language of global health to the principles and practice of research in this field, the book identifies not only the role that colonialism continues to play, but also the means by which it can be subverted. Written by a prominent author in this important field of study, this book will be key reading for students and scholars from public health to medicine, as well as philosophy, anthropology, and development studies.

Atrocity Speech Law Gregory S. Gordon, 2017-04-11 This book is the first comprehensive study of the international law encompassing hate speech. Prof. Gordon provides a broad analysis of the entire jurisprudential output related to speech and gross human rights violations for courts, government officials, and scholars. The book is organized into three parts. The first part covers the foundation: a brief history of atrocity speech and the modern treatment of hate speech in international human rights treaties and judgments under international criminal tribunals. The second part focuses on fragmentation: detailing the inconsistent application of the charges and previous prosecutions, including certain categories of inflammatory speech and a growing doctrinal rift between the ICTR and ICTY. The last part covers fruition: recommendations on how the law should be developed going forward, with proposals to fix the problems with individual speech offenses to coalesce into three categories of offense: incitement, speech-abetting, and instigation.

Heart of Darkness Joseph Conrad, 2011-03-01 This volume presents the text of the 1921 Heinemann edition of Conrads classic short novel along with documents that place the work in historical context and critical essays that read Heart of Darkness from several contemporary critical perspectives. The text and essays are complemented by biographical and critical introductions, bibliographies, and a glossary of critical and theoretical terms. In this third edition, the section of cultural documents and illustrations is entirely new, as are two recent exemplary critical essays by Gabrielle McIntire and Tony C. Brown that synthesize a variety of current critical approaches.
