Los contratos para la construcción y explotación de obras y la prestación de servicios Fernando Cañizal Berini
,2023-05-30 Cuando un ente inversor precisa satisfacer una necesidad en relación con su actividad, ya sea la construcción o la explotación de infraestructuras, o la prestación de servicios públicos, suele confiar la realización de los correspondientes trabajos a una empresa especializada en relación con la fase en la que se encuentra esa actuación: la de elaboración de los estudios de viabilidad o anteproyectos; la de redacción del proyecto constructivo; la de ejecución de las obras e instalaciones; la de la explotación y conservación de la infraestructura o el servicio, y la de su desmantelamiento y reciclaje, finalizada su vida útil. La realización de esas actividades incide en aspectos técnicos y económicos, pero también de tipo social y ambiental. Para garantizar la correcta ejecución de dichas tareas, así como la contraprestación al empresario por la realización del trabajo, es preciso establecer entre las partes un vínculo contractual. Surge así el CONTRATO, figura jurídica imprescindible en cualquiera de las actividades enumeradas. Es evidente que el ingeniero tendrá una relación estrecha con esas figuras contractuales, tanto si desarrolla su profesión en el seno del ente inversor, como en el sector de la consultoría, o en una empresa constructora, o de servicios. El análisis de los distintos tipos de contratos, tan importantes para el ingeniero, constituye el objeto de la presente publicación. When an investing entity needs to satisfy a need in relation to its activity, be it the construction or operation of infrastructures or the provision of public services, it usually entrusts the performance of the corresponding work to a specialised company in relation to the phase in which the action is: the preparation of feasibility studies or preliminary projects; the drafting of the construction project; the execution of the works and installations; the operation and maintenance of the infrastructure or service, and its dismantling and recycling at the end of its useful life. The performance of these activities has an impact, not only on technical and economic aspects, but also on social and environmental aspects. In order to guarantee the correct execution of these tasks, as well as the consideration to the employer for the performance of the work, it is necessary to establish a contractual link between the parties. This gives rise to the CONTRACT, an essential legal figure in any of the activities listed above. It is obvious that the engineer will have a close relationship with these contractual figures, whether they develop their profession within the investing entity, or in the consultancy sector, or in a construction or service company. The analysis of the different types of contracts, which are so important for the engineer, is the subject of this publication.
