**Story, Not Study: 30 Brief Lessons to Inspire Health Researchers as Writers** Lorelei Lingard, Christopher Watling, 2021-04-26 Many researchers dread writing. They find it laborious - even painful - to put their scholarly work into words. They get bogged down in the study, and lose track of the story. And they produce uninspiring papers that fail to resonate with readers or reviewers. This book offers an antidote to this problem: brief, accessible lessons that guide researchers to write clear and compelling scientific manuscripts. The book is divided into three sections - Story, Craft, and Community. The Story section offers advice on getting the balance of study and story just right, introducing strategies for tackling each section of a scientific manuscript. The Craft section considers the grammatical and rhetorical tools of the trade, showing how they can be wielded for maximum impact. And the Community section offers suggestions for writing collaboratively, supporting other writers, and navigating peer review. Each section features multiple short and pragmatic lessons, peppered with illustrative examples. Readers can use the chapters collectively to build holistic writing skills, or dip in and out to refine specific elements of the craft. Rooted in a coaching philosophy, we aim to unlock our readers' potential as writers through instruction, reflection, and example. And we hope to inspire researchers to face writing with joy. This work is clearly written and easily understandable. Its many practical examples, tools, and exercises make an effective toolbox of support for scholarly writers. This will be invaluable to new scholars and help established scholars as well. The inclusion of examples specific to the health arena and the clear, elegantly simple explanations add strength and relevance to this work. Toni Ungaretti, Johns Hopkins School of Education, Baltimore, MD, USA This book is the most original perspective I have ever read about the craft of writing. As its title suggests, it is inspiring. **The Future of Doctoral Research** Anne Lee, Rob Bongaardt, 2021-02-09 This book explores the future of doctoral research and what it means to be involved in all stages of the process, providing international insights into what's changing, why it's changing and how to work best with these changes. It looks at the key issues that have been thrown into sharp relief by crises such as world pandemics. Drawing on work from outstanding authors, this book shows the ways in which the doctoral process has altered the supervisor/supervisee model and the challenges that now need to be managed, and demonstrates the importance of aligning all the stakeholders, systems and processes to ensure a successful future for doctoral education. Bringing together a range of perspectives, innovative practices and rigorous research, this book tackles

topics such as: how doctoral research changes in keeping with the global expansion and transformation of doctoral education programmes the significant influence funding bodies – be they charities, governments, businesses or non-governmental agencies – can have on doctoral research the extent to which doctoral research penetrates daily life and vice versa how to encourage and embed an ethical approach to research, as well as university responses to external challenges Uniquely international and bringing together the many stakeholders in the research business, this book is essential reading for all doctoral supervisors, candidates and anyone involved in designing or organising research programmes for early career researchers and doctoral students. Chapter 9 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

The Power of Persistence Alstria L. Compton, 2021-03-17 What is success to you? At age sixty-five what will be the deciding factor to your success? What if I told you that all your dreams and all your wishes were at your fingertips! The answer to achieving your most precious desire lies within you. This book will provide a blueprint on unlocking your best you. Within these pages are the hidden/ unhidden secrets to happiness and reaching that state of euphoria. In order to obtain that greatness, we must die inside to live inside and out. Some may read this book straight through, but others will use it as an interactive tool in which I intend it to be. However, as we progress to a greater self with the assistance of this book, we will define what is a heart's desire, how we navigate through the Storm, the great thing about the trials and tribulations, and how they empower us. We will learn what is power, the truth about self-assessment, and how it provides the gateway to be the pinnacle of what we determine success to be.

**Erasmus and Philosophy. On the Concept of Philosophy Developed by Erasmus of Rotterdam** Juliusz Domański, 2024-07-29 Erasmus of Rotterdam is not typically associated with the discipline of philosophy. Yet, he would himself employ the category of philosophia Christi in the sense of authentic Christianity which had not been contaminated by the abstractness and pedanticism of paganized mediaeval scholasticism. Does this reveal a contrarian attitude to philosophy in general or rather a special understanding of what a true philosophy as a way of life should be? This study attempts to answer this question by assembling and closely studying from Erasmus' extensive oeuvre his scant and occasional remarks on the concept of philosophy.

**Endocrine and Metabolic Effects on Maternal-fetal and Neonatal Outcomes** Huixia Yang, Moshe Hod, Jie Yan, Cuilin Zhang, 2024-07-10 Pregnancy is a complex state with many endocrine and metabolic challenges to a woman's physiology. Inappropriate maternal endocrine and metabolic changes such as obesity, hyperglycemia, hyperlipidemia, and hypothyroidism, may lead to short-term and long-term complications in the mother and offspring. This not only affects population health, but also imposes a huge social and economic burden, accompanied by significant direct and indirect public

health costs. Therefore, the study of endocrine and metabolic effects on maternal-fetal and neonatal outcomes is an especially important research field. These studies will lead to new approaches to predicting metabolic diseases in pregnancy and provide new solutions and effective interventions to prevent or delay those related diseases. Furthermore, they will reveal unknown pathophysiological mechanisms of inappropriate maternal endocrine and metabolic changes during pregnancy and their implications on short-term and long-term complications in the mother and offspring. This could lead to updated diagnosis and treatment strategies for women with endocrine and metabolic diseases during pregnancy. The proposed Research Topic intends to evaluate the pathophysiological mechanisms of inappropriate maternal endocrine and metabolic changes during pregnancy and their implications on short-term and long-term complications in the mother and offspring. The evolving trends in prediction, diagnosis, prevention and treatment strategies of endocrine and metabolic diseases during pregnancy are also encouraged. In addition, the goal of this research topic is to uncover the characteristics of maternal endocrine and metabolic changes in special populations, like twins, women with obesity, gestational diabetes mellitus, pregnancy hypothyroidism, etc

*The Oxford Encyclopedia of American Literature* Jay Parini, 2004 The Encyclopedia of American Literature gathers together 350 essays from over 190 leading scholars on the whole of American literature, from European discovery to the present. At the core of the Encyclopedia lie 250 essays on poets, playwrights, essayists, and novelists. Figures such as Whitman, Melville, Faulkner, Frost, and Morrison are discussed in detail with each examined in the context of his or her times, an assessment of the writer's current reputation, a bibliography of major works, and a list of major critical and biographical works about the writer. Fifty entries on major works such as Moby Dick, Song of Myself, Walden, The Great Gatsby, The Waste Land, Their Eyes Were Watching God, Death of a Salesman, and Beloved place the work in its historical context and offer a range of possibilities with regard to critical approach. The Encyclopedia also contains essays on literary movements, periods, and themes, pulling together a broad range of information and making connections between them. Each entry has its own primary and annotated secondary bibliography, and a system of cross-references helps readers locate information with ease. The Encyclopedia of American Literature is an outstanding reference source for students studying authors, or particular pieces of literature; libraries looking for one comprehensive source; and readers interested in American literature, its authors, and its connection with various areas of study.

**The Faith and the Power : the Inspiring Story of the First Christians & how They Survived the Madness of Rome** James D. Snyder, 2002 New insights unearthed -- How the early Jewish-Christians coped after the crucifixion of Jesus; why Nero tried to purge them; why the emperor's insatiable greed for money forced Jerusalem into a ruinous civil war and how the first Christians emerged with a new vitality that would one day sweep away Rome's profusion of pagan gods and temples. The Bible offers sketchy answers to these and many more questions. But when integrated with the perspective of early Jewish, Roman and Christian writers, the result is a chronological, three-dimensional documentary that both explains and enriches the Book of Acts and other New Testament writings. The most complete account to date of the turbulent, traumatic first century that laid the groundwork for Western Civilization for the next two millennia.
